Pt. 4

include an attempt to obtain additional evidence or the holding of an informal conference with the claimant. Upon the request of the claimant, the reviewer will conduct a hearing under §3.103(c).

- (d) The reviewer may grant a benefit sought in the claim notwithstanding §3.105(b), but, except as provided in paragraph (e) of this section, may not revise the decision in a manner that is less advantageous to the claimant than the decision under review. A review decision made under this section will include a summary of the evidence, a citation to pertinent laws, a discussion flow those laws affect the decision, and a summary of the reasons for the decision.
- (e) Notwithstanding any other provisions of this section, the reviewer may reverse or revise (even if disadvantageous to the claimant) prior decisions of an agency of original jurisdiction (including the decision being reviewed or any prior decision that has become final due to failure to timely appeal) on the grounds of clear and unmistakable error (see §3.105(a)).
- (f) Review under this section does not limit the appeal rights of a claimant. Unless a claimant withdraws his or her Notice of Disagreement as a result of this review process, VA will proceed with the traditional appellate process by issuing a Statement of the Case.
- (g) This section applies to all claims in which a Notice of Disagreement is filed on or after June 1, 2001.

PART 4—SCHEDULE FOR RATING DISABILITIES

Subpart A—General Policy in Rating

Sec.

- 4.1 Essentials of evaluative rating.
- 4.2 Interpretation of examination reports.
- 4.3 Resolution of reasonable doubt.
- 4.6 Evaluation of evidence.
- 4.7 Higher of two evaluations.
- ${\bf 4.9} \quad {\bf Congenital} \ {\bf or} \ {\bf developmental} \ {\bf defects}.$
- 4.10 Functional impairment.
- 4.13 Effect of change of diagnosis.
- 4.14 Avoidance of pyramiding.
- 4.15 Total disability ratings.

- 4.16 Total disability ratings for compensation based on unemployability of the individual.
- 4.17 Total disability ratings for pension based on unemployability and age of the individual.
- 4.17a Misconduct etiology.
- 4.18 Unemployability.
- 4.19 Age in service-connected claims.
- 4.20 Analogous ratings.
- 4.21 Application of rating schedule.
- 4.22 Rating of disabilities aggravated by active service.
- 4.23 Attitude of rating officers.
- 4.24 Correspondence.
- 4.25 Combined ratings table.
- 4.26 Bilateral factor.
- 4.27 Use of diagnostic code numbers.
- 4.28 Prestabilization rating from date of discharge from service.
- 4.29 Ratings for service-connected disabilities requiring hospital treatment or observation.
- 4.30 Convalescent ratings.
- 4.31 Zero percent evaluations.

Subpart B—Disability Ratings

THE MUSCULOSKELETAL SYSTEM

- 4 40 Functional loss
- 4.41 History of injury.
- 4.42 Complete medical examination of injury cases.
- 4.43 Osteomyelitis.
- 4.44 The bones.
- 4.45 The joints.
- 4.46 Accurate measurement.
- 4.47-4.54 [Reserved]
- 4.55 Principles of combined ratings for muscle injuries.
- 4.56 Evaluation of muscle disabilities.
- 4.57 Static foot deformities.
- 4.58 Arthritis due to strain.4.59 Painful motion.
- 4.60 [Reserved]
- 4.61 Examination.
- 4.62 Circulatory disturbances.
- 4.63 Loss of use of hand or foot. 4.64 Loss of use of both buttocks.
- 4.65 [Reserved]
- 4.66 Sacroiliac joint.
- 4.67 Pelvic bones.
- 4.68 Amputation rule.
- 4.69 Dominant hand.
- 4.70 Inadequate examinations.
- 4.71 Measurement of ankylosis and joint motion.
- 4.71a Schedule of ratings—musculoskeletal system.
- 4.72 [Reserved]
- 4.73 Schedule of ratings—muscle injuries.

THE ORGANS OF SPECIAL SENSE

- 4.75 Examination of visual acuity.
- 4.76 Examination of field vision.
- 4.76a Computation of average concentric contraction of visual fields.

- 4.77 Examination of muscle function.
- 4.78 Computing aggravation.
- 4.79 Loss of use of one eye, having only light perception.
- 4.80 Rating of one eye.
- 4.81-4.82 [Reserved]
- 4.83 Ratings at scheduled steps and distances.
- 4.83a Impairment of central visual acuity.
- 4.84 Differences between distant and near visual acuity.
- 4.84a Schedule of ratings-eye.

IMPAIRMENT OF AUDITORY ACUITY

- 4.85 Evaluation of hearing impairment.
- 4.86 Exceptional patterns of hearing impairment.
- 4.87 Schedule of ratings—ear.
- 4.87a Schedule of ratings—other sense organs.

INFECTIOUS DISEASES, IMMUNE DISORDERS AND NUTRITIONAL DEFICIENCIES

- 4.88 [Reserved]
- 4.88a Chronic fatigue syndrome.
- 4.88b Schedule of ratings—infectious diseases, immune disorders and nutritional deficiencies.
- 4.88c Ratings for inactive nonpulmonary tuberculosis initially entitled after August 19, 1968.
- 4.89 Ratings for inactive nonpulmonary tuberculosis in effect on August 19, 1968.

THE RESPIRATORY SYSTEM

- 4.96 Special provisions regarding evaluation of respiratory conditions.
- 4.97 Schedule of ratings—respiratory system.

THE CARDIOVASCULAR SYSTEM

- 4.100-4.103 [Reserved]
- $\begin{array}{lll} {\rm 4.104 \;\; Schedule \;\; of \;\; ratings-cardiova scular} \\ {\rm \;\; system.} \end{array}$

THE DIGESTIVE SYSTEM

- 4.110 Ulcers.
- 4.111 Postgastrectomy syndromes.
- 4.112 Weight loss.
- 4.113 Coexisting abdominal conditions.
- 4.114 Schedule of ratings—digestive system.

THE GENITOURINARY SYSTEM

- 4.115 Nephritis.
- 4.115a Ratings of the genitourinary system—dysfunctions.
- 4.115b Ratings of the genitourinary system—diagnoses.

GYNECOLOGICAL CONDITIONS AND DISORDERS OF THE BREAST

4.116 Schedule of ratings—gynecological conditions and disorders of the breast.

THE HEMIC AND LYMPHATIC SYSTEMS

4.117 Schedule of ratings—hemic and lymphatic systems.

THE SKIN

4.118 Schedule of ratings-skin.

THE ENDOCRINE SYSTEM

4.119 Schedule of ratings—endocrine system.

NEUROLOGICAL CONDITIONS AND CONVULSIVE DISORDERS

- 4.120 Evaluations by comparison.
- 1.121 Identification of epilepsy.
- 4.122 Psychomotor epilepsy.
- 4.123 Neuritis, cranial or peripheral.
- 4.124 Neuralgia, cranial or peripheral.
- 4.124a Schedule of ratings—neurological conditions and convulsive disorders.

MENTAL DISORDERS

- 4.125 Diagnosis of mental disorders.
- 4.126 Evaluation of disability from mental disorders.
- 4.127 Mental retardation and personality disorders.
- 4.128 Convalescence ratings following extended hospitalization.
- 4.129 Mental disorders due to traumatic stress.
- 4.130 Schedule of ratings—mental disorders.

DENTAL AND ORAL CONDITIONS

- 4.149 [Reserved]

Subpart A—General Policy in Rating

§4.1 Essentials of evaluative rating.

This rating schedule is primarily a guide in the evaluation of disability resulting from all types of diseases and injuries encountered as a result of or incident to military service. The percentage ratings represent as far as can practicably be determined the average impairment in earning capacity resulting from such diseases and injuries and

their residual conditions in civil occupations. Generally, the degrees of disability specified are considered adequate to compensate for considerable loss of working time from exacerbations or illnesses proportionate to the severity of the several grades of disability. For the application of this schedule, accurate and fully descriptive medical examinations are required, with emphasis upon the limitation of activity imposed by the disabling condition. Over a period of many years, a veteran's disability claim may require reratings in accordance with changes in laws, medical knowledge and his or her physical or mental condition. It is thus essential, both in the examination and in the evaluation of disability, that each disability be viewed in relation to its history.

[41 FR 11292, Mar. 18, 1976]

§ 4.2 Interpretation of examination reports.

Different examiners, at different times, will not describe the same disability in the same language. Features of the disability which must have persisted unchanged may be overlooked or a change for the better or worse may not be accurately appreciated or described. It is the responsibility of the rating specialist to interpret reports of examination in the light of the whole recorded history, reconciling the various reports into a consistent picture so that the current rating may accurately reflect the elements of disability present. Each disability must be considered from the point of view of the veteran working or seeking work. If a diagnosis is not supported by the findings on the examination report or if the report does not contain sufficient detail, it is incumbent upon the rating board to return the report as inadequate for evaluation purposes.

[41 FR 11292, Mar. 18, 1976]

§4.3 Resolution of reasonable doubt.

It is the defined and consistently applied policy of the Department of Veterans Affairs to administer the law under a broad interpretation, consistent, however, with the facts shown in every case. When after careful consideration of all procurable and assem-

bled data, a reasonable doubt arises regarding the degree of disability such doubt will be resolved in favor of the claimant. See §3.102 of this chapter.

[40 FR 42535, Sept. 15, 1975]

§ 4.6 Evaluation of evidence.

The element of the weight to be accorded the character of the veteran's service is but one factor entering into the considerations of the rating boards in arriving at determinations of the evaluation of disability. Every element in any way affecting the probative value to be assigned to the evidence in each individual claim must be thoroughly and conscientiously studied by each member of the rating board in the light of the established policies of the Department of Veterans Affairs to the end that decisions will be equitable and just as contemplated by the requirements of the law.

§4.7 Higher of two evaluations.

Where there is a question as to which of two evaluations shall be applied, the higher evaluation will be assigned if the disability picture more nearly approximates the criteria required for that rating. Otherwise, the lower rating will be assigned.

§ 4.9 Congenital or developmental defects.

Mere congenital or developmental defects, absent, displaced or supernumerary parts, refractive error of the eye, personality disorder and mental deficiency are not diseases or injuries in the meaning of applicable legislation for disability compensation purposes.

[41 FR 11292, Mar. 18, 1976]

§4.10 Functional impairment.

The basis of disability evaluations is the ability of the body as a whole, or of the psyche, or of a system or organ of the body to function under the ordinary conditions of daily life including employment. Whether the upper or lower extremities, the back or abdominal wall, the eyes or ears, or the cardiovascular, digestive, or other system, or psyche are affected, evaluations are based upon lack of usefulness, of these

parts or systems, especially in self-support. This imposes upon the medical examiner the responsibility of furnishing, in addition to the etiological, anatomical, pathological, laboratory and prognostic data required for ordinary medical classification, full description of the effects of disability upon the person's ordinary activity. In this connection, it will be remembered that a person may be too disabled to engage in employment although he or she is up and about and fairly comfortable at home or upon limited activity.

[41 FR 11292, Mar. 18, 1976]

§4.13 Effect of change of diagnosis.

The repercussion upon a current rating of service connection when change is made of a previously assigned diagnosis or etiology must be kept in mind. The aim should be the reconciliation and continuance of the diagnosis or etiology upon which service connection for the disability had been granted. The relevant principle enunciated in §4.125, entitled "Diagnosis of mental disorders," should have careful attention in this connection. When any change in evaluation is to be made, the rating agency should assure itself that there has been an actual change in the conditions, for better or worse, and not merely a difference in thoroughness of the examination or in use of descriptive terms. This will not, of course, preclude the correction of erroneous ratings, nor will it preclude assignment of a rating in conformity with §4.7.

 $[29~{\rm FR}~6718,~{\rm May}~22,~1964,~{\rm as}~{\rm amended}~{\rm at}~61~{\rm FR}~52700,~{\rm Oct.}~8,~1996]$

§ 4.14 Avoidance of pyramiding.

The evaluation of the same disability under various diagnoses is to be avoided. Disability from injuries to the muscles, nerves, and joints of an extremity may overlap to a great extent, so that special rules are included in the appropriate bodily system for their evaluation. Dyspnea, tachycardia, nervousness, fatigability, etc., may result from many causes; some may be service connected, others, not. Both the use of manifestations not resulting from service-connected disease or injury in establishing the service-connected eval-

uation, and the evaluation of the same manifestation under different diagnoses are to be avoided.

§4.15 Total disability ratings.

The ability to overcome the handicap of disability varies widely among individuals. The rating, however, is based primarily upon the average impairment in earning capacity, that is, upon the economic or industrial handicap which must be overcome and not from individual success in overcoming it. However, full consideration must be given to unusual physical or mental effects in individual cases, to peculiar effects of occupational activities, to defects in physical or mental endowment preventing the usual amount of success in overcoming the handicap of disability and to the effect of combinations of disability. Total disability will be considered to exist when there is present any impairment of mind or body which is sufficient to render it impossible for the average person to follow a substantially gainful occupation; Provided, That permanent total disability shall be taken to exist when the impairment is reasonably certain to continue throughout the life of the disabled person. The following will be considered to be permanent total disability: the permanent loss of the use of both hands, or of both feet, or of one hand and one foot, or of the sight of both eyes, or becoming permanently helpless or permanently bedridden. Other total disability ratings are scheduled in the various bodily systems of this schedule.

§4.16 Total disability ratings for compensation based on unemployability of the individual.

(a) Total disability ratings for compensation may be assigned, where the schedular rating is less than total, when the disabled person is, in the judgment of the rating agency, unable to secure or follow a substantially gainful occupation as a result of service-connected disabilities: *Provided* That, if there is only one such disability, this disability shall be ratable at 60 percent or more, and that, if there are two or more disabilities, there shall be at least one disability ratable at 40

percent or more, and sufficient additional disability to bring the combined rating to 70 percent or more. For the above purpose of one 60 percent disability, or one 40 percent disability in combination, the following will be considered as one disability: (1) Disabilities of one or both upper extremities, or of one or both lower extremities, including the bilateral factor, if applicable, (2) disabilities resulting from common etiology or a single accident, (3) disabilities affecting a single body system, e.g. orthopedic, digestive, respiratory, cardiovascular-renal. neuropsychiatric, (4) multiple injuries incurred in action, or (5) multiple disabilities incurred as a prisoner of war. It is provided further that the existence or degree of nonservice-connected previous disabilities orunemployability status will be disregarded where the percentages referred to in this paragraph for the service-connected disability or disabilities are met and in the judgment of the rating agency such service-connected disabilities render the veteran unemployable. Marginal employment shall not be considered substantially gainful employment. For purposes of this section, marginal employment generally shall be deemed to exist when a veteran's earned annual income does not exceed the amount established by the U.S. Department of Commerce, Bureau of the Census, as the poverty threshold for one person. Marginal employment may also be held to exist, on a facts found basis (includes but is not limited to employment in a protected environment such as a family business or sheltered workshop), when earned annual income exceeds the poverty threshold. Consideration shall be given in all claims to the nature of the employment and the reason for termination.

(Authority: 38 U.S.C. 501)

(b) It is the established policy of the Department of Veterans Affairs that all veterans who are unable to secure and follow a substantially gainful occupation by reason of service-connected disabilities shall be rated totally disabled. Therefore, rating boards should submit to the Director, Compensation and Pension Service, for extra-sched-

ular consideration all cases of veterans who are unemployable by reason of service-connected disabilities, but who fail to meet the percentage standards set forth in paragraph (a) of this section. The rating board will include a full statement as to the veteran's service-connected disabilities, employment history, educational and vocational attainment and all other factors having a bearing on the issue.

[40 FR 42535, Sept. 15, 1975, as amended at 54 FR 4281, Jan. 30, 1989; 55 FR 31580, Aug. 3, 1990; 58 FR 39664, July 26, 1993; 61 FR 52700, Oct. 8, 1996]

§ 4.17 Total disability ratings for pension based on unemployability and age of the individual.

All veterans who are basically eligible and who are unable to secure and follow a substantially gainful occupation by reason of disabilities which are likely to be permanent shall be rated as permanently and totally disabled. For the purpose of pension, the permanence of the percentage requirements of §4.16 is a requisite. When the percentage requirements are met, and the disabilities involved are of a permanent nature, a rating of permanent and total disability will be assigned if the veteran is found to be unable to secure and follow substantially gainful employment by reason of such disability. Prior employment or unemployment status is immaterial if in the judgment of the rating board the veteran's disabilities render him or her unemployable. In making such determinations. the following guidelines will be used:

- (a) Marginal employment, for example, as a self-employed farmer or other person, while employed in his or her own business, or at odd jobs or while employed at less than half the usual remuneration will not be considered incompatible with a determination of unemployability, if the restriction, as to securing or retaining better employment, is due to disability.
- (b) Claims of all veterans who fail to meet the percentage standards but who meet the basic entitlement criteria and are unemployable, will be referred by the rating board to the Adjudication

Officer under §3.321(b)(2) of this chapter

(Authority: 38 U.S.C. 1155; 38 U.S.C. 3102)

[43 FR 45348, Oct. 2, 1978, as amended at 56 FR 57985, Nov. 15, 1991]

§ 4.17a Misconduct etiology.

A permanent and total disability rating under the provisions of §§4.15, 4.16 and 4.17 will not be precluded by reason of the coexistence of misconduct disability when:

- (a) A veteran, regardless of employment status, also has innocently acquired 100 percent disability, or
- (b) Where unemployable, the veteran has other disabilities innocently acquired which meet the percentage requirements of §§4.16 and 4.17 and would render, in the judgment of the rating agency, the average person unable to secure or follow a substantially gainful occupation.

[40 FR 42536, Sept. 15, 1975, as amended at 43 FR 45349, Oct. 2, 1978]

§4.18 Unemployability.

A veteran may be considered as unemployable upon termination of employment which was provided on account of disability, or in which special consideration was given on account of the same, when it is satisfactorily shown that he or she is unable to secure further employment. With amputations, sequelae of fractures and other residuals of traumatism shown to be of static character, a showing of continuous unemployability from date of incurrence, or the date the condition reached the stabilized level, is a general requirement in order to establish the fact that present unemployability is the result of the disability. However, consideration is to be given to the circumstances of employment in individual claims, and, if the employment was only occasional, intermittent, tryout or unsuccessful, or eventually terminated on account of the disability, present unemployability may be attributed to the static disability. Where unemployability for pension previously has been established on the basis of combined service-connected and nonservice-connected disabilities and the service-connected disability or disabilities have increased in severity, §4.16 is for consideration.

[40 FR 42536, Sept. 15, 1975, as amended at 43 FR 45349, Oct. 2, 1978]

§ 4.19 Age in service-connected claims.

Age may not be considered as a factor in evaluating service-connected disability; and unemployability, in service-connected claims, associated with advancing age or intercurrent disability, may not be used as a basis for a total disability rating. Age, as such, is a factor only in evaluations of disability not resulting from service, i.e., for the purposes of pension.

[29 FR 6718, May 22, 1964, as amended at 43 FR 45349, Oct. 2, 1978]

§ 4.20 Analogous ratings.

When an unlisted condition is encountered it will be permissible to rate under a closely related disease or injury in which not only the functions affected, but the anatomical localization and symptomatology are closely analogous. Conjectural analogies will be avoided, as will the use of analogous ratings for conditions of doubtful diagnosis, or for those not fully supported by clinical and laboratory findings. Nor will ratings assigned to organic diseases and injuries be assigned by analogy to conditions of functional origin.

