

SURVEILLANCE

TRAINING FOR LAW ENFORCEMENT

*****NEW ADDED COURSE CONTENT*****

- *Aerial Surveillance with Actual Air Support during scenarios!*
- *Case Prep. training provided by seasoned prosecutors*
- *Michigan HIDTA Expert Presenters!*
- *Network with hundreds of other Fortis Group Surveillance Course graduates!*
- *Trusted by Federal, State, and Local law enforcement for years!*

This reality-based training offers one of the most comprehensive surveillance courses of its kind. A cadre of accomplished subject matter experts possessing thousands of hours of surveillance field work have been assembled to share their proven techniques. Innovative training methods combined with advanced technologies makes this 5-day course greatly beneficial to both the new & experienced surveillance operator. Topics covered include:

- Definitions, types and levels of surveillance
- Goals & objectives of surveillance operations
- Terminology, preparation & pre-op planning
- Operational challenges & considerations
- Surveillance methods & detection avoidance techniques
- Effective communication
- Common surveillance pitfalls
- Surveillance equipment & vehicle selection
- Technical surveillance use including GPS tracking
- Proper dress & demeanor
- Environment & proximity awareness
- Cover story considerations & use of props
- Surveillance documentation
- Advanced surveillance equipment demo & workshop

This course involves minimal classroom and extensive reality based training. Scenario exercises progress in complexity and difficulty to achieve the participant's full exposure to the challenges of extended surveillance operations. Practical exercises include vehicle and foot surveillance, low-light operation, GPS unit placement, tracking and removal.
