Michael J Kingsford

Mike is a Distinguished Professor at the College of Marine and Environmental Sciences at James Cook University (JCU), Australia. The College is a recognized world leader in tropical marine science, aquaculture, ecology, environmental sciences, fisheries, planning, plant sciences and zoology,. He has been a Head of School and Dean of College at JCU, President of the Australian Coral Reef Society, Director of One Tree Island Research Station, member of the Great Barrier Reef Research Foundation and the Museum of Tropical Queensland advisory committees. He has published extensively on the ecology of reef fishes, jellyfishes, biological oceanography and climate change. His projects have encompassed a range of latitudes and he has edited two books on tropical and temperate ecology. He is a Chief Investigator with the ARC Centre of Excellence for Innovative Coral Reef Studies. A major focus of his research has been on connectivity of reef fish populations, environmental records in corals and fishes and deadly irukandji jellyfishes. In addition to research and leadership, he teaches undergraduate students and supervises many postgraduate students.