§4.21 Application of rating schedule.

In view of the number of atypical instances it is not expected, especially with the more fully described grades of disabilities, that all cases will show all the findings specified. Findings sufficiently characteristic to identify the disease and the disability therefrom, and above all, coordination of rating with impairment of function will, however, be expected in all instances.

[41 FR 11293, Mar. 18, 1976]

§ 4.22 Rating of disabilities aggravated by active service.

In cases involving aggravation by active service, the rating will reflect only the degree of disability over and above the degree existing at the time of entrance into the active service, whether the particular condition was noted at the time of entrance into the active service, or it is determined upon the

evidence of record to have existed at that time. It is necessary therefore, in all cases of this character to deduct from the present degree of disability the degree, if ascertainable, of the disability existing at the time of entrance into active service, in terms of the rating schedule, except that if the disability is total (100 percent) no deduction will be made. The resulting difference will be recorded on the rating sheet. If the degree of disability at the time of entrance into the service is not ascertainable in terms of the schedule, no deduction will be made.

§ 4.23 Attitude of rating officers.

It is to be remembered that the majority of applicants are disabled persons who are seeking benefits of law to which they believe themselves entitled. In the exercise of his or her functions. rating officers must not allow their personal feelings to intrude: an antagonistic, critical, or even abusive attitude on the part of a claimant should not in any instance influence the officers in the handling of the case. Fairness and courtesy must at all times be shown to applicants by all employees whose duties bring them in contact, directly or indirectly, with the Department's claimants.

[41 FR 11292, Mar. 18, 1976]

§ 4.24 Correspondence.

All correspondence relative to the interpretation of the schedule for rating disabilities, requests for advisory opinions, questions regarding lack of clarity or application to individual cases involving unusual difficulties, will be addressed to the Director, Compensation and Pension Service. A clear statement will be made of the point or points upon which information is desired, and the complete case file will be simultaneously forwarded to Central Office. Rating agencies will assure themselves that the recent report of physical examination presents an adequate picture of the claimant's condition. Claims in regard to which the schedule evaluations are considered inadequate or excessive, and errors in the schedule will be similarly brought to attention.

[41 FR 11292, Mar. 18, 1976]

§4.25 Combined ratings table.

Table I, Combined Ratings Table, results from the consideration of the efficiency of the individual as affected first by the most disabling condition, then by the less disabling condition, then by other less disabling conditions, if any, in the order of severity. Thus, a person having a 60 percent disability is considered 40 percent efficient. Proceeding from this 40 percent efficiency, the effect of a further 30 percent disability is to leave only 70 percent of the efficiency remaining after consideration of the first disability, or 28 percent efficiency altogether. The individual is thus 72 percent disabled, as shown in table I opposite 60 percent and under 30 percent.

(a) To use table I, the disabilities will first be arranged in the exact order of their severity, beginning with the greatest disability and then combined with use of table I as hereinafter indicated. For example, if there are two disabilities, the degree of one disability will be read in the left column and the degree of the other in the top row. whichever is appropriate. The figures appearing in the space where the column and row intersect will represent the combined value of the two. This combined value will then be converted to the nearest number divisible by 10. and combined values ending in 5 will be adjusted upward. Thus, with a 50 percent disability and a 30 percent disability, the combined value will be found to be 65 percent, but the 65 percent must be converted to 70 percent to represent the final degree of disability. Similarly, with a disability of 40 percent, and another disability of 20 percent, the combined value is found to be 52 percent, but the 52 percent must be converted to the nearest degree divisible by 10, which is 50 percent. If there are more than two disabilities, the disabilities will also be arranged in the exact order of their severity and the combined value for the first two will be found as previously described for two disabilities. The combined value, exactly as found in table I, will be combined with the degree of the third disability (in order of severity). The combined value for the three disabilities will be found in the space where the column and row intersect, and if there

are only three disabilities will be converted to the nearest degree divisible by 10, adjusting final 5's upward. Thus, if there are three disabilities ratable at 60 percent, 40 percent, and 20 percent, respectively, the combined value for the first two will be found opposite 60 and under 40 and is 76 percent. This 76 will be combined with 20 and the combined value for the three is 81 percent. This combined value will be converted to the nearest degree divisible by 10 which is 80 percent. The same procedure will be employed when there are four or more disabilities. (See table I).

(b) Except as otherwise provided in this schedule, the disabilities arising from a single disease entity, e.g., arthritis, multiple sclerosis, cerebrovascular accident, etc., are to be rated separately as are all other disabiling conditions, if any. All disabilities are then to be combined as described in paragraph (a) of this section. The conversion to the nearest degree divisible by 10 will be done only once per rating decision, will follow the combining of all disabilities, and will be the last procedure in determining the combined degree of disability.

TABLE I—COMBINED RATINGS TABLE
[10 combined with 10 is 19]

| | | | | | | | | | |
|----|--------------|----------|----------|----------|----------|----------|----------|----------|----------|
| | 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 |

(Authority: 38 U.S.C. 1155)

[41 FR 11293, Mar. 18, 1976, as amended at 54 FR 27161, June 28, 1989; 54 FR 36029, Aug. 31, 1989]

§4.26 Bilateral factor.

When a partial disability results from disease or injury of both arms, or of both legs, or of paired skeletal muscles, the ratings for the disabilities of the right and left sides will be combined as usual, and 10 percent of this value will be added (i.e., not combined) before proceeding with further combinations, or converting to degree of disability. The bilateral factor will be applied to such bilateral disabilities before other combinations are carried out and the rating for such disabilities including the bilateral factor in this section will be treated as 1 disability for the purpose of arranging in order of severity and for all further combinations. For example, with disabilities evaluated at 60 percent, 20 percent, 10 percent and 10 percent (the two 10's representing bilateral disabilities), the order of severity would be 60, 21 and 20. The 60 and 21 combine to 68 percent and the 68 and 20 to 74 percent, converted to

70 percent as the final degree of disability.

- (a) The use of the terms "arms" and "legs" is not intended to distinguish between the arm, forearm and hand, or the thigh, leg, and foot, but relates to the upper extremities and lower extremities as a whole. Thus with a compensable disability of the right thigh, for example, amputation, and one of the left foot, for example, pes planus, the bilateral factor applies, and similarly whenever there are compensable disabilities affecting use of paired extremities regardless of location or specified type of impairment.
- (b) The correct procedure when applying the bilateral factor to disabilities affecting both upper extremities and both lower extremities is to combine the ratings of the disabilities affecting the 4 extremities in the order of their individual severity and apply the bilateral factor by adding, not combining, 10 percent of the combined value thus attained.
- (c) The bilateral factor is not applicable unless there is partial disability of compensable degree in each of 2 paired extremities, or paired skeletal muscles.

§ 4.27 Use of diagnostic code numbers.

The diagnostic code numbers appearing opposite the listed ratable disabilities are arbitrary numbers for the purpose of showing the basis of the evaluation assigned and for statistical analysis in the Department of Veterans Affairs, and as will be observed, extend from 5000 to a possible 9999. Great care will be exercised in the selection of the applicable code number and in its citation on the rating sheet. No other numbers than these listed or hereafter furnished are to be employed for rating purposes, with an exception as described in this section, as to unlisted conditions. When an unlisted disease, injury, or residual condition is encountered, requiring rating by analogy, the diagnostic code number will be "builtup" as follows: The first 2 digits will be selected from that part of the schedule most closely identifying the part, or system, of the body involved; the last 2 digits will be "99" for all unlisted conditions. This procedure will facilitate a close check of new and unlisted conditions, rated by analogy. In the selection of code numbers, injuries will generally be represented by the number assigned to the residual condition on the basis of which the rating is determined. With diseases, preference is to be given to the number assigned to the disease itself; if the rating is determined on the basis of residual conditions, the number appropriate to the residual condition will be added, preceded by a hyphen. Thus, rheumatoid (atrophic) arthritis rated as ankylosis of the lumbar spine should be coded "5002-5289." In this way, the exact source of each rating can be easily identified. In the citation of disabilities on rating sheets, the diagnostic terminology will be that of the medical examiner, with no attempt to translate the terms into schedule nomenclature. Residuals of diseases or therapeutic procedures will not be cited without reference to the basic disease.

[41 FR 11293, Mar. 18, 1976]

§ 4.28 Prestabilization rating from date of discharge from service.

The following ratings may be assigned, in lieu of ratings prescribed elsewhere, under the conditions stated

for disability from any disease or injury. The prestabilization rating is not to be assigned in any case in which a total rating is immediately assignable under the regular provisions of the schedule or on the basis of individual unemployability. The prestabilization 50-percent rating is not to be used in any case in which a rating of 50 percent or more is immediately assignable under the regular provisions.

| | Rating |
|--|--------|
| Unstabilized condition with severe disability— Substantially gainful employment is not feasible or advisable | 100 |
| Material impairment of employability likely | 50 |

NOTE (1): Department of Veterans Affairs examination is not required prior to assignment of prestabilization ratings; however, the fact that examination was accomplished will not preclude assignment of these benefits. Prestabilization ratings are for assignment in the immediate postdischarge period. They will continue for a 12-month period following discharge from service. However, prestabilization ratings may be changed to a regular schedular total rating or one authorizing a greater benefit at any time. In each prestabilization rating an examination will be requested to be accomplished not earlier than 6 months nor more than 12 months following discharge. In those prestabilization ratings in which following examination reduction in evaluation is found to be warranted, the higher evaluation will be continued to the end of the 12th month following discharge or to the end of the period provided under §3.105(e) of this chapter, whichever is later. Special monthly compensation should be assigned concurrently in these cases whenever records are adequate to establish entitlement.

NOTE (2): Diagnosis of disease, injury, or residuals will be cited, with diagnostic code number assigned from this rating schedule for conditions listed therein.

[35 FR 11906, July 24, 1970]

§ 4.29 Ratings for service-connected disabilities requiring hospital treatment or observation.

A total disability rating (100 percent) will be assigned without regard to other provisions of the rating schedule when it is established that a service-connected disability has required hospital treatment in a Department of Veterans Affairs or an approved hospital for a period in excess of 21 days or

hospital observation at Department of Veterans Affairs expense for a serviceconnected disability for a period in excess of 21 days.

- (a) Subject to the provisions of paragraphs (d), (e), and (f) of this section this increased rating will be effective the first day of continuous hospitalization and will be terminated effective the last day of the month of hospital discharge (regular discharge or release to non-bed care) or effective the last day of the month of termination of treatment or observation for the service-connected disability. A temporary release which is approved by an attending Department of Veterans Affairs physician as part of the treatment plan will not be considered an absence.
- (1) An authorized absence in excess of 4 days which begins during the first 21 days of hospitalization will be regarded as the equivalent of hospital discharge effective the first day of such authorized absence. An authorized absence of 4 days or less which results in a total of more than 8 days of authorized absence during the first 21 days of hospitalization will be regarded as the equivalent of hospital discharge effective the ninth day of authorized absence.
- (2) Following a period of hospitalization in excess of 21 days, an authorized absence in excess of 14 days or a third consecutive authorized absence of 14 days will be regarded as the equivalent of hospital discharge and will interrupt hospitalization effective on the last day of the month in which either the authorized absence in excess of 14 days or the third 14 day period begins, except where there is a finding that convalescence is required as provided by paragraph (e) or (f) of this section. The termination of these total ratings will not be subject to §3.105(e) of this chapter
- (b) Notwithstanding that hospital admission was for disability not connected with service, if during such hospitalization, hospital treatment for a service-connected disability is instituted and continued for a period in excess of 21 days, the increase to a total rating will be granted from the first day of such treatment. If service connection for the disability under treatment is granted after hospital admission, the rating will be from the first

day of hospitalization if otherwise in order.

- (c) The assignment of a total disability rating on the basis of hospital treatment or observation will not preclude the assignment of a total disability rating otherwise in order under other provisions of the rating schedule. and consideration will be given to the propriety of such a rating in all instances and to the propriety of its continuance after discharge. Particular attention, with a view to proper rating under the rating schedule, is to be given to the claims of veterans discharged from hospital, regardless of length of hospitalization, with indications on the final summary of expected confinement to bed or house, or to inability to work with requirement of frequent care of physician or nurse at home.
- (d) On these total ratings Department of Veterans Affairs regulations governing effective dates for increased benefits will control.
- (e) The total hospital rating if convalescence is required may be continued for periods of 1, 2, or 3 months in addition to the period provided in paragraph (a) of this section.
- (f) Extension of periods of 1, 2 or 3 months beyond the initial 3 months may be made upon approval of the Adjudication Officer.
- (g) Meritorious claims of veterans who are discharged from the hospital with less than the required number of days but need post-hospital care and a prolonged period of convalescence will be referred to the Director, Compensation and Pension Service, under § 3.321(b)(1) of this chapter.

[29 FR 6718, May 22, 1964, as amended at 41 FR 11294, Mar. 18, 1976; 41 FR 34256, Aug. 13, 1976; 54 FR 4281, Jan. 30, 1989; 54 FR 34981, Aug. 23, 1989]

§ 4.30 Convalescent ratings.

A total disability rating (100 percent) will be assigned without regard to other provisions of the rating schedule when it is established by report at hospital discharge (regular discharge or release to non-bed care) or outpatient release that entitlement is warranted under paragraph (a) (1), (2) or (3) of this section effective the date of hospital admission or outpatient treatment and

continuing for a period of 1, 2, or 3 months from the first day of the month following such hospital discharge or outpatient release. The termination of these total ratings will not be subject to §3.105(e) of this chapter. Such total rating will be followed by appropriate schedular evaluations. When the evidence is inadequate to assign a schedular evaluation, a physical examination will be scheduled and considered prior to the termination of a total rating under this section.

- (a) Total ratings will be assigned under this section if treatment of a service-connected disability resulted in:
- (1) Surgery necessitating at least one month of convalescence (Effective as to outpatient surgery March 1, 1989.)
- (2) Surgery with severe postoperative residuals such as incompletely healed surgical wounds, stumps of recent amputations, therapeutic immobilization of one major joint or more, application of a body cast, or the necessity for house confinement, or the necessity for continued use of a wheelchair or crutches (regular weight-bearing prohibited). (Effective as to outpatient surgery March 1, 1989.)
- (3) Immobilization by cast, without surgery, of one major joint or more. (Effective as to outpatient treatment March 10, 1976.)

A reduction in the total rating will not be subject to §3.105(e) of this chapter. The total rating will be followed by an open rating reflecting the appropriate schedular evaluation; where the evidence is inadequate to assign the schedular evaluation, a physcial examination will be scheduled prior to the end of the total rating period.

- (b) A total rating under this section will require full justification on the rating sheet and may be extended as follows:
- (1) Extensions of 1, 2 or 3 months beyond the initial 3 months may be made under paragraph (a) (1), (2) or (3) of this section.
- (2) Extensions of 1 or more months up to 6 months beyond the initial 6 months period may be made under paragraph (a) (2) or (3) of this section

upon approval of the Adjudication Officer

[41 FR 34256, Aug. 13, 1976, as amended at 54 FR 4281, Jan. 30, 1989]

§4.31 Zero percent evaluations.

In every instance where the schedule does not provide a zero percent evaluation for a diagnostic code, a zero percent evaluation shall be assigned when the requirements for a compensable evaluation are not met.

[58 FR 52018, Oct. 6, 1993]

Subpart B—Disability Ratings

THE MUSCULOSKELETAL SYSTEM

§4.40 Functional loss.

Disability of the musculoskeletal system is primarily the inability, due to damage or infection in parts of the system, to perform the normal working movements of the body with normal excursion, strength, speed, coordination and endurance. It is essential that the examination on which ratings are based adequately portray the anatomical damage, and the functional loss, with respect to all these elements. The functional loss may be due to absence of part, or all, of the necessary bones, joints and muscles, or associated structures, or to deformity, adhesions, defective innervation, or other pathology, or it may be due to pain, supported by adequate pathology and evidenced by the visible behavior of the claimant undertaking the motion. Weakness is as important as limitation of motion, and a part which becomes painful on use must be regarded as seriously disabled. A little used part of the musculoskeletal system may be expected to show evidence of disuse, either through atrophy, the condition of the skin, absence of normal callosity or the like.

§ 4.41 History of injury.

In considering the residuals of injury, it is essential to trace the medical-industrial history of the disabled person from the original injury, considering the nature of the injury and the attendant circumstances, and the requirements for, and the effect of, treatment over past periods, and the course

of the recovery to date. The duration of the initial, and any subsequent, period of total incapacity, especially periods reflecting delayed union, inflammation, swelling, drainage, or operative intervention, should be given close attention. This consideration, or the absence of clear cut evidence of injury, may result in classifying the disability as not of traumatic origin, either reflecting congenital or developmental etiology, or the effects of healed disease.

§ 4.42 Complete medical examination of injury cases.

The importance of complete medical examination of injury cases at the time of first medical examination by the Department of Veterans Affairs cannot be overemphasized. When possible, this should include complete neurological and psychiatric examination, and other special examinations indicated by the physical condition, in addition to the required general and orthopedic or surgical examinations. When complete examinations are not conducted covering all systems of the body affected by disease or injury, it is impossible to visualize the nature and extent of the service connected disability. Incomplete examination is a common cause of incorrect diagnosis, especially in the neurological and psychiatric fields, and frequently leaves the Department of Veterans Affairs in doubt as to the presence or absence of disabling conditions at the time of the examination.

§ 4.43 Osteomyelitis.

Chronic, or recurring, suppurative osteomyelitis, once clinically identified, including chronic inflammation of bone marrow, cortex, or periosteum, should be considered as a continuously disabling process, whether or not an actively discharging sinus or other obvious evidence of infection is manifest from time to time, and unless the focus is entirely removed by amputation will entitle to a permanent rating to be combined with other ratings for residual conditions, however, not exceeding amputation ratings at the site of election.

§ 4.44 The bones.

The osseous abnormalities incident to trauma or disease, such as malunion with deformity throwing abnormal stress upon, and causing malalignment of joint surfaces, should be depicted from study and observation of all available data, beginning with inception of injury or disease, its nature, degree of prostration, treatment and duration of convalescence, and progress of recovery with development of permanent residuals. With shortening of a long bone, some degree of angulation is to be expected: the extent and direction should be brought out by X-ray and observation. The direction of angulation and extent of deformity should be carefully related to strain on the neighboring joints, especially those connected with weight-bearing.

§ 4.45 The joints.

As regards the joints the factors of disability reside in reductions of their normal excursion of movements in different planes. Inquiry will be directed to these considerations:

- (a) Less movement than normal (due to ankylosis, limitation or blocking, adhesions, tendon-tie-up, contracted scars, etc.).
- (b) More movement than normal (from flail joint, resections, nonunion of fracture, relaxation of ligaments, etc.)
- (c) Weakened movement (due to muscle injury, disease or injury of peripheral nerves, divided or lengthened tendons, etc.).
 - (d) Excess fatigability.
- (e) Incoordination, impaired ability to execute skilled movements smoothly.
- (f) Pain on movement, swelling, deformity or atrophy of disuse. Instability of station, disturbance of locomotion, interference with sitting, standing and weight-bearing are related considerations. For the purpose of rating disability from arthritis, the shoulder, elbow, wrist, hip, knee, and ankle are considered major joints; multiple involvements of the interphalangeal, metacarpal and carpal joints of the upper extremities, the interphalangeal, metatarsal and tarsal joints of the lower extremities, the cervical vertebrae, the dorsal vertebrae, and the

lumbar vertebrae, are considered groups of minor joints, ratable on a parity with major joints. The lumbosacral articulation and both sacroiliac joints are considered to be a group of minor joints, ratable on disturbance of lumbar spine functions.

