

Kaspersky® Small Office Security

Always-on security for always-on businesses.

One size doesn't fit all. Smaller businesses face many of the same cyberthreats as large enterprises. But they don't have the same resources to deal with them. And when you're getting by on a tight budget and without a dedicated IT specialist, you don't need the extra bells and whistles that typically come with products designed for larger companies.

Kaspersky Small Office Security is designed specifically for very small businesses. Install in under 10 minutes and protect your business from online attacks, financial fraud, ransomware and data loss. Wherever and whenever you work.

- Set and forget security for 5-25 users
- Protect Windows file servers
- Advanced ransomware protection with server protection and rollback
- Protect Mac and Windows PCs & Laptops
- Secure Android-based mobile devices
- Safe online payments
- File encryption and backup
- Remote task execution
- Vulnerability scan for installed applications.

Easy does it

It takes less than 10 minutes to install Kaspersky Small Office Security. And even less time to manage it. No configuration or set-up required. It's the ultimate set-and-forget solution, without compromising on security.

Say no to cryptolockers and protect sensitive data

87% of very small businesses say data loss or leakage is their top IT security concern*. Backup and encryption enable customers to protect their business from data breaches, fines and lost business. **System Watcher** stops crypto-lockers and ransomware in their tracks. Attempts at malicious encryption trigger automatic backup and restore.

Mind your money

Prevent financial fraud and secure online banking transactions with confidence. The award-winning **Safe Money** protects online banking transactions, while virtual and secure keyboards prevent keyloggers from stealing details.

Stay safe on the move

Kaspersky Lab's mobile security and management technologies mean you're protected when you're on the move – including when employees use their own mobile devices for work. Protect Android smartphones and tablets: lock, wipe and locate missing devices.

Management portal available

- Manage from anywhere through our online portal
- Easy to send installation links to remote users via email
- Remotely manage Kaspersky Lab applications on devices
- Remote lock stolen or missing mobile devices
- Stay up to date on license status and availability
- Easily create tickets to technical support – all from same portal

Do it all from ksos.kaspersky.com – no experience or special skills necessary.

Security you can trust – and we can prove it

69% of very small businesses experienced some form of cybersecurity incident in the past year. No other vendor can match Kaspersky Lab's success record in independent tests. In 2017, Kaspersky Lab products participated in 86 independent tests and reviews. Our products were awarded 72 first and 78 top-three finishes.

Very small business security? No worries.

Kaspersky Small Office Security isn't a pared-down version of an enterprise solution squashed to fit a smaller environment. It's tailor-made security designed specifically for very small businesses. All the security and management ease you need – with none of the fuss.

Feature-rich security, no fuss

Set and forget – cybersecurity anyone can manage

- Install in under 10 minutes
- Out-of-box protection
- Easy to manage online portal and interface – if required
- Easily mail download links to remote users

System watcher for Windows Server – advanced protection against ransomware

- Protect Windows file servers from ransomware and cryptolockers: System Watcher detects and blocks malicious activity, and allows the rollback of malicious actions.

Control web usage – reduce time wasting

- Take control over access to time-wasting or malicious web sites with easy-to-use web controls.

Web and email security

- Protect your business from malicious attempts to hijack your data or network. Automatically block malicious web sites.
- Search for and remove unwanted/unsafe browser extensions.
- Block suspicious downloads.
- Block and filter out spam, phishing mails and mail attachments
- Special "do not track" functionality to monitor and block websites from tracking online behavior.

Protect sensitive data and privacy

- Secure sensitive data and protect your business from data breaches, fines and lost business with **Backup and Encryption**.
- **Data vault** provides password-protected storage on your computer to keep sensitive data away from prying eyes.
- Detect and block unwanted online tracking and secure your webcam from unauthorized access.

Mobile device protection

- Protect Android-based smartphones and tablets from malware
- Remote lock, locate and wipe stolen or lost devices.

Password Management

- Remembers and secures all your passwords – you just have to remember one.
- Create and securely store new passwords for every site you use.

Many other components to keep you safe

- Additional layers of protection include: – file shredder to permanently delete sensitive business data – software updater provides a list of new updates available for installed applications – delete unused or outdated system data.
