

Ring Introduces Two New Video Doorbells and Its New, Innovative Pre-Roll Technology, A First-to-Market Feature for Battery-Powered Doorbells

Ring Video Doorbell 3 and Ring Video Doorbell 3 Plus are the latest additions to Ring's Video Doorbell lineup, bringing security and convenience to users' homes.

Pre-Roll gives Ring Video Doorbell 3 Plus users a complete picture of what's happening at their doorstep by capturing four seconds of video before motion is detected.

Both new Video Doorbells include Privacy Zones, which allow users to black out portions of the camera's field-of-view from recording, and audio/motion detection toggles to disable recording as needed.

Ring also announced its next generation Ring Chime and Chime Pro, which enable customers to hear audible Ring notifications throughout their home.

SANTA MONICA, Calif. - March, 11, 2020 - [Ring](#), whose mission is to make neighborhoods safer, today unveiled the new [Ring Video Doorbell 3](#) and [Ring Video Doorbell 3 Plus](#), as well as its new [Pre-Roll](#) feature, making the company the first to offer this kind of technology on a battery-powered video doorbell. Pre-Roll, available exclusively on the all-new Ring Video Doorbell 3 Plus, captures the four seconds before motion is detected to help users see what triggered a motion alert. [Click here](#) for a look at how Ring's Pre-Roll feature works. Ring also announced today the redesigned [Ring Chime](#) and [Chime Pro](#) for users who want to hear their Ring notifications inside their homes. All four new devices are available for pre-order today.

"At Ring, we are continuously pushing the boundaries to bring the most innovative devices and features to our customers," said Jamie Siminoff, Ring's founder and Chief Inventor. "While features similar to Pre-Roll have been available on our wired devices, we believe it is important to also offer this feature to users with a battery-powered Video Doorbell, so that no one ever misses a moment at their doorstep. With Ring Video Doorbell 3 and Ring Video Doorbell 3 Plus, we're excited to continue bringing customers even more home security options, while keeping user privacy and control front and center."

Next Generation Video Doorbells

Ring Video Doorbell 3 and Ring Video Doorbell 3 Plus build upon the great features of the Ring Video Doorbell 2 to now also include a new, adjustable motion zone, called near zone, that can detect motion within five to 15 feet of the front door, as well as enhanced dual-band 2.4Ghz/5Ghz wifi for improved connectivity. Ring Video Doorbell 3 Plus, Ring's premium, battery-powered Video Doorbell, is Ring's first battery device to offer Pre-Roll. With Alexa compatibility, users can simply say, "Alexa, show me the front door," to see their Ring Video Doorbell 3's Live View, or say, "Alexa, answer the front door," to begin speaking with whoever is at their door. And with Linked Devices, available across all Ring products, users can link their doorbell to compatible Ring Cams or Smart Lighting to create an integrated, whole-home security system.

Hear Alerts Loud and Clear

The newly designed Ring Chime and Chime Pro provide customers with audible notifications throughout their homes; and Chime Pro includes a built-in nightlight, as well as a wifi extender to improve and expand wifi connectivity across users' Ring Doorbells and Cams. Both new Chime devices are compatible

with all Ring Doorbells and Cams and provide real-time audio notifications when a Ring device detects motion, or when someone rings the doorbell, ensuring users never miss a moment.

Home Security You Can Control

Privacy, security, and control are foundational to Ring. Ring Video Doorbell 3 and Ring Video Doorbell 3 Plus include Privacy Zones, which allow users to exclude areas of the camera field of view from video recording. Similar to all of Ring's Doorbells and Cams, both the new doorbells feature toggles that allow users to turn off video or audio recording for an extra layer of privacy, at any time.