§ 4.46 Accurate measurement.

Accurate measurement of the length of stumps, excursion of joints, dimensions and location of scars with respect to landmarks, should be insisted on. The use of a goniometer in the measurement of limitation of motion is indispensable in examinations conducted within the Department of Veterans Affairs. Muscle atrophy must also be accurately measured and reported.

[41 FR 11294, Mar. 18, 1976]

§§ 4.47–4.54 [Reserved]

§ 4.55 Principles of combined ratings for muscle injuries.

- (a) A muscle injury rating will not be combined with a peripheral nerve paralysis rating of the same body part, unless the injuries affect entirely different functions.
- (b) For rating purposes, the skeletal muscles of the body are divided into 23 muscle groups in 5 anatomical regions: 6 muscle groups for the shoulder girdle and arm (diagnostic codes 5301 through 5306); 3 muscle groups for the forearm and hand (diagnostic codes 5307 through 5309); 3 muscle groups for the foot and leg (diagnostic codes 5310 through 5312); 6 muscle groups for the pelvic girdle and thigh (diagnostic codes 5313 through 5318); and 5 muscle groups for the torso and neck (diagnostic codes 5319 through 5323).
- (c) There will be no rating assigned for muscle groups which act upon an ankylosed joint, with the following exceptions:
- (1) In the case of an ankylosed knee, if muscle group XIII is disabled, it will be rated, but at the next lower level than that which would otherwise be assigned.
- (2) In the case of an ankylosed shoulder, if muscle groups I and II are severely disabled, the evaluation of the shoulder joint under diagnostic code 5200 will be elevated to the level for unfavorable ankylosis, if not already as-

signed, but the muscle groups themselves will not be rated.

- (d) The combined evaluation of muscle groups acting upon a single unankylosed joint must be lower than the evaluation for unfavorable ankylosis of that joint, except in the case of muscle groups I and II acting upon the shoulder.
- (e) For compensable muscle group injuries which are in the same anatomical region but do not act on the same joint, the evaluation for the most severely injured muscle group will be increased by one level and used as the combined evaluation for the affected muscle groups.
- (f) For muscle group injuries in different anatomical regions which do not act upon ankylosed joints, each muscle group injury shall be separately rated and the ratings combined under the provisions of §4.25.

(Authority: 38 U.S.C. 1155) [62 FR 30237, June 3, 1997]

$\S 4.56$ Evaluation of muscle disabilities.

- (a) An open comminuted fracture with muscle or tendon damage will be rated as a severe injury of the muscle group involved unless, for locations such as in the wrist or over the tibia, evidence establishes that the muscle damage is minimal.
- (b) A through-and-through injury with muscle damage shall be evaluated as no less than a moderate injury for each group of muscles damaged.
- (c) For VA rating purposes, the cardinal signs and symptoms of muscle disability are loss of power, weakness, lowered threshold of fatigue, fatigue-pain, impairment of coordination and uncertainty of movement.
- (d) Under diagnostic codes 5301 through 5323, disabilities resulting from muscle injuries shall be classified as slight, moderate, moderately severe or severe as follows:
- (1) Slight disability of muscles—(i) Type of injury. Simple wound of muscle without debridement or infection.
- (ii) History and complaint. Service department record of superficial wound with brief treatment and return to duty. Healing with good functional results. No cardinal signs or symptoms of

muscle disability as defined in paragraph (c) of this section.

- (iii) Objective findings. Minimal scar. No evidence of fascial defect, atrophy, or impaired tonus. No impairment of function or metallic fragments retained in muscle tissue.
- (2) Moderate disability of muscles—(i) Type of injury. Through and through or deep penetrating wound of short track from a single bullet, small shell or shrapnel fragment, without explosive effect of high velocity missile, residuals of debridement, or prolonged infection.
- (ii) History and complaint. Service department record or other evidence of in-service treatment for the wound. Record of consistent complaint of one or more of the cardinal signs and symptoms of muscle disability as defined in paragraph (c) of this section, particularly lowered threshold of fatigue after average use, affecting the particular functions controlled by the injured muscles.
- (iii) Objective findings. Entrance and (if present) exit scars, small or linear, indicating short track of missile through muscle tissue. Some loss of deep fascia or muscle substance or impairment of muscle tonus and loss of power or lowered threshold of fatigue when compared to the sound side.
- (3) Moderately severe disability of muscles—(i) Type of injury. Through and through or deep penetrating wound by small high velocity missile or large low-velocity missile, with debridement, prolonged infection, or sloughing of soft parts, and intermuscular scarring.
- (ii) History and complaint. Service department record or other evidence showing hospitalization for a prolonged period for treatment of wound. Record of consistent complaint of cardinal signs and symptoms of muscle disability as defined in paragraph (c) of this section and, if present, evidence of inability to keep up with work requirements.
- (iii) Objective findings. Entrance and (if present) exit scars indicating track of missile through one or more muscle groups. Indications on palpation of loss of deep fascia, muscle substance, or normal firm resistance of muscles compared with sound side. Tests of strength and endurance compared with

sound side demonstrate positive evidence of impairment.

- (4) Severe disability of muscles—(i) Type of injury. Through and through or deep penetrating wound due to high-velocity missile, or large or multiple low velocity missiles, or with shattering bone fracture or open comminuted fracture with extensive debridement, prolonged infection, or sloughing of soft parts, intermuscular binding and scarring.
- (ii) History and complaint. Service department record or other evidence showing hospitalization for a prolonged period for treatment of wound. Record of consistent complaint of cardinal signs and symptoms of muscle disability as defined in paragraph (c) of this section, worse than those shown for moderately severe muscle injuries, and, if present, evidence of inability to keep up with work requirements.
- (iii) Objective findings. Ragged, depressed and adherent scars indicating wide damage to muscle groups in missile track. Palpation shows loss of deep fascia or muscle substance, or soft flabby muscles in wound area. Muscles swell and harden abnormally in contraction. Tests of strength, endurance, or coordinated movements compared with the corresponding muscles of the uninjured side indicate severe impairment of function. If present, the following are also signs of severe muscle disability:
- (A) X-ray evidence of minute multiple scattered foreign bodies indicating intermuscular trauma and explosive effect of the missile.
- (B) Adhesion of scar to one of the long bones, scapula, pelvic bones, sacrum or vertebrae, with epithelial sealing over the bone rather than true skin covering in an area where bone is normally protected by muscle.
- (C) Diminished muscle excitability to pulsed electrical current in electrodiagnostic tests.
 - (D) Visible or measurable atrophy.
- (E) Adaptive contraction of an opposing group of muscles.
- (F) Atrophy of muscle groups not in the track of the missile, particularly of the trapezius and serratus in wounds of the shoulder girdle.

(G) Induration or atrophy of an entire muscle following simple piercing by a projectile.

(Authority: 38 U.S.C. 1155 [62 FR 30238, June 3, 1997]

§ 4.57 Static foot deformities.

It is essential to make an initial distinction between bilateral flatfoot as a congenital or as an acquired condition. The congenital condition, with depression of the arch, but no evidence of abnormal callosities, areas of pressure, strain or demonstrable tenderness, is a congenital abnormality which is not compensable or pensionable. In the acquired condition, it is to be remembered that depression of the longitudinal arch, or the degree of depression, is not the essential feature. The attention should be given to anatomical changes, as compared to normal, in the relationship of the foot and leg, particularly to the inward rotation of the superior portion of the os calcis, medial deviation of the insertion of the Achilles tendon, the medial tilting of the upper border of the astragalus. This is an unfavorable mechanical relationship of the parts. A plumb line dropped from the middle of the patella falls inside of the normal point. The forepart of the foot is abducted, and the foot everted. The plantar surface of the foot is painful and shows demonstrable tenderness, and manipulation of the foot produces spasm of the Achilles tendon, peroneal spasm due to adhesion about the peroneal sheaths. and other evidence of pain and limited motion. The symptoms should be apparent without regard to exercise. In severe cases there is gaping of bones on the inner border of the foot, and rigid valgus position with loss of the power of inversion and adduction. Exercise with undeveloped or unbalanced musculature, producing chronic irritation, can be an aggravating factor. In the absence of trauma or other definite evidence of aggravation, service connection is not in order for pes cavus which is a typically congenital or juvenile disease.

§ 4.58 Arthritis due to strain.

With service incurred lower extremity amputation or shortening, a dis-

abling arthritis, developing in the same extremity, or in both lower extremities, with indications of earlier, or more severe, arthritis in the injured extremity, including also arthritis of the lumbosacral joints and lumbar spine, if associated with the leg amputation or shortening, will be considered as service incurred, provided, however, that arthritis affecting joints not directly subject to strain as a result of the service incurred amputation will not be granted service connection. This will generally require separate evaluation of the arthritis in the joints directly subject to strain. Amputation, or injury to an upper extremity, is not considered as a causative factor with subsequently developing arthritis, except in joints subject to direct strain or actually injured.

§ 4.59 Painful motion.

With any form of arthritis, painful motion is an important factor of disability, the facial expression, wincing, etc., on pressure or manipulation, should be carefully noted and definitely related to affected joints. Muscle spasm will greatly assist the identification. Sciatic neuritis is not uncommonly caused by arthritis of the spine. The intent of the schedule is to recognize painful motion with joint or periarticular pathology as productive of disability. It is the intention to recognize actually painful, unstable, or malaligned joints, due to healed injury, as entitled to at least the minimum compensable rating for the joint. Crepitation either in the soft tissues such as the tendons or ligaments, or crepitation within the joint structures should be noted carefully as points of contact which are diseased. Flexion elicits such manifestations. The joints involved should be tested for pain on both active and passive motion, in weight-bearing and nonweight-bearing and, if possible, with the range of the opposite undamaged joint.

§4.60 [Reserved]

§ 4.61 Examination.

With any form of arthritis (except traumatic arthritis) it is essential that the examination for rating purposes cover all major joints, with especial

reference to Heberden's or Haygarth's nodes

§ 4.62 Circulatory disturbances.

The circulatory disturbances, especially of the lower extremity following injury in the popliteal space, must not be overlooked, and require rating generally as phlebitis.

§ 4.63 Loss of use of hand or foot.

Loss of use of a hand or a foot, for the purpose of special monthly compensation, will be held to exist when no effective function remains other than that which would be equally well served by an amputation stump at the site of election below elbow or knee with use of a suitable prosthetic appliance. The determination will be made on the basis of the actual remaining function of the hand or foot, whether the acts of grasping, manipulation, etc., in the case of the hand, or of balance and propulsion, etc., in the case of the foot, could be accomplished equally well by an amputation stump with prosthesis

(a) Extremely unfavorable complete ankylosis of the knee, or complete ankylosis of 2 major joints of an extremity, or shortening of the lower extremity of 3½ inches (8.9 cms.) or more, will be taken as loss of use of the hand or foot involved.

(b) Complete paralysis of the external popliteal nerve (common peroneal) and consequent, footdrop, accompanied by characteristic organic changes including trophic and circulatory disturbances and other concomitants confirmatory of complete paralysis of this nerve, will be taken as loss of use of the foot.

[29 FR 6718, May 22, 1964, as amended at 43 FR 45349, Oct. 2, 1978]

§ 4.64 Loss of use of both buttocks.

Loss of use of both buttocks shall be deemed to exist when there is severe damage to muscle Group XVII, bilateral (diagnostic code number 5317) and additional disability rendering it impossible for the disabled person, without assistance, to rise from a seated position and from a stooped position (fingers to toes position) and to maintain postural stability (the pelvis upon head of femur). The assistance may be

rendered by the person's own hands or arms, and, in the matter of postural stability, by a special appliance.

§ 4.65 [Reserved]

§4.66 Sacroiliac joint.

The common cause of disability in this region is arthritis, to be identified in the usual manner. The lumbosacral and sacroiliac joints should be considered as one anatomical segment for rating purposes. X-ray changes from arthritis in this location are decrease or obliteration of the joint space, with the appearance of increased bone density of the sacrum and ilium and sharpening of the margins of the joint. Disability is manifest from erector spinae spasm (not accounted for by other pathology), tenderness on deep palpation and percussion over these joints, loss of normal quickness of motion and resiliency, and postural defects often accompanied by limitation of flexion and extension of the hip. Traumatism is a rare cause of disability in this connection, except when superimposed upon congenital defect or upon an existent arthritis; to permit assumption of pure traumatic origin, objective evidence of damage to the joint, and history of trauma sufficiently severe to injure this extremely strong and practically immovable joint is required. There should be careful consideration of lumbosacral sprain, and the various symptoms of pain and paralysis attributable to disease affecting the lumbar vertebrae and the intervertebral disc.

§ 4.67 Pelvic bones.

The variability of residuals following these fractures necessitates rating on specific residuals, faulty posture, limitation of motion, muscle injury, painful motion of the lumbar spine, manifest by muscle spasm, mild to moderate sciatic neuritis, peripheral nerve injury, or limitation of hip motion.

§ 4.68 Amputation rule.

The combined rating for disabilities of an extremity shall not exceed the rating for the amputation at the elective level, were amputation to be performed. For example, the combined evaluations for disabilities below the knee shall not exceed the 40 percent

evaluation, diagnostic code 5165. This 40 percent rating may be further combined with evaluation for disabilities above the knee but not to exceed the above the knee amputation elective level. Painful neuroma of a stump after amputation shall be assigned the evaluation for the elective site of reamputation.

§ 4.69 Dominant hand.

Handedness for the purpose of a dominant rating will be determined by the evidence of record, or by testing on VA examination. Only one hand shall be considered dominant. The injured hand, or the most severely injured hand, of an ambidextrous individual will be considered the dominant hand for rating purposes.

(Authority: 38 U.S.C. 1155) [62 FR 30239, June 3, 1997]

§4.70 Inadequate examinations.

If the report of examination is inadequate as a basis for the required consideration of service connection and evaluation, the rating agency may request a supplementary report from the examiner giving further details as to the limitations of the disabled person's ordinary activity imposed by the dis-

ease, injury, or residual condition, the prognosis for return to, or continuance of, useful work. When the best interests of the service will be advanced by personal conference with the examiner, such conference may be arranged through channels.

§4.71 Measurement of ankylosis and joint motion.

Plates I and II provide a standardized description of ankylosis and joint motion measurement. The anatomical position is considered as 0°, with two major exceptions: (a) Shoulder rotation—arm abducted to 90°, elbow flexed to 90° with the position of the forearm reflecting the midpoint 0° between internal and external rotation of the shoulder; and (b) supination and pronation—the arm next to the body, elbow flexed to 90°, and the forearm in midposition 0° between supination and pronation. Motion of the thumb and fingers should be described by appropriate reference to the joints (See Plate III) whose movement is limited. with a statement as to how near, in centimeters, the tip of the thumb can approximate the fingers, or how near the tips of the fingers can approximate the median transverse fold of the palm.

$\$\,4.71a$ Schedule of ratings—musculo-skeletal system.

ACUTE, SUBACUTE, OR CHRONIC DISEASES

| | Rat- ing |
|--|-------------|
| 5000 Osteomyelitis, acute, subacute, or chronic: Of the pelvis, vertebrae, or extending into major joints, or with multiple localization or with long history of intractability and debility, anemia, amyloid liver changes, or other continuous | |
| constitutional symptoms | 100 |
| Frequent episodes, with constitutional symptoms | 60 |
| With definite involucrum or sequestrum, with or without discharging sinus | 30 |
| tive infection within the past 5 years | 20 |
| Inactive, following repeated episodes, without evidence of active infection in past 5 years | 10 |
| criacines of delite infection in past o years | |

ACUTE, SUBACUTE, OR CHRONIC DISEASES—Continued

| | Rat- ing |
|---|-------------|
| NOTE (1): A rating of 10 percent, as an exception to the amputation rule, is to be assigned in any case of active osteomyelitis where the amputation rating for the affected part is no percent. This 10 percent rating and the other partial ratings of 30 percent or less are to be combined with ratings for ankylosis, limited motion, nonunion or malunion, shortening, etc., subject, of course, to the amputation rule. The 60 percent rating, as it is based on constitutional symptoms, is not subject to the amputation rule. A rating for osteomyelitis will not be applied following cure by removal or radical resection of the affected bone. | |

§4.71a

38 CFR Ch. I (7-1-02 Edition)

ACUTE, SUBACUTE, OR CHRONIC DISEASES— Continued

| | Rat- ing | | Rat- ing |
|--|-----------------------|--|-------------|
| NOTE (2): The 20 percent rating on the basis of activity within the past 5 years is not assignable following the initial infection of active osteomyelitis with no subsequent reactivation. The prerequisite for this historical rating is an established recurrent osteomyelitis. To qualify for the 10 percent rating, 2 or more episodes following the initial infection are required. This 20 percent rating or the 10 percent rating, when applicable, will be assigned once only to cover disability at all sites of previously active infection with a future ending date in the case of the 20 percent rating. 5001 Bones and joints, tuberculosis of, active or inactive: Active | ing 100 | With X-ray evidence of involvement of 2 or more major joints or 2 or more minor joint groups, with occasional incapacitating exacerbations With X-ray evidence of involvement of 2 or more major joints or 2 or more minor joint groups NOTE (1): The 20 pct and 10 pct ratings based on X-ray findings, above, will not be combined with ratings based on limitation of motion. NOTE (2): The 20 pct and 10 pct ratings based on X-ray findings, above, will not be utilized in rating conditions listed under diagnostic codes 5013 to 5024, inclusive. 5004 Arthritis, gonorrheal. 5005 Arthritis, pneumococcic. 5006 Arthritis, yphoid. 5007 Arthritis, yphoid. 5008 Arthritis, streptococcic. 5009 Arthritis, other types (specify). | ing 20 |
| tating Less than criteria for 100% but with weight loss and anemia productive of severe impairment of health or severely incapacitating exacerbations occurring 4 or more times a year or a lesser number over prolonged periods | 100 60 40 20 | With the types of arthritis, diagnostic codes 5004 through 5009, rate the disability as rheumatoid arthritis. 5010 Arthritis, due to trauma, substantiated by X-ray findings: Rate as arthritis, degenerative. 5011 Bones, caisson disease of: Rate as arthritis, cord involvement, or deafness, depending on the severity of disabling manifestations. 5012 Bones, new growths of, malignant NOTE: The 100 percent rating will be continued for 1 year following the cessation of surgical, X-ray, antineoplastic chemotherapy or other therapeutic procedure. At this point, if there | 100 |
| For chronic residuals: For residuals such as limitation of motion or ankylosis, favorable or unfavorable, rate under the appropriate diagnostic codes for the specific joints involved. Where, however, the limitation of motion of the specific joint or joints involved is noncompensable under the codes a rating of 10 percent is for application for each such major joint or group of minor joints affected by limitation of motion, to be combined, not added under diagnostic code 5002. Limitation of motion must be objectively confirmed by findings such as swelling, muscle spasm, or satisfactory evidence of painful motion. NOTE: The ratings for the active process will not be combined with the residual ratings for limitation of motion or ankylosis. Assign the higher evaluation. | | has been no local recurrence or metastases, the rating will be made on residuals. 5013 Osteoporosis, with joint manifestations. 5014 Osteomalacia. 5015 Bones, new growths of, benign. 5016 Osteitis deformans. 5017 Gout. 5018 Hydrarthrosis, intermittent. 5019 Bursitis. 5020 Synovitis. 5021 Myositis. 5022 Periostitis. 5023 Myositis ossificans. 5024 Tenosynovitis. The diseases under diagnostic codes 5013 through 5024 will be rated on limitation of motion of affected parts, as arthritis, degenera- | |
| 5003 Arthritis, degenerative (hypertrophic or osteo- arthritis): Degenerative arthritis established by X-ray find- ings will be rated on the basis of limitation of motion under the appropriate diagnostic codes for the specific joint or joints involved (DC 5200 etc.). When however, the limitation of motion of the specific joint or joints involved is noncompensable under the appropriate diag- | | tive, except gout which will be rated under diagnostic code 5002. 5025 Fibromyalgia (fibrositis, primary fibromyalgia syndrome) With widespread musculoskeletal pain and tender points, with or without associated fatigue, sleep disturbance, stiffness, paresthesias, headache, irritable bowel symptoms, depression, anxiety, or Raynaud's-like symptoms: | |
| nostic codes, a rating of 10 pct is for applica- tion for each such major joint or group of minor joints affected by limitation of motion, to be combined, not added under diagnostic code 5003. Limitation of motion must be ob- jectively confirmed by findings such as swell- | | That are constant, or nearly so, and refractory to therapy That are episodic, with exacerbations often precipitated by environmental or emotional stress or by overexertion, but that are present more than one-third of the | 40 |
| ing, muscle spasm, or satisfactory evidence of painful motion. In the absence of limitation of | | time | 20 |
| motion, rate as below: | | trol | |

§4.71a

Acute, Subacute, or Chronic Diseases— Continued —

¹ Entitled to special monthly compensation.

