Tuning personal competencies to the Information Society

Ismael Peña-López

e-Competencies

FLACSO Mexico

Mexico DF, October 31, 2008

Decentralized knowledge

The Economy of abundance (of information)

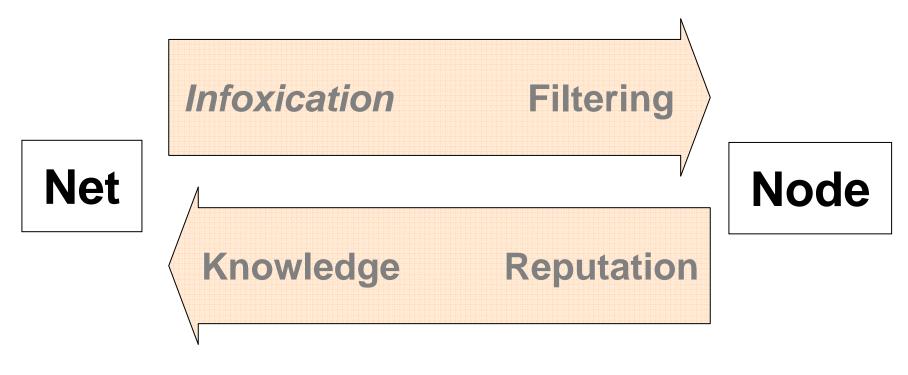

- Drop of the transaction costs
- Reconfigurable networks
- Non-hierarchic environments
- Collaborative environments
- Knowledge hubs and assembles
- Connected knowledge, connectivism, communalism
- Always on: social vs. professional

New media: digital literacy

New channels, new literacies

- Technological literacy
- Informational literacy
- Multimedia literacy
- Media literacy
- e-Awareness

Taking part in the network

- Knowledge as the network's currency
- The Gift Economy: access is the prize

Citizens in the Information Society

	Inequality		1
Disconnected	Diamond in the rough but invisible to networks	Structurally irrelevant to the system	
Connected	Source of innovation and value creation	Executor	Exclusion
Worker / Customer / Citizen	Self-programmable	Generic
