2 Add devices to protect

3 Manage weekly for 15 mins (approx.)

Get protected - and keep your business running smoothly

Endpoint protection from the most tested, most awarded* security vendor
Smaller businesses like yours can't always afford or justify investment in an enterprise-level security posture, and this makes you a particularly attractive target for organized cybercriminals. While your organization is working to deliver the best service to your customers, Kaspersky supports you with the best endpoint protection on the market, ensuring your business can continue to flourish in complete cybersafety.

Protect and control all types of devices
Today's businesses rely heavily on information technology to stay ahead of the competition. Regardless of the platforms and types of device you depend on, we'll take care of protecting all your desktops and laptops, servers and mobile devices.

Reduce IT costs and free up resources

Endpoint protection made easy
Forget about time-consuming hardware and software provisioning to run your endpoint protection. With Kaspersky Endpoint Security Cloud, all you need to do is register an account on the web and install the endpoint software, and your business is protected.

Instant protection
We've done all the hard work for you, with security policies developed by our experts. The default security profile is automatically applied to each newly connected device, providing immediate protection. The intuitive management console is easy to use, with no special training required.

Free up finance with monthly subscription
Our Security-as-a-Service approach eliminates all the expense of hardware acquisition, updates and maintenance, as well as software licensing, installation and support. Avoid capital outlay by choosing to pay for security as you consume it, on a month-by-month basis.

---

* Kaspersky has achieved more first places in independent tests than any other security vendor. **www.kaspersky.com/top3**

** With the purchase of Kaspersky Endpoint Security Cloud Plus you also get Kaspersky Security for Microsoft Office 365

Cloud discovery
Reduce the number of uncontrolled cloud IT services on the corporate network, such as:
- File sharing
- Web email
- Social networks
- Messengers
- And much more

Mobile security and management
- **Anti-virus protection** defends against threats, viruses, and other malicious applications in real time.
- **Web protection** blocks access to phishing and malicious websites, and monitors access to websites.
- **Password protection** secures device access with a screen unlock password supporting Face ID and Touch ID.
- **Application and feature controls** restrict inappropriate use of corporate policy apps and mobile device features.
- **Anti-theft** allows you to remotely locate, lock or sound an alarm, or wipe data from a device that's been lost or stolen.
- **Rich capabilities for supervised devices** give businesses greater control over their iOS devices.

Try it now for FREE!
Get your FREE 30-day trial at cloud.kaspersky.com
If you decide to keep Kaspersky Endpoint Security Cloud, just pay for the license and you're all set – no need to redeploy endpoint software.
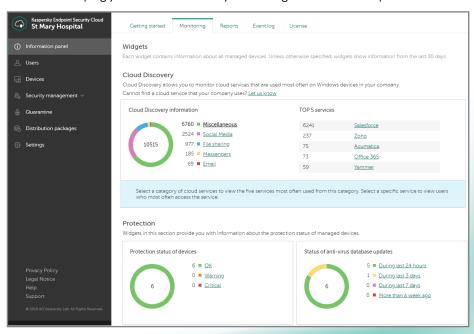

Gain cloud visibility

Discover Shadow IT
Most employees don't see any difference between corporate or public online applications. They may be chatting on instant messengers with clients, sharing corporate data on cloud storage services or spending time on social networks while at work. To predict what cloud software is spread in your organization – and be ready to control it – we have introduced Cloud Discovery.

Enforce restrictions for cloud use
Cloud Discovery lets you reveal and block user access to unsanctioned cloud resources, keeping your data secure and your colleagues focused and productive.