SINGLE FINGER AMPUTATIONS

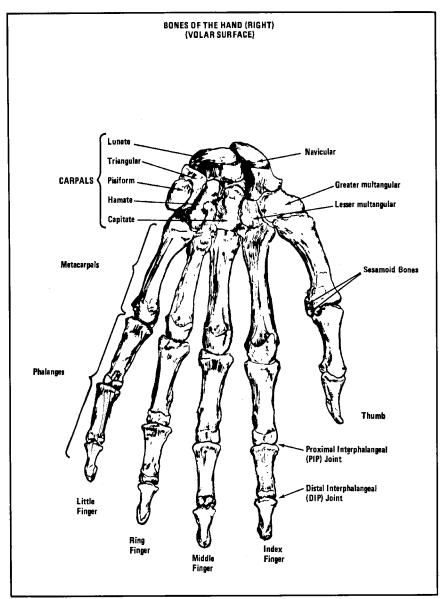

PLATE III

§4.71a

AMPUTATIONS: LOWER EXTREMITY

| | Rat- ing |
|--|-----------------|
| Thigh, amputation of: | |
| 5160 Disarticulation, with loss of extrinsic pelvic gir- | |
| dle muscles | 290 |
| 5161 Upper third, one-third of the distance from | |
| perineum to knee joint measured from perineum | ² 80 |
| 5162 Middle or lower thirds | ² 60 |
| Leg, amputation of: | |
| 5163 With defective stump, thigh amputation rec- | |
| ommended | ² 60 |
| 5164 Amputation not improvable by prosthesis con- | |
| trolled by natural knee action | ² 60 |
| 5165 At a lower level, permitting prosthesis | ² 40 |
| 5166 Forefoot, amputation proximal to metatarsal | |
| bones (more than one-half of metatarsal loss) | ² 40 |
| 5167 Foot, loss of use of | 2 40 |

AMPUTATIONS: LOWER EXTREMITY—Continued

| | Rat- ing |
|--|-------------|
| 5170 Toes, all, amputation of, without metatarsal | |
| loss | 30 |
| 5171 Toe, great, amputation of: | |
| With removal of metatarsal head | 30 |
| Without metatarsal involvement | 10 |
| 5172 Toes, other than great, amputation of, with re- | |
| moval of metatarsal head: | |
| One or two | 20 |
| Without metatarsal involvement | 0 |
| 5173 Toes, three or four, amputation of, without | |
| metatarsal involvement: | |
| Including great toe | 20 |
| Not including great toe | 10 |

² Also entitled to special monthly compensation.

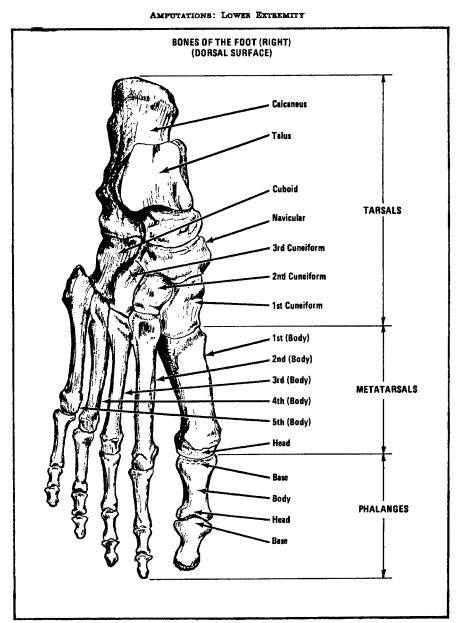

PLATE IV

5200 Scapulohumeral articulation, ankylosis of:

NOTE: The scapula and humerus move as one piece.
Unfavorable, abduction limited to 25° from side

Intermediate between favorable and un-

Midway between side and shoulder levelAt shoulder level

Nonunion of (false flail joint)
Fibrous union of
Recurrent dislocation of at
scapulohumeral joint.
With frequent episodes and guard-

with infrequent episodes, and guarding of movement only at shoulder level

Moderate deformity

mouth and head

5201 Arm, limitation of motion of:
To 25° from side

5202 Humerus, other impairment of: Loss of head of (flail shoulder)

Marked deformity

5203 Clavicle or scapula, impairment of: Dislocation of

Malunion of:

§4.71a

MULTIPLE FINGERS: UNFAVORABLE ANKYLOSIS

Rating Major In classifying the severity of ankylosis and limitation of motion of single digits and combinations of digits the fol-lowing rules will be observed: (1) Ankylosis of both metacarpophalangeal and proximal interphalangeal joints, with either joint in extension or in extreme flexion, will be rated as amputation. (2) Ankylosis of both metacarpophalangeal and proximal interphalangeal joints, even though each is individually in fa-vorable position, will be rated as unfavorable ankylosis. (3) With only one joint of a digit ankylosed or limited in its motion, the determination will be made on the basis of whether motion is possible to within 2 inches (5.1 cms.) of the median transverse fold of the palm; when so possible, the rating will be for favorable ankylosis, otherwise unfavorable. (4) With the thumb. carpometacarpal joint is to be regarded as comparable to the metacarpophalangeal joint other digits. 5216 Five digits of one hand, unfavorable ankylosis of 60 50 5217 Four digits of one hand, unfavorable ankylosis of: Thumb, index, middle and ring 60 50 Thumb, index, middle and little 60 50 Thumb, index, ring and little 60 50 Thumb, middle, ring and little 60 50 Index, middle, ring and little 50 40 5218 Three digits of one hand, unfavorable ankylosis of: Thumb, index and middle 50 40 Thumb, index and ring 50 40 Thumb, index and little 50 40 50 Thumb, middle and ring 40 Thumb, middle and little 50 40 50 40 Thumb, ring and little Index, middle and ring 40 30 Index, middle and little 40 30 Index, ring and little 40 30 Middle, ring and little 30 20 5219 Two digits of one hand, unfavorable Thumb and index 40 30 Thumb and middle 40 30 Thumb and ring 40 30 Thumb and little 40 30 Index and middle 30 20 Index and ring 30 20 Index and little 30 20 Middle and ring 20 20

MULTIPLE FINGERS: UNFAVORABLE ANKYLOSIS— Continued

| (a) Extremely unfavorable ankylosis of the fingers, all joints in extension or in extreme flexion, or with rotation and angulation of bones, will be rated as amputation. (b) The ratings for codes 5216 through 5219 apply to unfavorable ankylosis or limited motion preventing flexion of tips to within 2 inches (5.1 cms.) of median transverse fold of the palm. (c) Combinations of finger amputations at various levels, or of finger amputations with ankylosis or limitation of motion of the fingers will be rated on the basis of the grade of disability, i.e., amputation, unfavorable ankylosis, or favorable ankylosis, most representative of the levels or combinations. With an even number of fingers involved, and adjacent grades of disability, select the higher of the two grades. |
|---|

MULTIPLE FINGERS: FAVORABLE ANKYLOSIS

| | Rati | ing |
|---|----------|-------|
| | Major | Minor |
| In classifying the severity of ankylosis and limitation of motion of single digits and combinations of digits the following rules will be observed: (1) Ankylosis of both the metacarpophalangeal and proximal interphalangeal joints, with either joint in extension or in extreme flexion, will be rated as amputation. (2) Ankylosis of both the metacarpophalangeal and proximal interphalangeal joints, even though each is individually in favorable position, will be rated as unfavorable ankylosis. (3) With only one joint of a digit ankylosed or limited in its motion, the determination will be made on the basis of whether motion is possible to within 2 inches (5.1 cms.) of the median transverse fold of the palm; when so possible, the rating will be for favorable ankylosis, otherwise unfavorable. (4) With the thumb, the carpometacarpal joint is to be regarded as comparable to the metacarpophalangeal joint of other digits. | | |

MISCELLANEOUS

5324 Diaphragm, rupture of, with herniation. Rate

under diagnostic code 7346. 5325 Muscle injury, facial muscles. Evaluate functional impairment as seventh (facial) cranial nerve neuropathy (diagnostic code 8207), disfiguring scar (diagnostic code 7800), etc. Minimum, if interfering

to any extent with mastication—10.
5326 Muscle hernia, extensive. Without other injury to the muscle—10.

5327 Muscle, neoplasm of, malignant (excluding soft tissue sarcoma)-100.

NOTE: A rating of 100 percent shall continue beyond the cessation of any surgery, radiation treatment, antineoplastic chemotherapy or other therapeutic procedures. Six months after discontinuance of such treatment, the appropriate disability rating shall be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of §3.105(e) of this chapter. If there has been no local recurrence or metastasis. rate on residual impairment of function.

5328 Muscle, neoplasm of, benign, postoperative. Rate on impairment of function, i.e., limitation of motion, or scars, diagnostic code 7805, etc.

5329 Sarcoma, soft tissue (of muscle, fat, or fibrous connective tissue)-100.

NOTE: A rating of 100 percent shall continue beyond the cessation of any surgery, radiation treatment, antineoplastic chemotherapy or other therapeutic procedures. Six months after discontinuance of such treatment, the appropriate disability rating shall be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of §3.105(e) of this chapter. If there has been no local recurrence or metastasis. rate on residual impairment of function.

(Authority: 38 U.S.C. 1155) [62 FR 30239, June 3, 1997]

THE ORGANS OF SPECIAL SENSE

§ 4.75 Examination of visual acuity.

Ratings on account of visual impairments considered for service connection are, when practicable, to be based only on examination by specialists. Such special examinations should include uncorrected and corrected cen-

tral visual acuity for distance and near, with record of the refraction. Snellen's test type or its equivalent will be used. Mydriatics should be routine, except when contraindicated. Funduscopic and ophthalmological findings must be recorded. The best distant vision obtainable after best correction by glasses will be the basis of rating, except in cases of keratoconus in which contact lenses are medically required. Also, if there exists a difference of more than 4 diopters of spherical correction between the two eyes, the best possible visual acuity of the poorer eye without glasses, or with a lens of not more than 4 diopters difference from that used with the better eye will be taken as the visual acuity of the poorer eye. When such a difference exists, close attention will be given to the likelihood of congenital origin in mere refractive error.

[40 FR 42537, Sept. 15, 1975]

§ 4.76 Examination of field vision.

Measurement of the visual field will be made when there is disease of the optic nerve or when otherwise indicated. The usual perimetric methods will be employed, using a standard perimeter and 3 mm. white test object. At least 16 meridians 22½ degrees apart will be charted for each eye. (See Figure 1. For the 8 principal meridians, see table III.) The charts will be made a part of the report of examination. Not less than 2 recordings, and when possible, 3 will be made. The minimum limit for this function is established as a concentric central contraction of the visual field to 5°. This type of contraction of the visual field reduces the visual efficiency to zero. Where available the examination for form field should be supplemented, when indicated, by the use of tangent screen or campimeter. This last test is especially valuable in detection of scotoma.

[43 FR 45352, Oct. 2, 1978]

§4.76a Computation of average concentric contraction of visual fields.

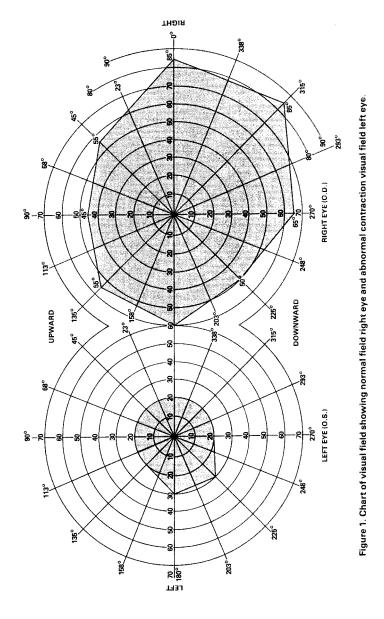

The extent of contraction of visual field in each eye is determined by recording the extent of the remaining visual fields in each of the eight 45 degree principal meridians. The number

§4.76a

of degrees lost is determined at each meridian by subtracting the remaining degrees from the normal visual fields given in table III. The degrees lost are then added together to determine total degrees lost. This is subtracted from 500. The difference represents the total remaining degrees of visual field. The difference divided by eight represents the average contraction for rating purposes.

TABLE III—NORMAL VISUAL FIELD EXTENT AT 8
PRINCIPAL MERIDIANS

| Meridian | Normal de- grees |
|---------------|---------------------|
| Temporally | 85 85 |
| Down | 65 |
| Down nasally | 50 |
| Nasally | 60 |
| Up nasally | 55 |
| Up | 45 |
| Up temporally | 55 |
| Total | 500 |

TS-19 52a

Example of computation of concentric contraction under the schedule with abnormal findings taken from Figure 1.

| Loss | Degrees |
|-----------------|---------|
| Temporally | 55 |
| Down temporally | 55 |
| Down | 45 |

| Loss | Degrees |
|--|----------------------------|
| Down nasally Nasally Up nasally Up Up Up | 30 40 35 25 35 |
| Total loss | 320 |

Remaining field 500° minus 320° = 180°. 180° ÷ 8 = 22½° average concentric contraction

[43 FR 45352, Oct. 2, 1978]

§4.77 Examination of muscle function.

The measurement of muscle function will be undertaken only when the history and findings reflect disease or injury of the extrinsic muscles of the eye, or of the motor nerves supplying these muscles. The measurement will

be performed using a Goldmann Perimeter Chart as in Figure 2 below. The chart identifies four major quadrants, (upward, downward, and two lateral) plus a central field (20 $^{\circ}$ or less). The examiner will chart the areas in which diplopia exists, and such plotted chart will be made a part of the examination report. Muscle function is considered normal (20/40) when diplopia does not 40° in the lateral or exist within downward quadrants, or within 30° in the upward quadrant. Impairment of muscle function is to be supported in each instance by record of actual appropriate pathology. Diplopia which is only occasional or correctable is not considered a disability.

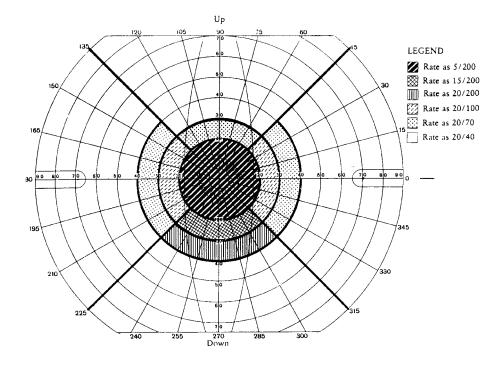

Figure 2. Goldmann Perimeter Chart

52c

[53 FR 30262, Aug. 11, 1988]

§4.78 Computing aggravation.

In determining the effect of aggravation of visual disability, even though the visual impairment of only one eye is service connected, evaluate the vision of both eyes, before and after suffering the aggravation, and subtract the former evaluation from the latter except when the bilateral vision amounts to total disability. In the event of subsequent increase in the disability of either eye, due to intercurrent disease or injury not associated with the service, the condition of the eyes before suffering the subsequent increase will be taken as the basis of compensation subject to the provisions of §3.383(a) of this chapter.

[29 FR 6718, May 22, 1964, as amended at 43 FR 45354, Oct. 2, 1978]

§4.79 Loss of use of one eye, having only light perception.

Loss of use or blindness of one eye, having only light perception, will be held to exist when there is inability to recognize test letters at 1 foot (.30m.) and when further examination of the eyes reveals that perception of objects, hand movements or counting fingers cannot be accomplished at 3 feet (.91m.), lesser extents of visions, particularly perception of objects, hand movements, or counting fingers at distances less than 3 feet (.91 m.), being considered of negligible utility. With visual acuity 5/200 (1.5/60) or less or the visual field reduced to 5° concentric contraction, in either event in both eyes, the question of entitlement on account of regular aid and attendance will be determined on the facts in the individual case.

[43 FR 45354, Oct. 2, 1978]

$\S 4.80$ Rating of one eye.

Combined ratings for disabilities of the same eye should not exceed the amount for total loss of vision of that eye unless there is an enucleation or a serious cosmetic defect added to the total loss of vision.

§§ 4.81-4.82 [Reserved]

§4.83 Ratings at scheduled steps and distances.

In applying the ratings for impairment of visual acuity, a person not having the ability to read at any one of the scheduled steps or distances, but reading at the next scheduled step or distance, is to be rated as reading at this latter step or distance. That is, a person who can read at 20/100 (6/30) but who cannot at 20/70 (6/21), should be rated as seeing at 20/100 (6/30).

[41 FR 34257, Aug. 13, 1976, as amended at 43 FR 45354, Oct. 2, 1978]

\$4.83a Impairment of central visual acuity.

The percentage evaluation will be found from table V by intersecting the horizontal row appropriate for the Snellen index for one eye and the vertical column appropriate to the Snellen index of the other eye. For example, if one eye has a Snellen index of 5/200 (1.5/60) and the other eye has a Snellen index of 20/70 (6/21), the percentage evaluation is found in the third horizontal row from the bottom and the fourth vertical column from the left. The evaluation is 50 percent and the diagnostic code 6073.

[41 FR 11297, Mar. 18, 1976, as amended at 43 FR 45354, Oct. 2, 1978]

§ 4.84 Differences between distant and near visual acuity.

Where there is a substantial difference between the near and distant corrected vision, the case should be referred to the Director, Compensation and Pension Service.

