

If software is not free "as in freedom," so that anyone can inspect, modify, and share it, the filters will inevitably be keyed to the interests of the gatekeepers who control it. The consequences for the rest of us will be loss of democracy, privacy, security, freedom of speech, freedom of movement – and even loss of life.

-- John Sullivan, Executive Director, FSF

DEFENDING THE FREEDOM OF COMPUTER USERS SINCE 1985

16,355 packages
Free Software Directory

44+ certified products available for sale from 7 companies