[40 FR 42537, Sept. 15, 1975]

RATINGS FOR IMPAIRMENT OF FIELD VISION

| Rat- |
|------|

6080 Field vision, impairment of: Homonymous hemianopsia .. Field, visual, loss of temporal half: Bilateral Unilateral Or rate as 20/70 (6/21). Field, visual, loss of nasal half: Bilateral Unilateral

Field, visual, concentric contraction of: Bilateral Unilateral

Or rate as 20/50 (6/15).

Or rate as 5/200 (1.5/60). To 15° but not to 5°: Bilateral . Unilateral Or rate as 20/200 (6/60).

To 30° but not to 15°: Bilateral Unilateral

Or rate as 20/100 (6/30). To 45° but not to 30°: Bilateral

Or rate as 20/70 (6/21): To 60° but not to 45°: Bilateral

Unilateral

Unilateral Or rate as 20/50 (6/15).

Note (1): Correct diagnosis reflecting disease or injury should be cited.. Note (2): Demonstrable pathology commensu-

rate with the functional loss will be required. The concentric contraction ratings require contraction within the stated degrees, temporally; the nasal contraction may be less. The alternative ratings are to be employed when there is ratable defect of visual acuity, or a different impairment of the visual field in the other eye. Concentric contraction resulting from demonstrable pathology to 5 degrees or less will be considered on a parity with reduction of central visual acuity to 5/200 (1.5/60) or less for all purposes including entitlement under \$3.350(b)(2) of this chapter; not however, for the purpose of §3.350(a) of this chapter. Entitlement on account of blindness requiring regular aid and attendance, §3.350(c) of this chapter, will continue to be determined on the facts in the individual case. 6081 Scotoma, pathological, unilateral:

RATINGS FOR IMPAIRMENT OF FIELD VISION-Continued

| | Rat- ing |
|---|-------------|
| Large or centrally located, minimum NOTE: Rate on loss of central visual acuity or impairment of field vision. Do not combine with any other rating for visual impairment. | 10 |

RATINGS FOR IMPAIRMENT OF MUSCLE FUNCTION [6090 Diplopia (double vision)]

| Degree of diplopia | Equiva- lent visual acuity |
|--|-------------------------------------|
| (a) Central 20°(b) 21° to 30°: | 5/200 |
| (1) Down | 15/200 |
| (2) Lateral | 20/100 |
| (3) Up | 20/70 |
| (c) 31° to 40°: | |
| (1) Down | 20/200 |
| (2) Lateral | 20/70 |
| (3) Up | 20/40 |
| Note: (4) Correct diamentic reflection diament | |

Note: (1) Correct diagnosis reflecting disease or injury should be cited ..

Note: (2) The above ratings will be applied to only one eye. Ratings will not be applied for both diplopia and decreased visual acuity or field of vision in the same eye. When diplopia is present and there is also ratable impairment of visual acuity or field of vision of both eyes the above diplopia ratings will be applied to the poorer eye while the better eye is rated according to the best corrected visual acuity or visual

Note: (3) When the diplopia field extends beyond more than one quadrant or more than one range of degrees, the evaluation for diplopia will be based on the quadrant and degree range that provide the highest evaluation..

Note: (4) When diplopia exists in two individual and separate areas of the same eye, the equivalent visual acuity will be taken one step worse, but no worse than 5/200..

6091 Symblepharon.

Rate as limited muscle function, diagnostic code

6092 Diplopia, due to limited muscle function.. Rate as diagnostic code 6090...

 ⁵ Also entitled to special monthly compensation.
 ⁶Add 10 percent if artificial eye cannot be worn; also entitled to special monthly compensation.

[29 FR 6718, May 22, 1964, as amended at 34 FR 5062, Mar. 11, 1969; 40 FR 42537, Sept. 15, 1975; 41 FR 11297, Mar. 18, 1976; 43 FR 45354, Oct. 2, 1978; 51 FR 6411, Feb. 24, 1986; 53 FR 30264, Aug. 11, 1988; 53 FR 50955, Dec. 19, 1988; 57 FR 24364, June 9, 1992]

IMPAIRMENT OF AUDITORY ACUITY

§ 4.85 Evaluation of hearing impairment.

- (a) An examination for hearing impairment for VA purposes must be conducted by a state-licensed audiologist and must include a controlled speech discrimination test (Maryland CNC) and a puretone audiometry test. Examinations will be conducted without the use of hearing aids.
- (b) Table VI, "Numeric Designation of Hearing Impairment Based on Puretone Threshold Average and Speech Discrimination," is used to determine a Roman numeral designation (I through XI) for hearing impairment based on a combination of the percent of speech discrimination (horizontal rows) and the puretone threshold average (vertical columns). The Roman numeral designation is located at the point where the percentage of speech discrimination and puretone threshold average intersect.
- (c) Table VIa, "Numeric Designation of Hearing Impairment Based Only on Puretone Threshold Average," is used to determine a Roman numeral designation (I through XI) for hearing impairment based only on the puretone threshold average. Table VIa will be used when the examiner certifies that

use of the speech discrimination test is not appropriate because of language difficulties, inconsistent speech discrimination scores, etc., or when indicated under the provisions of §4.86.

- (d) "Puretone threshold average," as used in Tables VI and VIa, is the sum of the puretone thresholds at 1000, 2000, 3000 and 4000 Hertz, divided by four. This average is used in all cases (including those in §4.86) to determine the Roman numeral designation for hearing impairment from Table VI or VIa.
- (e) Table VII, "Percentage Evaluations for Hearing Impairment," is used to determine the percentage evaluation by combining the Roman numeral designations for hearing impairment of each ear. The horizontal rows represent the ear having the better hearing and the vertical columns the ear having the poorer hearing. The percentage evaluation is located at the point where the row and column intersect.
- (f) If impaired hearing is service-connected in only one ear, in order to determine the percentage evaluation from Table VII, the non-service-connected ear will be assigned a Roman Numeral designation for hearing impairment of I, subject to the provisions of § 3.383 of this chapter.
- (g) When evaluating any claim for impaired hearing, refer to §3.350 of this chapter to determine whether the veteran may be entitled to special monthly compensation due either to deafness, or to deafness in combination with other specified disabilities.
 - (h) Numeric tables VI, VIA*, and VII.

^{*} Review for entitlement to special monthly compensation under §3.350 of this chapter.

[64 FR 25206, May 11, 1999]

§ 4.86 Exceptional patterns of hearing impairment.

(a) When the puretone threshold at each of the four specified frequencies (1000, 2000, 3000, and 4000 Hertz) is 55 decibels or more, the rating specialist will determine the Roman numeral designation for hearing impairment from either Table VI or Table VIa, whichever results in the higher numeral. Each ear will be evaluated separately.

(b) When the puretone threshold is 30 decibels or less at 1000 Hertz, and 70 decibels or more at 2000 Hertz, the rating specialist will determine the Roman numeral designation for hearing impairment from either Table VI or Table VIa, whichever results in the higher numeral. That numeral will then be elevated to the next higher

Roman numeral. Each ear will be evaluated separately.

INFECTIOUS DISEASES, IMMUNE DIS-ORDERS AND NUTRITIONAL DEFI-CIENCIES

§4.88 [Reserved]

§4.88a Chronic fatigue syndrome.

- (a) For VA purposes, the diagnosis of chronic fatigue syndrome requires:
- (1) new onset of debilitating fatigue severe enough to reduce daily activity to less than 50 percent of the usual level for at least six months; and
- (2) the exclusion, by history, physical examination, and laboratory tests, of all other clinical conditions that may produce similar symptoms; and
 - (3) six or more of the following:
 - (i) acute onset of the condition,
 - (ii) low grade fever,
 - (iii) nonexudative pharyngitis,
- (iv) palpable or tender cervical or axillary lymph nodes,
- (v) generalized muscle aches or weakness,
- (vi) fatigue lasting 24 hours or longer after exercise,

[61 FR 39875, July 31, 1996]

§ 4.88c Ratings for inactive nonpulmonary tuberculosis initially entitled after August 19, 1968.

| | Rat- ing |
|--|-------------|
| For 1 year after date of inactivity, following active tu- berculosis | 100 |
| Thereafter: Rate residuals under the specific body system or systems affected. | |

Following the total rating for the 1 year period after date of inactivity, the schedular evaluation for residuals of nonpulmonary tuberculosis, i.e., ankylosis, surgical removal of a part, etc., will be assigned under the appropriate diagnostic code for the residual preceded by the diagnostic code for tuberculosis of the body part affected. For example, tuberculosis of the hip joint with residual ankylosis would be coded 5001–5250. Where there are existing residuals of pulmonary and nonpulmonary conditions, the evaluations for residual separate functional impairment may be combined.

Where there are existing pulmonary and nonpulmonary conditions, the total rating for the 1 year, after attainment of inactivity, may not be applied to both conditions during the same period. However, the total rating during the 1-year period for the pulmonary or for the nonpulmonary condition will be utilized, combined with evaluation for residuals of the condition not covered by the 1-year total evaluation, so as to allow any additional benefit provided during such period.

[34 FR 5062, Mar. 11, 1969. Redesignated at 59 FR 60902, Nov. 29, 1994]

§ 4.89 Ratings for inactive nonpulmonary tuberculosis in effect on August 19, 1968.

Public Law 90-493 repealed section 356 of title 38, United States Code which provided graduated ratings for inactive tuberculosis. The repealed section, however, still applies to the case of any veteran who on August 19, 1968, was receiving or entitled to receive compensation for tuberculosis. The use of the protective provisions of Pub. L. 90-493 should be mentioned in the discussion portion of all ratings in which these provisions are applied. For use in rating cases in which the protective provisions of Pub. L. 90-493 apply, the former evaluations are retained in this section.

| | Rat- ing |
|---|-------------|
| For 2 years after date of inactivity, following active tuberculosis, which was clinically identified during | |
| service or subsequently | 100 |
| Thereafter, for 4 years, or in any event, to 6 years after date of inactivity | 50 |
| Thereafter, for 5 years, or to 11 years after date of inactivity | 30 |
| Thereafter, in the absence of a schedular compensable permanent residual | , |

Following the total rating for the 2-year period after date of inactivity, the schedular evaluation for residuals of nonpulmonary tuberculosis, i.e., ankylosis, surgical removal of a part, etc., if in excess of 50 percent or 30 percent will be assigned under the appropriate diagnostic code for the specific residual preceded by the diagnostic code for tuberculosis of the body part affected. For example, tuberculosis of the hipjoint with residual ankylosis would be coded 5001–5250.

The graduated ratings for nonpulmonary tuberculosis will not be combined with residuals of nonpulmonary tuberculosis unless the graduated rating and the rating for residual disability cover separate functional losses, e.g., graduated ratings for tuberculosis of the kidney and residuals of tuberculosis of the spine. Where there are existing pulmonary and nonpulmonary conditions, the graduated evaluation for the pulmonary, or for the nonpulmonary, condition will be utilized, combined with evaluations for residuals of the condition not covered by the graduated evaluation utilized, so as to provide the higher evaluation over such period.

The ending dates of all graduated ratings of nonpulmonary tuberculosis will be controlled by the date of attainment of inactivity.

These ratings are applicable only to veterans with nonpulmonary tuberculosis active on or after October 10, 1949.

[29 FR 6718, May 22, 1964, as amended at 34 FR 5062, Mar. 11, 1969; 43 FR 45361, Oct. 2, 1978]

THE RESPIRATORY SYSTEM

§ 4.96 Special provisions regarding evaluation of respiratory conditions.

(a) Rating coexisting respiratory conditions. Ratings under diagnostic codes 6600 through 6817 and 6822 through 6847 will not be combined with each other. Where there is lung or pleural involvement, ratings under diagnostic codes 6819 and 6820 will not be combined with each other or with diagnostic codes 6600 through 6817 or 6822 through 6847. A single rating will be assigned under the diagnostic code which reflects the predominant disability with elevation to the next higher evaluation where the severity of the overall disability warrants such elevation. However, in cases protected by the provisions of Pub. L. 90-493, the graduated ratings of 50 and 30 percent for inactive tuberculosis will not be elevated.

(b) Rating "protected" tuberculosis cases. Public Law 90-493 repealed section 356 of title 38, United States Code which had provided graduated ratings for inactive tuberculosis. The repealed

section, however, still applies to the case of any veteran who on August 19, 1968, was receiving or entitled to receive compensation for tuberculosis. The use of the protective provisions of Pub. L. 90–493 should be mentioned in the discussion portion of all ratings in which these provisions are applied. For application in rating cases in which the protective provisions of Pub. L. 90–493 apply the former evaluations pertaining to pulmonary tuberculosis are retained in §4.97.

(c) Special monthly compensation. When evaluating any claim involving complete organic aphonia, refer to §3.350 of this chapter to determine

whether the veteran may be entitled to special monthly compensation. Footnotes in the schedule indicate conditions which potentially establish entitlement to special monthly compensation; however, there are other conditions in this section which under certain circumstances also establish entitlement to special monthly compensation.

| DISEASES OF THE LUNGS AND PLEURA—TUBERCULOSIS Ratings for Pulmonary Tuberculosis Entitled on August 19, 1968 | |
| | 10 |
| 701 Tuberculosis, pulmonary, chronic, far advanced, active | 10 |
| 703 Tuberculosis, pulmonary, chronic, minimal, active | 10 |
| Tuberculosis, pulmonary, chronic, active, advancement unspecified | 10 |
| 1721 Tuberculosis, pulmonary, chronic, far advanced, inactive. | |
| 723 Tuberculosis, pulmonary, chronic, minimal, inactive. | |
| 724 Tuberculosis, pulmonary, chronic, inactive, advancement unspecified. | |
| General Rating Formula for Inactive Pulmonary Tuberculosis: For two years after date of inactivity, following active tuberculosis, which was clinically identified during service or subsequently | 10 |
| Thereafter for four years, or in any event, to six years after date of inactivity | 5 |
| Thereafter, for five years, or to eleven years after date of inactivity | 3 |
| Following far advanced lesions diagnosed at any time while the disease process was active, minimum | 3 |
| Following moderately advanced lesions, provided there is continued disability, emphysema, dyspnea on exertion, impairment of health, etc | 2 |
| Otherwise | _ |
| Note (1): The 100-percent rating under codes 6701 through 6724 is not subject to a requirement of precedent hospital | |
| treatment. It will be reduced to 50 percent for failure to submit to examination or to follow prescribed treatment upon | |
| report to that effect from the medical authorities. When a veteran is placed on the 100-percent rating for inactive tu- berculosis, the medical authorities will be appropriately notified of the fact, and of the necessity, as given in footnote | |
| 1 to 38 U.S.C. 1156 (and formerly in 38 U.S.C. 356, which has been repealed by Public Law 90–493), to notify the | |
| Adjudication Division in the event of failure to submit to examination or to follow treatment. | |
| Note (2): The graduated 50-percent and 30-percent ratings and the permanent 30 percent and 20 percent ratings for | |
| inactive pulmonary tuberculosis are not to be combined with ratings for other respiratory disabilities. Following thoracoplasty the rating will be for removal of ribs combined with the rating for collapsed lung. Resection of the ribs | |
| incident to thoracoplasty will be rated as removal. | |
| Ratings for Pulmonary Tuberculosis Initially Evaluated After August 19, 1968 | |
| | |
| 730 Tuberculosis, pulmonary, chronic, active | 10 |
| Note: Active pulmonary tuberculosis will be considered permanently and totally disabling for non-service-connected pension purposes in the following circumstances: | |
| (a) Associated with active tuberculosis involving other than the respiratory system. | |
| (b) With severe associated symptoms or with extensive cavity formation. | |
| (c) Reactivated cases, generally. (d) With advancement of lesions on successive examinations or while under treatment. | |
| (e) Without retrogression of lesions or other evidence of material improvement at the end of six months hos- | |
| pitalization or without change of diagnosis from "active" at the end of 12 months hospitalization. Material | |
| improvement means lessening or absence of clinical symptoms, and X-ray findings of a stationary or retro- | |
| gressive lesion. | |
| 5731 Tuberculosis, pulmonary, chronic, inactive: Depending on the specific findings, rate residuals as interstitial lung disease, restrictive lung disease, or, when ob- | |
| structive lung disease is the major residual, as chronic bronchitis (DC 6600). Rate thoracoplasty as removal of | |
| ribs under DC 5297. | |
| Note: A mandatory examination will be requested immediately following notification that active tuberculosis evalu- | |
| ated under DC 6730 has become inactive. Any change in evaluation will be carried out under the provisions of §3.105(e). | |
| 6732 Pleurisy, tuberculous, active or inactive: | |
| Rate under §§ 4.88c or 4.89, whichever is appropriate. | |
| NONTUBERCULOUS DISEASES | |
| 817 Pulmonary Vascular Disease: | |
| Primary pulmonary hypertension, or; chronic pulmonary thromboembolism with evidence of pulmonary hypertension, right ventricular hypertrophy, or cor pulmonale, or; pulmonary hypertension secondary to other obstruc- | |
| tive disease of pulmonary arteries or veins with evidence of right ventricular hypertrophy or cor pulmonale | 10 |
| Chronic pulmonary thromboembolism requiring anticoagulant therapy, or; following inferior vena cava surgery with- | |
| out evidence of pulmonary hypertension or right ventricular dysfunction | 6 |
| | 3 |
| Symptomatic, following resolution of acute pulmonary embolism | |
| Asymptomatic, following resolution of pulmonary thromboembolism | |
| | |

Note: A rating of 100 percent shall continue beyond the cessation of any surgical, X-ray, antineoplastic chemotherapy or other therapeutic procedure. Six months after discontinuance of such treatment, the appropriate disability rating shall be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of §3.105(e) of this chapter. If there has been no local recurrence or metastasis, rate on residuals.

6820 Neoplasms, benign, any specified part of respiratory system. Evaluate using an appropriate respiratory analogy.

Bacterial Infections of the Lung

- 6822 Actinomycosis.
- 6823 Nocardiosis
- 6824 Chronic lung abscess.

General Rating Formula for Bacterial Infections of the Lung (diagnostic codes 6822 through 6824):

Active infection with systemic symptoms such as fever, night sweats, weight loss, or hemoptysis Depending on the specific findings, rate residuals as interstitial lung disease, restrictive lung disease, or, when ob-

structive lung disease is the major residual, as chronic bronchitis (DC 6600).

Interstitial Lung Disease

- 6825 Diffuse interstitial fibrosis (interstitial pneumonitis, fibrosing alveolitis).
- 6826 Desquamative interstitial pneumonitis.
- 6827 Pulmonary alveolar proteinosis
- 6828 Eosinophilic granuloma of lung.
- 6829 Drug-induced pulmonary pneumonitis and fibrosis.
- Radiation-induced pulmonary pneumonitis and fibrosis 6830
- 6831 Hypersensitivity pneumonitis (extrinsic allergic alveolitis).
- 6832 Pneumoconiosis (silicosis, anthracosis, etc.).
- 6833 Asbestosis.

General Rating Formula for Interstitial Lung Disease (diagnostic codes 6825 through 6833):

Forced Vital Capacity (FVC) less than 50-percent predicted, or; Diffusion Capacity of the Lung for Carbon Monoxide by the Single Breath Method (DLCO (SB)) less than 40-percent predicted, or; maximum exercise capacity less than 15 ml/kg/min oxygen consumption with cardiorespiratory limitation, or; cor pulmonale or pulmonary hypertension, or; requires outpatient oxygen therapy

FVC of 50- to 64-percent predicted, or; DLCO (SB) of 40- to 55-percent predicted, or; maximum exercise capacity of 15 to 20 ml/kg/min oxygen consumption with cardiorespiratory limitation . FVC of 65- to 74-percent predicted, or; DLCO (SB) of 56- to 65-percent predicted FVC of 75- to 80-percent predicted, or; DLCO (SB) of 66- to 80-percent predicted ...

Mycotic Lung Disease

- 6834 Histoplasmosis of lung.
- 6835 Coccidioidomycosis. 6836 Blastomycosis.
- 6837 Cryptococcosis
- 6838 Aspergillosis
- 6839 Mucormycosis

General Rating Formula for Mycotic Lung Disease (diagnostic codes 6834 through 6839):

Chronic pulmonary mycosis with persistent fever, weight loss, night sweats, or massive hemoptysis Chronic pulmonary mycosis requiring suppressive therapy with no more than minimal symptoms such as occasional minor hemoptysis or productive cough .

Chronic pulmonary mycosis with minimal symptoms such as occasional minor hemoptysis or productive

Healed and inactive mycotic lesions, asymptomatic

Note: Coccidioidomycosis has an incubation period up to 21 days, and the disseminated phase is ordinarily manifest within six months of the primary phase. However, there are instances of dissemination delayed up to many years after the initial infection which may have been unrecognized. Accordingly, when service connection is under consideration in the absence of record or other evidence of the disease in service, service in southwestern United States where the disease is endemic and absence of prolonged residence in this locality before or after service will be the deciding factor.

Restrictive Lung Disease

- 6840 Diaphragm paralysis or paresis.
- Spinal cord injury with respiratory insufficiency.
- Kyphoscoliosis, pectus excavatum, pectus carinatum.
- Traumatic chest wall defect, pneumothorax, hernia, etc.
- Post-surgical residual (lobectomy, pneumonectomy, etc.).
- 6845 Chronic pleural effusion or fibrosis.

38 CFR Ch. I (7-1-02 Edition)

| | Rating |
|---|----------------------|
| General Rating Formula for Restrictive Lung Disease (diagnostic codes 6840 through 6845): FEV-1 less than 40 percent of predicted value, or; the ratio of Forced Expiratory Volume in one second to Forced Vital Capacity (FEV-1/FVC) less than 40 percent, or; Diffusion Capacity of the Lung for Carbon Monoxide by the Single Breath Method (DLCO (SB)) less than 40-percent predicted, or; maximum exercise capacity less than 15 ml/kg/min oxygen consumption (with cardiac or respiratory limitation), or; cor pulmonale (right heart failure), or; right ventricular hypertrophy, or; pulmonary hypertension (shown by Echo or cardiac catheterization), or; episode(s) of acute respiratory failure, or; requires outpatient oxygen therapy FEV-1 of 40- to 55-percent predicted, or; FEV-1/FVC of 40 to 55 percent, or; DLCO (SB) of 40- to 55-percent predicted, or; maximum oxygen consumption of 15 to 20 ml/kg/min (with cardiorespiratory limit) | 100 60 30 |
| FEV-1 of 71- to 80-percent predicted, or; FEV-1/FVC of 71 to 80 percent, or; DLCO (SB) 66- to 80-percent predicted | 10 |
| Or rate primary disorder. Note (1): A 100-percent rating shall be assigned for pleurisy with empyema, with or without pleurocutaneous fistula, until resolved. | |
| Note (2): Following episodes of total spontaneous pneumothorax, a rating of 100 percent shall be assigned as of the date of hospital admission and shall continue for three months from the first day of the month after hospital discharge. | |
| Note (3): Gunshot wounds of the pleural cavity with bullet or missile retained in lung, pain or discomfort on exertion, or with scattered rales or some limitation of excursion of diaphragm or of lower chest expansion shall be rated at least 20-percent disabling. Disabling injuries of shoulder girdle muscles (Groups I to IV) shall be separately rated and combined with ratings for respiratory involvement. Involvement of Muscle Group XXI (DC 5321), however, will not be separately rated. | |
| 6846 Sarcoidosis: Cor pulmonale, or; cardiac involvement with congestive heart failure, or; progressive pulmonary disease with fever, night sweats, and weight loss despite treatment Pulmonary involvement requiring systemic high dose (therapeutic) corticosteroids for control Pulmonary involvement with persistent symptoms requiring chronic low dose (maintenance) or intermittent corticosteroids | 100 60 30 |
| Chronic hilar adenopathy or stable lung infiltrates without symptoms or physiologic impairment | 0 |
| 6847 Sleep Apnea Syndromes (Obstructive, Central, Mixed): Chronic respiratory failure with carbon dioxide retention or cor pulmonale, or; requires tracheostomy Requires use of breathing assistance device such as continuous airway pressure (CPAP) machine Persistent day-time hypersomnolence Asymptomatic but with documented sleep disorder breathing | 100 50 30 0 |

THE CARDIOVASCULAR SYSTEM

§§ 4.100-4.103 [Reserved]

§4.104 Schedule of ratings—cardiovascular system.

DISEASES OF THE HEART

| | Rat- ing | - |
|-------------------------------------|------------------|---|
| NOTE (1): Evaluate cor pulmonale wh | ich is a form of | |

NOTE (1): Evaluate cor pulmonale, which is a form of secondary heart disease, as part of the pulmonary condition that causes it.

| | Rat- ing |
|--|-------------|
| NOTE (2): One MET (metabolic equivalent) is the energy cost of standing quietly at rest and represents an oxygen uptake of 3.5 milliliters per kilogram of body weight per minute. When the level of METs at which dyspnea, fatigue, angina, dizziness, or syncope develops is required for evaluation, and a laboratory determination of METs by exercise testing cannot be done for medical reasons, an estimation by a medical examiner of the level of activity (expressed in METs and supported by specific examples, such as slow stair climbing or shoveling snow) that results in dyspnea, fatigue, angina, dizziness, or syncope may be used. 7000 Valvular heart disease (including rheumatic heart disease): | |
| During active infection with valvular heart damage and for three months following cessation of therapy for the active infec- | 400 |

| Characteristic attacks occurring at least daily Characteristic attacks occurring four to six | 40 | and fatigue in leg after prolonged standing or walking, with symptoms relieved by | |
| times a week | 20 | elevation of extremity or compression hosiery | 10 |
| times a week | 10 | veins | 0 |

DISEASES OF THE HEART—Continued

Rating

| NOTE: These evaluations are for involvement of |
|--|
| single extremity. If more than one extremity is in |
| volved, evaluate each extremity separately an |
| combine (under §4.25), using the bilateral factor |
| (§ 4.26), if applicable. |

7121 Post-phlebitic syndrome of any etiology:
With the following findings attributed to venous disease:

Massive board-like edema with constant pain at rest

Persistent edema or subcutaneous induration, stasis pigmentation or eczema, and persistent ulceration.....

Persistent edema and stasis pigmentation or eczema, with or without intermittent ulceration

Intermittent edema of extremity or aching and fatigue in leg after prolonged standing or walking, with symptoms relieved by elevation of extremity or compression hosiery

NOTE: These evaluations are for involvement of a single extremity. If more than one extremity is involved, evaluate each extremity separately and combine (under §4.25), using the bilateral factor (\$4.26). If applicable.

7122 Cold injury residuals:

With the following in affected parts:

Arthralgia or other pain, numbness, or cold sensitivity plus two or more of the following: tissue loss, nail abnormalities, color changes, locally impaired sensation, hyperhidrosis, X-ray abnormalities (osteoporosis, subarticular punched out lesions, or osteoarthritis)

Arthralgia or other pain, numbness, or cold sensitivity plus tissue loss, nail abnormalities, color changes, locally impaired sensation, hyperhidrosis, or X-ray abnormalities (osteoporosis, subarticular punched out lesions, or osteoarthritis)

Arthralgia or other pain, numbness, or cold sensitivity

NOTE (1): Separately evaluate amputations of fingers or toes, and complications such as squamous cell carcinoma at the site of a cold injury scar or peripheral neuropathy, under other diagnostic codes. Separately evaluate other disabilities that have been diagnosed as the residual effects of cold injury, such as Raynaud's phenomenon, muscle atrophy, etc., unless they are used to support an evaluation under diagnostic code 7122.

NOTE (2): Evaluate each affected part (e.g., hand, foot, ear, nose) separately and combine the ratings in accordance with §§ 4.25 and 4.26.

7123 Soft tissue sarcoma (of vascular origin)

DISEASES OF THE HEART—Continued

| | Rat- ing |
|---|-------------|
| Note: A rating of 100 percent shall continue beyond the cessation of any surgical, X-ray, antineoplastic chemotherapy or other therapeutic procedure. Six months after discontinuance of such treatment, the appropriate disability rating shall be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of §3.105(e) of this chapter. If there has been no local recurrence or metastasis, rate on residuals. | |

(Authority: 38 U.S.C. 1155)

60 [62 FR 65219, Dec. 11, 1997, as amended at 63 FR 37779, July 14, 1998]

THE DIGESTIVE SYSTEM

§4.110 Ulcers.

Experience has shown that the term "peptic ulcer" is not sufficiently specific for rating purposes. Manifest differences in ulcers of the stomach or duodenum in comparison with those at an anastomotic stoma are sufficiently recognized as to warrant two separate graduated descriptions. In evaluating the ulcer, care should be taken that the findings adequately identify the particular location.

§4.111 Postgastrectomy syndromes.

There are various postgastrectomy symptoms which may occur following anastomotic operations of the stomach. When present, those occurring during or immediately after eating and known as the "dumping syndrome" are characterized by gastrointestinal complaints and generalized symptoms simulating hypoglycemia; those occurring from 1 to 3 hours after eating usually present definite manifestations of hypoglycemia.

§ 4.112 Weight loss.

For purposes of evaluating conditions in §4.114, the term "substantial weight loss" means a loss of greater than 20 percent of the individual's baseline weight, sustained for three months or longer; and the term "minor weight loss" means a weight loss of 10 to 20 percent of the individual's baseline weight, sustained for three months or longer. The term "inability to gain weight" means that there has been substantial weight loss with inability

to regain it despite appropriate therapy. "Baseline weight" means the average weight for the two-year-period preceding onset of the disease.

(Authority: 38 U.S.C. 1155) [66 FR 29488, May 31, 2001]

§ 4.113 Coexisting abdominal conditions.

There are diseases of the digestive system, particularly within the abdomen, which, while differing in the site of pathology, produce a common disability picture characterized in the main by varying degrees of abdominal distress or pain, anemia and disturbances in nutrition. Consequently, certain coexisting diseases in this area, as indicated in the instruction under the title "Diseases of the Digestive System," do not lend themselves to distinct and separate disability evaluations without violating the fundaprinciple relating pyramiding as outlined in §4.14.

§ 4.114 Schedule of ratings—digestive system.

Ratings under diagnostic codes 7301 to 7329, inclusive, 7331, 7342, and 7345 to 7348 inclusive will not be combined with each other. A single evaluation will be assigned under the diagnostic code which reflects the predominant disability picture, with elevation to the next higher evaluation where the severity of the overall disability warrants such elevation.

7351 Liver transplant:

this chapter.

NOTE: A rating of 100 percent shall be assigned as of the date of hospital admission for transplant surgery and shall continue. One year following discharge, the appropriate disability rating shall be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of §3.105(e) of

7354 Hepatitis C (or non-A, non-B hepatitis):

With serologic evidence of hepatitis C infection and the following signs and symptoms due to hepatitis C infection:

Near-constant debilitating symptoms (such as fatigue, malaise, nausea, vomiting, anorexia, arthralgia, and right upper quadrant pain)

Daily fatigue, malaise, and anorexia, with substantial weight loss (or other indication of malnutrition), and hepatomegaly, or; incapacitating episodes (with symptoms such as fatigue, malaise, nausea, vomiting, anorexia, arthralgia, and right upper quadrant pain) having a total duration of at least six weeks during the past 12-month period, but not occurring constantly

Daily fatigue, malaise, and anorexia, with minor weight loss and hepatomegaly, or; incapacitating episodes (with symptoms such as fatigue, malaise, nausea, vomiting, anorexia, arthralgia, and right upper quadrant pain) having a total duration of at least four weeks, but less than six weeks, during the past 12-month period

FR 5063, Mar. 11, 1969; 40 FR 42540, Sept. 15, 1975; 41 FR 11301, Mar. 18, 1976; 66 FR 29488, May 31, 2001]

THE GENITOURINARY SYSTEM

§4.115 Nephritis.

Albuminuria alone is not nephritis, nor will the presence of transient albumin and casts following acute febrile illness be taken as nephritis. The glomerular type of nephritis is usually preceded by or associated with severe infectious disease; the onset is sudden, and the course marked by red blood cells, salt retention, and edema; it may clear up entirely or progress to a chronic condition. The nephrosclerotic type, originating in hypertension or arteriosclerosis, develops slowly, with minimum laboratory findings, and is associated with natural progress. Separate ratings are not to be assigned for disability from disease of the heart and any form of nephritis, on account of the close interrelationships of cardiovascular disabilities. If, however, absence of a kidney is the sole renal disability, even if removal was required because of nephritis, the absent kidney and any hypertension or heart disease will be separately rated. Also, in the

event that chronic renal disease has progressed to the point where regular dialysis is required, any coexisting hypertension or heart disease will be separately rated.

 $[41\ FR\ 34258,\ Aug.\ 13,\ 1976,\ as\ amended\ at\ 59\ FR\ 2527,\ Jan.\ 18,\ 1994]$

§4.115a Ratings of the genitourinary system—dysfunctions.

Diseases of the genitourinary system generally result in disabilities related to renal or voiding dysfunctions, infections, or a combination of these. The following section provides descriptions of various levels of disability in each of these symptom areas. Where diagnostic codes refer the decisionmaker to these specific areas dysfunction, only the predominant area of dysfunction shall be considered for rating purposes. Since the areas of dysfunction described below do not cover all symptoms resulting from genitourinary diseases, specific diagnoses may include a description of symptoms assigned to that diagnosis.

| | Rat- ing |
|--|-------------|
| Renal dysfunction: | |
| Requiring regular dialysis, or precluding more than sedentary activity from one of the following: persistent edema and albuminuria; or, BUN more than 80mg%; or, creatinine more than 8mg%; or, markedly decreased function of kidney or other organ systems, estpecially cardiovascular | 100 |
| 80mg%; or, creatinine 4 to 8mg%; or, general- ized poor health characterized by lethargy, weakness, anorexia, weight loss, or limitation of | 80 |
| exertion | 80 |
| nostic code 7101 | 60 |
| disabling under diagnostic code 7101 | 30 |
| nostic code 7101Voiding dysfunction: | 0 |
| Rate particular condition as urine leakage, fre- quency, or obstructed voiding Continual Urine Leakage, Post Surgical Urinary Di- version, Urinary Incontinence, or Stress Inconti- nence: | |
| Requiring the use of an appliance or the wearing of absorbent materials which must be changed | |
| more than 4 times per day Requiring the wearing of absorbent materials | 60 |
| which must be changed 2 to 4 times per day Requiring the wearing of absorbent materials which must be changed less than 2 times per | 40 |
| day | 20 |

| | Rat- ing |
|--|-------------|
| Urinary frequency: | |
| Daytime voiding interval less than one hour, or; awakening to void five or more times per night Daytime voiding interval between one and two hours, or; awakening to void three to four times | 40 |
| per night | 20 |
| Daytime voiding interval between two and three hours, or; awakening to void two times per night | 10 |
| Obstructed voiding: Urinary retention requiring intermittent or continuous catheterization | 30 |
| Marked obstructive symptomatology (hesitancy, slow or weak stream, decreased force of stream) with any one or combination of the following: 1. Post void residuals greater than 150 cc. 2. Uroflowmetry; markedly diminished peak flow rate (less than 10 cc/sec). | |
| Recurrent urinary tract infections secondary to obstruction. | |
| Stricture disease requiring periodic dilatation every 2 to 3 months | 10 |
| Obstructive symptomatology with or without stricture disease requiring dilatation 1 to 2 times per year | 0 |
| Urninary tract infection: | |
| Poor renal function: Rate as renal dysfunction. | |
| Recurrent symptomatic infection requiring drain- age/frequent hospitalization (greater than two times/year), and/or requiring continuous inten- sive management | 30 |
| Long-term drug therapy, 1–2 hospitalizations per year and/or requiring intermittent intensive man- | 30 |

| week, but less than daily, requiring wearing of pad | 60 |
| week requiring wearing of pad | 30 |

| Rating | |
|----------------|--|
| 1 | Vaginal fecal leakage less than once a week |
| | Without leakage |
| 10 | Multiple urethrovaginal fistulae |
| | Requiring the use of an appliance or the wear- |
| 6 | ing of absorbent materials which must be changed more than four times per day |
| 0 | Requiring the wearing of absorbent materials |
| | which must be changed two to four times per |
| 4 | day |
| | Requiring the wearing of absorbent materials which must be changed less than two times |
| 2 | per day |
| | 7626 Breast, surgery of: |
| 10 | Following radical mastectomy: |
| 18 15 | Both One |
| Ū | Following modified radical mastectomy: |
| 16 | Both |
| 14 | One |
| | Following simple mastectomy or wide local ex- cision with significant alteration of size or |
| | form: |
| ¹ 5 | Both |
| 13 | One |
| | Following wide local excision without significant alteration of size or form: |
| | Both or one |
| | Note: For VA purposes: |
| | (1) Radical mastectomy means removal of |
| | the entire breast, underlying pectoral muscles, and regional lymph nodes up |
| | to the coracoclavicular ligament |
| | (2) Modified radical mastectomy means re- |
| | moval of the entire breast and axillary |
| | lymph nodes (in continuity with the breast). Pectoral muscles are left intact |
| | (3) Simple (or total) mastectomy means re- |
| | moval of all of the breast tissue, nipple, |
| | and a small portion of the overlying skin, |
| | but lymph nodes and muscles are left intact |
| | (4) Wide local excision (including partial |
| | mastectomy, lumpectomy, tylectomy, |
| | segmentectomy, and quadrantectomy) means removal of a portion of the breast |
| | tissue |
| | 7627 Malignant neoplasms of gynecological sys- |
| 10 | Note: A rating of 100 percent shall continue |
| | Note: A rating of 100 percent shall continue beyond the cessation of any surgical, X-ray, |
| | antineoplastic chemotherapy or other thera- |
| | peutic procedure. Six months after dis- |
| | continuance of such treatment, the appro- |
| | priate disability rating shall be determined by mandatory VA examination. Any change in |
| | evaluation based upon that or any subse- |
| | quent examination shall be subject to the |
| | provisions of §3.105(e) of this chapter. If |
| | there has been no local recurrence or metas- tasis, rate on residuals. |
| | 7628 Benign neoplasms of the gynecological sys- |
| | tem or breast. Rate according to impairment in |
| | function of the urinary or gynecological systems, |
| | or skin. 7629 Endometriosis: |
| | Lesions involving bowel or bladder confirmed |
| | by laparoscopy, pelvic pain or heavy or irreg- |
| | ular bleeding not controlled by treatment, and |
| | bowel or bladder symptoms |
| 5 | |
| 5 3 | Pelvic pain or heavy or irregular bleeding not |
| | |

| | Rating |
|---|--------|

THE HEMIC AND LYMPHATIC SYSTEMS

§ 4.117 Schedule of ratings—hemic and lymphatic systems.

| | Rating |
|---|----------|
| 7700 Anemia, hypochromic-microcytic and megaloblastic, such as iron-deficiency and per-nicious anemia: | |
| Hemoglobin 5gm/100ml or less, with findings such as high output congestive heart failure or dyspnea at rest | 100 |
| Hemoglobin 7gm/100ml or less, with findings such as dyspnea on mild exertion, cardio- megaly, tachycardia (100 to 120 beats per | |
| minute) or syncope (three episodes in the last six months) | 70 |
| Hemoglobin 8gm/100ml or less, with findings such as weakness, easy fatigability, head- aches, lightheadedness, or shortness of | |
| breath | 30 |
| Hemoglobin 10gm/100ml or less with findings such as weakness, easy fatigability or head- | |
| aches Hemoglobin 10gm/100ml or less, asymptomatic | 10 0 |
| NOTE: Evaluate complications of pernicious anemia, | |
| dementia or peripheral neuropathy, separately. | |
| 7702 Agranulocytosis, acute: | |
| Requiring bone marrow transplant, or; requiring transfusion of platelets or red cells at least once every six weeks, or; infections recurring | |
| at least once every six weeks | 100 |
| least once every three months, or; infections | |
| recurring at least once every three months | 60 |
| Requiring transfusion of platelets or red cells at least once per year but less than once every three months, or; infections recurring at least once per year but less than once every three | |
| months | 30 |
| Requiring continuous medication for control | 10 |
| NOTE: The 100 percent rating for bone marrow tra | ansplant |

NOTE: The 100 percent rating for bone marrow transplant shall be assigned as of the date of hospital admission and shall continue with a mandatory VA examination six months following hospital discharge. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of §3.105(e) of this chapter.

| 7703 Le | ukemia: | | | | | |
|---------|---------|---------|----|--------|---|-----------|
| With | active | disease | or | during | а | treatment |
| pha | ase | | | | | |

| | Ratir |
|---|-------|
| Otherwise rate as anemia (code 7700) or aplastic anemia (code 7716), whichever would result in the greater benefit. | |

NOTE: The 100 percent rating shall continue beyond the cessation of any surgical, radiation, antineoplastic chemotherapy or other therapeutic procedures. Six months after discontinuance of such treatment, the appropriate disability rating shall be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of §3.105(e) of this chapter. If there has been no recurrence, rate on residuals.

| 7704 Polycythemia vera: | |
|---|-----------|
| During periods of treatment with myelosuppressants and for three months fol- lowing cessation of myelosuppressant ther- | |
| apy | 100 |
| Requiring phlebotomy | |
| Stable, with or without continuous medication | 10 |
| NOTE: Rate complications such as hypertension, good or thrombotic disease separately. | t, stroke |
| 7705 Thrombocytopenia, primary, idiopathic or immune: | |
| Platelet count of less than 20,000, with active | |
| bleeding, requiring treatment with medication | |
| and transfusions | 100 |
| Platelet count between 20,000 and 70,000, not | |
| requiring treatment, without bleeding | 70 |
| Stable platelet count between 70,000 and | |
| 100,000, without bleeding | 30 |
| Stable platelet count of 100,000 or more, with- | |
| out bleeding | 0 |
| 7706 Splenectomy | 20 |
| NOTE: Rate complications such as systemic infecti encapsulated bacteria separately. | ons with |
| 7707 Spleen, injury of, healed. | |
| Rate for any residuals. | |
| 7709 Hodgkin's disease: | |
| With active disease or during a treatment | |
| | 1 |

NOTE: The 100 percent rating shall continue beyond the cessation of any surgical, radiation, antineoplastic chemotherapy or other therapeutic procedures. Six months after discontinuance of such treatment, the appropriate disability rating shall be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of §3.105(e) of this chapter. If there has been no local recurrence or metastasis, rate on residuals.

7710 Adenitis, tuberculous, active or inactive.
 Rate under §§ 4.88c or 4.89 of this part, whichever is appropriate.
 7714 Sickle cell anemia:

With repeated painful crises, occurring in skin, joints, bones or any major organs caused by hemolysis and sickling of red blood cells, with anemia, thrombosis and infarction, with symptoms precluding even light manual labor With painful crises several times a year or with symptoms precluding other than light manual labor

100

60

30

10

NOTE: Sickle cell trait alone, without a history of directly attributable pathological findings, is not a ratable disability. Cases of symptomatic sickle cell trait will be forwarded to the Director, Compensation and Pension Service, for consideration under §3.321(b)(1) of this chapter.

THE SKIN

§4.118 Schedule of ratings—skin.

| | Rat- ing |
|---|---------------------|
| 7800 Scars, disfiguring, head, face or neck: Complete or exceptionally repugnant deformity of one side of face or marked or repugnant bilateral disfigurement Severe, especially if producing a marked and unsightly deformity of eyelids, lips, or auricles Moderate; disfiguring Slight NOTE: When in addition to tissue loss and cicatrization there is marked discoloration, color contrast, or the like, the 50 percent rating under Code 7800 may be increased to 80 percent, the 30 percent to 50 percent, and the 10 percent to 30 percent. The most repugnant, disfiguring conditions, including scars and diseases of the skin, may be submitted for central office rating, with several unretouched photographs. | 50 30 10 0 |
| 7801 Scars, burns, third degree: Area or areas exceeding 1 square foot (0.1 m.²) | 40 |
| Area or areas exceeding one-half square foot (0.05 m.²) | 30 |
| cm.2) | 20 |
| cm.2) | 10 |

| | ing |
|---|----------|
| NOTE (1): Actual third degree residual involve- ment required to the extent shown under 7801. | |
| NOTE (2): Ratings for widely separated areas, as on two or more extremities or on anterior and posterior surfaces of extremities or trunk, will be separately rated and combined. | |
| 7802 Scars, burns, second degree: Area or areas approximating 1 square foot (0.1 m.²) | 10 |
| NOTE: See NOTE (2) under diagnostic code 7801. 7803 Scars, superficial, poorly nourished, with re- | |
| peated ulceration | 10 10 |
| Note: The 10 percent rating will be assigned, when the requirements are met, even though the location may be on tip of finger or toe, and the rating may exceed the amputation value for the limited involvement. 7805 Scars, other. | 10 |
| Rate on limitation of function of part affected. 7806 Eczema: With ulceration or extensive exfoliation or crust- | |
| ing, and systemic or nervous manifestations, or exceptionally repugnant | 50 |
| With exudation or itching constant, extensive le- sions, or marked disfigurement | 30 |
| an exposed surface or extensive area With slight, if any, exfoliation, exudation or | 10 |
| itching, if on a nonexposed surface or small area | 0 |
| sore). 7809 Lupus erythematosus, discoid. (Not to be combined with ratings under diagnostic code 6350.) 7810 Pinta. | |
| 7811 Tuberculosis luposa (lupus vulgaris), active or inactive: | |
| Active | 100 |
| Rate scars, disfigurement, etc., on the extent of constitutional symptoms, physical impairment. 7819 New growths, benign, skin. Rate as scars, disfigurement, etc. | |
| Unless otherwise provided, rate codes 7807 through 7819 as for eczema, dependent upon location, extent, and repugnant or otherwise disabling character of manifestations. NOTE: The most repugnant conditions may be submitted for central office rating with several unretouched photographs. Total disability ratings may be assigned without reference to Central Office in the most severe cases of pemphigus and dermatitis exfoliativa with constitutional symptoms. | |

| | Rat- ing | | Rat- ing |
|---|-------------|---|-------------|
| IOTE (1): An Addisonian "crisis" consists of the rapid onset of peripheral vascular collapse (with acute hypotension and shock), with findings that may include: anorexia; nausea; vomiting; dehydration; profound weakness; pain in abdomen, legs, and back; fever; apathy, and depressed mentation with possible progression to coma, renal shutdown, and death. IOTE (2): An Addisonian "episode," for VA purposes, is a less acute and less severe event than an Addisonian crisis and may consist of anorexia, nausea, vomiting, diarrhea, dehydration, weakness, malaise, orthostatic hypotension, or hypoglycemia, but no peripheral vascular collapse. IOTE (3): Tuberculous Addison's disease will be evaluated as active or inactive tuberculosis. If in- | | 7918 Pheochromocytoma (benign or malignant) NOTE: Evaluate diagnostic codes 7916, 7917, and 7918 as malignant or benign neoplasm as appro- priate. 7919 C-cell hyperplasia of the thyroid NOTE: A rating of 100 percent shall continue beyond the cessation of any surgical, X-ray, antineoplastic chemotherapy or other therapeutic procedure. Six months after discontinuance of such treatment, the appropriate disability rating shall be deter- mined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of § 3.105(e) of this chapter. If there has been no local recurrence or metastasis, rate on residuals. | 100 |

[61 FR 20446, May 7, 1996]

NEUROLOGICAL CONDITIONS AND CONVULSIVE DISORDERS

§4.120 Evaluations by comparison.

Disability in this field is ordinarily to be rated in proportion to the impairment of motor, sensory or mental function. Consider especially psychotic manifestations, complete or partial loss of use of one or more extremities, speech disturbances, impairment of vision, disturbances of gait, tremors, visceral manifestations, injury to the skull, etc. In rating disability from the conditions in the preceding sentence refer to the appropriate schedule. In rating peripheral nerve injuries and their residuals, attention should be given to the site and character of the injury, the relative impairment in motor function, trophic changes, or sensory disturbances.

§4.121 Identification of epilepsy.

When there is doubt as to the true nature of epileptiform attacks, neurological observation in a hospital adequate to make such a study is necessary. To warrant a rating for epilepsy, the seizures must be witnessed or verified at some time by a physician. As to frequency, competent, consistent lay testimony emphasizing convulsive and immediate post-convulsive characteristics may be accepted. The frequency of seizures should ascertained under the ordinary conditions of life (while not hospitalized).

Ν active, these evaluations are not to be combined with the graduated ratings of 50 percent or 30 percent for non-pulmonary tuberculosis specified under § 4.88b. Assign the higher rating.

7912 Pluriglandular syndrome

Evaluate according to major manifestations.

7913 Diabetes mellitus

Requiring more than one daily injection of insulin, restricted diet, and regulation of activities (avoidance of strenuous occupational and recreational activities) with episodes of ketoacidosis or hypoglycemic reactions requiring at least three hospitalizations per year or weekly visits to a diabetic care provider, plus either progressive loss of weight and strength or complications that would be compensable if separately evaluated

Requiring insulin, restricted diet, and regulation of activities with episodes of ketoacidosis or hypoglycemic reactions requiring one or two hospitalizations per year or twice a month visits to a diabetic care provider, plus complications that would not be compensable if separately evaluated Requiring insulin, restricted diet, and regulation of

activities .. Requiring insulin and restricted diet, or; oral hypoglycemic agent and restricted diet

Manageable by restricted diet only ...

NOTE (1): Evaluate compensable complications of diabetes separately unless they are part of the criteria used to support a 100 percent evaluation. Noncompensable complications are considered part of the diabetic process under diagnostic code 7913.

NOTE (2): When diabetes mellitus has been conclusively diagnosed, do not request a glucose tolerance test solely for rating purposes.

7914 Neoplasm, malignant, any specified part of the endocrine system

Note: A rating of 100 percent shall continue beyond the cessation of any surgical, X-ray, antineoplastic chemotherapy or other therapeutic procedure. Six months after discontinuance of such treatment. the appropriate disability rating shall be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of §3.105(e) of this chapter. If there has been no local recurrence or metastasis, rate on residuals.

7915 Neoplasm, benign, any specified part of the endocrine system rate as residuals of endocrine dysfunction.

7916 Hyperpituitarism (prolactin secreting pituitary

7917 Hyperaldosteronism (benign or malignant)

40

20

§4.122 Psychomotor epilepsy.

The term psychomotor epilepsy refers to a condition that is characterized by seizures and not uncommonly by a chronic psychiatric disturbance as well

(a) Psychomotor seizures consist of episodic alterations in conscious control that may be associated with automatic states, generalized convulsions. random motor movements (chewing, lip smacking, fumbling), hallucinatory phenomena (involving taste, smell, sound, vision), perceptual illusions (deja vu, feelings of loneliness, strangeness, macropsia, micropsia, dreamy states), alterations in thinking (not open to reason), alterations in memory, abnormalities of mood or affect (fear, alarm, terror, anger, dread, wellbeing), and autonomic disturbances (sweating, pallor, flushing of the face, visceral phenomena such as nausea, vomiting, defecation, a rising feeling of warmth in the abdomen). Automatic states or automatisms are characterized by episodes of irrational, irrelevant, disjointed, unconventional, asocial, purposeless though seemingly coordinated and purposeful, confused or inappropriate activity of one to several minutes (or, infrequently, hours) duration with subsequent amnesia for the seizure. Examples: A person of high social standing remained seated, muttered angrily, and rubbed the arms of his chair while the National Anthem was being played; an apparently normal person suddenly disrobed in public; a man traded an expensive automobile for an antiquated automobile in poor mechanical condition and after regaining conscious control, discovered that he had signed an agreement to pay an additional sum of money in the trade. The seizure manifestations of psychomotor epilepsy vary from patient to patient and in the same patient from seizure to seizure.

(b) A chronic mental disorder is not uncommon as an interseizure manifestation of psychomotor epilepsy and may include psychiatric disturbances extending from minimal anxiety to severe personality disorder (as distinguished from developmental) or almost complete personality disintegration (psychosis). The manifestations of a chronic mental disorder associated

with psychomotor epilepsy, like those of the seizures, are protean in character.

§4.123 Neuritis, cranial or peripheral.

Neuritis, cranial or peripheral, characterized by loss of reflexes, muscle atrophy, sensory disturbances, and constant pain, at times excruciating, is to be rated on the scale provided for injury of the nerve involved, with a maximum equal to severe, incomplete, paralysis. See nerve involved for diagnostic code number and rating. The maximum rating which may be assigned for neuritis not characterized by organic changes referred to in this section will be that for moderate, or with sciatic nerve involvement, for moderately severe, incomplete paralysis.

§4.124 Neuralgia, cranial or peripheral.

Neuralgia, cranial or peripheral, characterized usually by a dull and intermittent pain, of typical distribution so as to identify the nerve, is to be rated on the same scale, with a maximum equal to moderate incomplete paralysis. See nerve involved for diagnostic code number and rating. Tic douloureux, or trifacial neuralgia, may be rated up to complete paralysis of the affected nerve.

§4.124a Schedule of ratings—neurological conditions and convulsive disorders.

[With the exceptions noted, disability from the following diseases and their residuals may be rated from 10 percent to 100 percent in proportion to the impairment of motor, sensory, or mental function. Consider especially psychotic manifestations, complete or partial loss of use of one or more extremities, speech disturbances, impairment of vision, disturbances of gait, tremors, visceral manifestations, etc., referring to the appropriate bodily system of the schedule. With partial loss of use of one or more extremities from neurological lesions, rate by comparison with the mild, moderate, severe, or complete paralysis of peripheral nerves1

Minimum rating ..

8025 Myasthenia gravis: Minimum rating

ORGANIC DISEASES OF THE CENTRAL NERVOUS SYSTEM—Continued

| | Rat- ing |
|---|-------------|
| NOTE: It is required for the minimum ratings for residuals under diagnostic codes 8000–8025, that there be ascertainable residuals. Determinations as to the presence of residuals not capable of objective verification, i.e., headaches, dizziness, fatigability, must be approached on the basis of the diagnosis recorded; subjective residuals will be accepted when consistent with the disease and not more likely attributable to other disease or no disease. It is of exceptional importance that when ratings in excess of the prescribed minimum ratings are assigned, the diagnostic codes utilized as bases of evaluation be cited, in addition to the codes identifying the diagnoses. | |
| Purely neurological disabilities, such as hemiplegia, epileptiform seizures, facial nerve paralysis, etc., following trauma to the brain, will be rated under the diagnostic codes specifically dealing with such disabilities, with citation of a hyphenated diagnostic code (e.g., 8045– | |
| 8207). Purely subjective complaints such as headache, dizziness, insomnia, etc., recognized as symptomatic of brain trauma, will be rated 10 percent and no more under diagnostic code 9304. This 10 percent rating will not be combined with any other rating for a disability due to brain trauma. Ratings in excess of 10 percent for brain disease due to trauma under diagnostic code 9304 are not assignable in the absence of a diagnosis of multi-infarct dementia associated with brain trauma. | |
| 8046 Cerebral arteriosclerosis: Purely neurological disabilities, such as hemiplegia, cranial nerve paralysis, etc., due to cerebral arteriosclerosis will be rated under the diagnostic codes dealing with such specific disabilities, with citation of a hyphenated diagnostic code (e.g., 8046–8207). | |
| Purely subjective complaints such as headache, dizziness, tinnitus, insomnia and irritability, recognized as symptomatic of a properly diagnosed cerebral arteriosclerosis, will be rated 10 percent and no more under diagnostic code 9305. This 10 percent rating will not be combined with any other rating for a disability due to cerebral or generalized arteriosclerosis. Ratings in excess of 10 percent for cerebral arteriosclerosis under diagnostic code 9305 are not assignable in the absence of a diagnosis of multi-infarct dementia with cerebral arteriosclerosis. | |
| NOTE: The ratings under code 8046 apply only when the diagnosis of cerebral arteriosclerosis is substantiated by the entire clinical picture and not solely on findings of retinal arteriosclerosis. | |

| origi | in) | 100 |
| Not | E. The 100 percent rating will be co | ntinued |

NOTE: The 100 percent rating will be continued for 6 months following the cessation of surgical, X-ray, antineoplastic chemotherapy or other therapeutic procedure. At this point, if there has been no local recurrence or metastases, the rating will be made on residuals.

| THE EPILEPSIES |
|--|
| |
| A thorough study of all material in §§ 4.121 and 4.122 of the preface and under the ratings for epilepsy is necessary prior to any rating action. 8910 Epilepsy, grand mal. Rate under the general rating formula for major seizures. 8911 Epilepsy, petit mal. Rate under the general rating formula for minor seizures. NOTE (1): A major seizure is characterized by the generalized tonic-clonic convulsion with unconsciousness. NOTE (2): A minor seizure consists of a brief interruption in consciousness or conscious control associated with staring or rhythmic blinking of the eyes or nodding of the head ("pure" petit mal), or sudden jerking movements of the arms, trunk, or head (myoclonic type) or sudden loss of postural control (akinetic type). General Rating Formula for Major and Minor Epileptic Seizures: Averaging at least 1 major seizure per month over the last year; or more than 10 minor seizures weekly. Averaging at least 1 major seizure in 4 months over the last year; or 9-10 minor seizures weekly At least 1 major seizure in the last 6 months or 2 in the last 9ear; or averaging at least 5 to 8 minor seizures weekly. At least 1 major seizure in the last 2 years; or at least 2 minor seizures in the last 2 years; or at least 2 minor seizures in the last 6 months A confirmed diagnosis of epilepsy with a history of seizures. |

| THE EPILEPSIES—Continued | |
|---|-------------|
| | Rat- ing |
| NOTE (1): When continuous medication is shown necessary for the control of epilepsy, the minimum evaluation will be 10 percent. This rating will not be combined with any other rating for epilepsy. NOTE (2): In the presence of major and minor seizures, rate the predominating type. NOTE (3): There will be no distinction between diurnal and nocturnal major seizures. 8912 Epilepsy, Jacksonian and focal motor or sensory. 8913 Epilepsy, diencephalic. Rate as minor seizures, except in the presence of major and minor seizures, rate the predominating type. 8914 Epilepsy, psychomotor. | |
| Major seizures: Psychomotor seizures will be rated as major seizures under the general rating formula when characterized by automatic states and/or generalized convulsions with unconsciousness. Minor seizures: Psychomotor seizures will be rated as minor seizures under the general rating formula when characterized by brief transient episodes of random motor movements, hallucinations, perceptual illusions, abnormalities of thinking, memory or mood, or autonomic disturbances. | |

Mental Disorders in Epilepsies: A nonpsychotic organic brain syndrome will be rated separately under the appropriate diagnostic code (e.g., 9304 or 9307). In the absence of a diagnostic code (e.g., 9304 or 9307). In the absence of a diagnostic of non-psychotic organic psychiatric disturbance (psychotic, psychoneurotic or personality disorder) if diagnosed and shown to be secondary to or directly associated with epilepsy will be rated separately. The psychotic or psychroneurotic disorder will be rated under the appropriate diagnostic code. The personality disorder will be rated as a dementia (e.g., diagnostic code 9304 or 9307). Epilepsy and Unemployability: (1) Rating specialists must bear in mind that the epileptic, although his or her seizures are controlled, may find employment and rehabilitation difficult of attainment due to employer reluctance to the hiring of the epileptic.

are controlled, may find employment and renabilitation difficult attainment due to employer reluctance to the hiring of the epileptic.

(2) Where a case is encountered with a definite history of unemployment, full and complete development should be undertaken to ascertain whether the epilepsy is the determining factor in his or her inability to obtain employment.

(3) The assent of the claimant should first be obtained for permission to conduct this economic and social survey. The purpose of this survey is to secure all the relevant facts and data necessary to permit of a true judgment as to the reason for his or her unemployment and should include information as to:

(a) Education;
(b) Occupations prior and subsequent to service;
(c) Places of employment and reasons for termination;
(d) Wages received;
(e) Number of seizures.
(4) Upon completion of this survey and current examination, the case should have rating board consideration. Where in the judgment of the rating board the veteran's unemployability is due to epilepsy and jurisdiction is not vested in that body by reason of schedular evaluations, the case should be submitted to the Director, Compensation and Pension Service.

Rat-

ing

MENTAL DISORDERS

§ 4.125 Diagnosis of mental disorders.

(a) If the diagnosis of a mental disorder does not conform to DSM-IV or is not supported by the findings on the examination report, the rating agency shall return the report to the examiner to substantiate the diagnosis.

(b) If the diagnosis of a mental disorder is changed, the rating agency shall determine whether the new diagnosis represents progression of the prior diagnosis, correction of an error in the prior diagnosis, or development of a new and separate condition. If it is not clear from the available records what the change of diagnosis represents, the rating agency shall return the report to the examiner for a determination.

(Authority: 38 U.S.C. 1155) [61 FR 52700, Oct. 8, 1996]

§ 4.126 Evaluation of disability from mental disorders.

(a) When evaluating a mental disorder, the rating agency shall consider the frequency, severity, and duration of psychiatric symptoms, the length of remissions, and the veteran's capacity for adjustment during periods of remission. The rating agency shall assign an evaluation based on all the evidence of record that bears on occupational and social impairment rather than solely on the examiner's assessment of the level of disability at the moment of the examination.

(b) When evaluating the level of disability from a mental disorder, the rating agency will consider the extent of social impairment, but shall not assign an evaluation solely on the basis of social impairment.

(c) Delirium, dementia, and amnestic and other cognitive disorders shall be evaluated under the general rating formula for mental disorders; neurologic deficits or other impairments stemming from the same etiology (e.g., a head injury) shall be evaluated separately and combined with the evaluation for delirium, dementia, or amnestic or other cognitive disorder (see §4.25).

(d) When a single disability has been diagnosed both as a physical condition

and as a mental disorder, the rating agency shall evaluate it using a diagnostic code which represents the dominant (more disabling) aspect of the condition (see § 4.14).

(Authority: 38 U.S.C. 1155) [61 FR 52700, Oct. 8, 1996]

§ 4.127 Mental retardation and personality disorders.

Mental retardation and personality disorders are not diseases or injuries for compensation purposes, and, except as provided in §3.310(a) of this chapter, disability resulting from them may not be service-connected. However, disability resulting from a mental disorder that is superimposed upon mental retardation or a personality disorder may be service-connected.

(Authority: 38 U.S.C. 1155) [61 FR 52700, Oct. 8, 1996]

§ 4.128 Convalescence ratings following extended hospitalization.

If a mental disorder has been assigned a total evaluation due to a continuous period of hospitalization lasting six months or more, the rating agency shall continue the total evaluation indefinitely and schedule a mandatory examination six months after the veteran is discharged or released to nonbed care. A change in evaluation based on that or any subsequent examination shall be subject to the provisions of §3.105(e) of this chapter.

(Authority: 38 U.S.C. 1155) [61 FR 52700, Oct. 8, 1996]

§4.129 Mental disorders due to traumatic stress.

When a mental disorder that develops in service as a result of a highly stressful event is severe enough to bring about the veteran's release from active military service, the rating agency shall assign an evaluation of not less than 50 percent and schedule an examination within the six month period following the veteran's discharge to determine whether a change in evaluation is warranted.

(Authority: 38 U.S.C. 1155) [61 FR 52700, Oct. 8, 1996]

§4.130

§ 4.130 Schedule of ratings—mental disorders.

The nomenclature employed in this portion of the rating schedule is based upon the Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition, of the American Psychiatric

Association (DSM–IV). Rating agencies must be thoroughly familiar with this manual to properly implement the directives in §4.125 through §4.129 and to apply the general rating formula for mental disorders in §4.130. The schedule for rating for mental disorders is set forth as follows:

| | | Rating |
|------|--|--------|
| | Schizophrenia and Other Psychotic Disorders | |
| 9201 | Schizophrenia, disorganized type | |
| 9202 | Schizophrenia, catatonic type | |
| 9203 | | |
| | Schizophrenia, undifferentiated type | |
| | Schizophrenia, residual type; other and unspecified types | |
| | Delusional disorder | |
| | Psychotic disorder, not otherwise specified (atypical psychosis) Schizoaffective disorder | |
| | Delirium, Dementia, and Amnestic and Other Cognitive Disorders | |
| 9300 | Delirium | |
| | Dementia due to infection (HIV infection, syphilis, or other systemic or intracranial infections) | |
| | Dementia due to head trauma | |
| | Vascular dementia | |
| | Dementia of unknown etiology | |
| | Dementia of the Alzheimer's type | |
| | Dementia due to other neurologic or general medical conditions (endocrine disorders, metabolic disorders, | |
| | c's disease, brain tumors, etc.) or that are substance-induced (drugs, alcohol, poisons) Organic mental disorder, other (including personality change due to a general medical condition) | |
| | Anxiety Disorders | |
| 9400 | Generalized anxiety disorder | |
| 9403 | | |
| | Obsessive compulsive disorder | |
| | Other and unspecified neurosis | |
| 9411 | Post-traumatic stress disorder | |
| | Panic disorder and/or agoraphobia | |
| 9413 | Anxiety disorder, not otherwise specified | |
| | Dissociative Disorders | |
| | Dissociative amnesia; dissociative fugue; dissociative identity disorder (multiple personality disorder) Depersonalization disorder | |
| | Somatoform Disorders | |
| 9421 | | |
| | Pain disorder | |
| | Undifferentiated somatoform disorder | |
| | Conversion disorder | |
| 9425 | Hypochondriasis | |
| | Mood Disorders | |
| | Cyclothymic disorder | |
| | Bipolar disorder | |
| | Dysthymic disorder | |
| | Major depressive disorder | |
| 1435 | Mood disorder, not otherwise specified | |
| | Chronic Adjustment Disorder | |
| 9440 | Chronic adjustment disorder | |

§4.130

| | Rating |
|--|--------|
| General Rating Formula for Mental Disorders: Total occupational and social impairment, due to such symptoms as: gross impairment in thought proc- | |
| esses or communication; persistent delusions or hallucinations; grossly inappropriate behavior; per- sistent danger of hurting self or others; intermittent inability to perform activities of daily living (including maintenance of minimal personal hygiene); disorientation to time or place; memory loss for names of close relatives, own occupation, or own name | 100 |
| Occupational and social impairment, with deficiencies in most areas, such as work, school, family relations, judgment, thinking, or mood, due to such symptoms as: suicidal ideation; obsessional rituals which interfere with routine activities; speech intermittently illogical, obscure, or irrelevant; near-continuous panic or depression affecting the ability to function independently, appropriately and effectively; impaired impulse control (such as unprovoked irritability with periods of violence); spatial disorientation; | 100 |
| neglect of personal appearance and hygiene; difficulty in adapting to stressful circumstances (including work or a worklike setting); inability to establish and maintain effective relationships Occupational and social impairment with reduced reliability and productivity due to such symptoms as: | 70 |
| flattened affect; circumstantial, circumlocutory, or stereotyped speech; panic attacks more than once a week; difficulty in understanding complex commands; impairment of short- and long-term memory (e.g., retention of only highly learned material, forgetting to complete tasks); impaired judgment; impaired abstract thinking; disturbances of motivation and mood; difficulty in establishing and maintaining effective work and social relationships | 50 |
| Occupational and social impairment with occasional decrease in work efficiency and intermittent periods of inability to perform occupational tasks (although generally functioning satisfactorily, with routine behavior, self-care, and conversation normal), due to such symptoms as: depressed mood, anxiety, sus- | 00 |
| piciousness, panic attacks (weekly or less often), chronic sleep impairment, mild memory loss (such as forgetting names, directions, recent events) | 30 |
| and ability to perform occupational tasks only during periods of significant stress, or; symptoms controlled by continuous medication A mental condition has been formally diagnosed, but symptoms are not severe enough either to interfere | 10 |
| with occupational and social functioning or to require continuous medication | C |
| Eating Disorders | |
| 520 Anorexia nervosa 521 Bulimia nervosa | |
| Rating Formula for Eating Disorders: | |
| Self-induced weight loss to less than 80 percent of expected minimum weight, with incapacitating epi- sodes of at least six weeks total duration per year, and requiring hospitalization more than twice a year for parenteral nutrition or tube feeding | 100 |
| Self-induced weight loss to less than 85 percent of expected minimum weight with incapacitating episodes of six or more weeks total duration per year | 60 |
| Self-induced weight loss to less than 85 percent of expected minimum weight with incapacitating episodes of more than two but less than six weeks total duration per year | 30 |
| Binge eating followed by self-induced vomiting or other measures to prevent weight gain, or resistance to weight gain even when below expected minimum weight, with diagnosis of an eating disorder and in- | 4.6 |
| capacitating episodes of up to two weeks total duration per year Binge eating followed by self-induced vomiting or other measures to prevent weight gain, or resistance to weight gain even when below expected minimum weight, with diagnosis of an eating disorder but with- | 10 |
| out incapacitating episodes | C |

Note: An incapacitating episode is a period during which bed rest and treatment by a physician are required.

§4.149

DENTAL AND ORAL CONDITIONS

§4.149 [Reserved]

\$4.150 Schedule of ratings—dental and oral conditions.

| | Rat- ing |
|--|-------------|
| 9900 Maxilla or mandible, chronic osteomyelitis or | |
| osteoradionecrosis of: | |
| Rate as osteomyelitis, chronic under diagnostic code 5000. | |
| 9901 Mandible, loss of, complete, between angles | 100 |
| 9902 Mandible, loss of approximately one-half: | |
| Involving temporomandibular articulation | 50 |
| Not involving temporomandibular articulation | 30 |
| 9903 Mandible, nonunion of: | |
| Severe | 30 10 |
| Moderate Note—Dependent upon degree of motion and | 10 |
| relative loss of masticatory function. | |
| 9904 Mandible, malunion of: | |
| Severe displacement | 20 |
| Moderate displacement | 10 |
| Slight displacement | 0 |
| NOTE—Dependent upon degree of motion and | |
| relative loss of masticatory function. 9905 Temporomandibular articulation, limited mo- | |
| tion of: | |
| Inter-incisal range: | |
| 0 to 10 mm | 40 |
| 11 to 20 mm | 30 |
| 21 to 30 mm | 20 |
| 31 to 40 mm | 10 |
| Range of lateral excursion: | 4.0 |
| 0 to 4 mm | 10 |
| NOTE—Ratings for limited inter-incisal movement shall not be combined with ratings for limited | |
| lateral excursion. | |
| 9906 Ramus, loss of whole or part of: | |
| Involving loss of temporomandibular articulation | |
| Bilateral | 50 |
| Unilateral | 30 |
| Not involving loss of temporomandibular articula- | |
| tion | 30 |
| Bilateral Unilateral | 20 |
| 9907 Ramus, loss of less than one-half the sub- | 20 |
| stance of, not involving loss of continuity: | |
| Bilateral | 20 |
| Unilateral | 10 |
| 9908 Condyloid process, loss of, one or both sides | 30 |
| 9909 Coronoid process, loss of: | |
| Bilateral | 20 10 |
| Unilateral9911 Hard palate, loss of half or more: | 10 |
| Not replaceable by prosthesis | 30 |
| Replaceable by prosthesis | 10 |
| 9912 Hard palate, loss of less than half of: | |
| Not replaceable by prosthesis | 20 |
| Replaceable by prosthesis | 0 |
| 9913 Teeth, loss of, due to loss of substance of | |
| body of maxilla or mandible without loss of con- | |
| tinuity: | |
| Where the lost masticatory surface cannot be restored by suitable prosthesis: | |
| Loss of all teeth | 40 |
| Loss of all upper teeth | 30 |
| Loss of all lower teeth | 30 |
| All upper and lower posterior teeth missing | 20 |
| | 20 |
| All upper and lower anterior teeth missing | |
| All upper and lower anterior teeth missing All lower anterior teeth missing All lower anterior teeth missing | 10 10 |

| | Rat- ing |
|---|-------------|
| All upper and lower teeth on one side miss- | |
| ing | 10 |
| Where the loss of masticatory surface can be re- | |
| stored by suitable prosthesis | 0 |
| NOTE—These ratings apply only to bone loss | |
| through trauma or disease such as osteomy- | |
| elitis, and not to the loss of the alveolar proc- | |
| ess as a result of periodontal disease, since | |
| such loss is not considered disabling. | |
| 9914 Maxilla, loss of more than half: | |
| Not replaceable by prosthesis | 100 |
| Replaceable by prosthesis | 50 |
| 9915 Maxilla, loss of half or less: | |
| Loss of 25 to 50 percent: | |
| Not replaceable by prosthesis | 40 |
| Replaceable by prosthesis | 30 |
| Loss of less than 25 percent: | |
| Not replaceable by prosthesis | 20 |
| Replaceable by prosthesis | 0 |
| 9916 Maxilla, malunion or nonunion of: | |
| Severe displacement | 30 |
| Moderate displacement | 10 |
| Slight displacement | 0 |

APPENDIX B TO PART 4—NUMERICAL INDEX OF DISABILITIES

[ACUTE, SUBACUTE, OR CHRONIC DISEASES]

| Diag- nos- tic Code No. | |
|-------------------------------------|---|
| 5000 | Osteomyelitis, acute, subacute, or chronic. |
| 5001 | Bones and Joints, tuberculosis of. |
| 5002 | Arthritis, rheumatoid (atrophic). |
| 5003 | Arthritis, degenerative, hypertrophic, or osteoarthritis. |
| 5004 | Arthritis, gonorrheal. |
| 5005 | Arthritis, pneumococcic. |
| 5006 | Arthritis, typhoid. |
| 5007 | Arthritis, syphilitic. |
| 5008 | Arthritis, streptococcic. |
| 5009 | Arthritis, other types. |
| 5010 | Arthritis, due to trauma. |
| 5011 | Bones, caisson disease of. |
| 5012 | Bones, new growths of, malignant. |

5124 Below insertion of pronator teres. Hand, loss of use of.
Five digits of one hand, amputation of:
Four digits of one hand, amputation of: 5125 5126 Thumb, index, middle and ring. Thumb, index, middle and little. 5127 5128 5129 Thumb, index, ring and little. Thumb, middle, ring and little.
Index, middle, ring and little.
Three digits of one hand, amputation of: 5130 5131 5132 5133 Thumb, index and middle. Thumb, index and ring. Thumb, index and little. 5134 5135 5136 Thumb, middle and ring. Thumb, middle and little. 5137 Thumb, ring and little. 5138 5139 Index, middle and ring. Index, middle and little. 5140 Index, ring and little. 5141 Middle, ring and little.

Two digits of one hand, amputation of: 5142 Thumb and index. 5143 5144 Thumb and middle. Thumb and ring. 5145 Thumb and little. 5146 5147 Index and middle. Index and ring. 5148 Index and little.

Middle and ring. Middle and little.

Ring and little. Thumb, amputation of.

PART 5 [RESERVED]

PART 6—UNITED STATES GOVERNMENT LIFE INSURANCE

Age

Sec.

6.1 Misstatement of age.

PREMIUMS

6.2 Premium rate.

Policies

6.3 Incontestability of United States Government life insurance.

BENEFICIARY OF UNITED STATES GOVERNMENT LIFE INSURANCE

- 6.4 Proof of age, relationship and marriage.
- 6.5 Conditional designation of beneficiary.
- 6.6 Change of beneficiary.
 - 7 Claims of creditors, taxation.

OPTIONAL SETTLEMENT

- 6.8 Selection, revocation and election.
- 6.9 Election of optional settlement by beneficiary.
- 6.10 Options.

DIVIDENDS

- 6.11 How dividends are paid.
- 6.12 Special dividends.

LOANS

6.13 Policy loans.

CASH VALUE

- 6.14 Cash value; other than special endowment at age 96 plan policy.
- 6.15 Cash value; special endowment at age 96 plan policy.
- 6.16 Payment of cash value in monthly installments.

INDEBTEDNESS

6.17 Collection of any indebtedness.

TOTAL PERMANENT DISABILITY BENEFITS

6.18 Other disabilities deemed to be total and permanent.

DEATH BENEFITS

- 6.19 Evidence to establish death of the insured
- DETERMINATION OF LIABILITY UNDER SECTIONS 302 AND 313, WORLD WAR VETERANS' ACT, 1924, SECTIONS 607 AND 602(V)(2), NATIONAL SERVICE LIFE INSURANCE ACT, 1940, AS AMENDED, AND SECTIONS 1921 AND 1957 OF TITLE 38, UNITED STATES CODE
- 6.20 Jurisdiction.

APPEALS

6.21 Guardian: definition and authority.

AUTHORITY: 38 U.S.C. 501, 1940-1963, 1981-1988, unless otherwise noted.

AGE

§ 6.1 Misstatement of age.

If the age of the insured under a United States Government life insurance policy has been understated, the amount of the insurance payable under the policy shall be such exact amount as the premium paid would have purchased at the correct age; if overstated, the excess of premiums paid shall be refunded without interest. Guaranteed surrender and loan values will be modified accordingly. The age of the insured will be admitted by the Department of Veterans Affairs at any time upon satisfactory proof.
