

Power Your Voice and Collaboration

Communication and collaboration are seamless, efficient, and scalable when you use Vonage Business Communications with Teams. The integration embeds Vonage communication experiences within Microsoft Teams, bringing calling, SMS and MMS capabilities into one platform to make business communication better.

Key Features and Benefits

- Make and receive superior-quality calls with access to over 50 calling features—without leaving Microsoft Teams
- Use SMS or MMS to send and receive images and other media files for greater collaboration
- Use existing devices and softphones—no need to purchase new devices
- Vonage Business Communications for Teams made possible by the Vonage Communications Platform

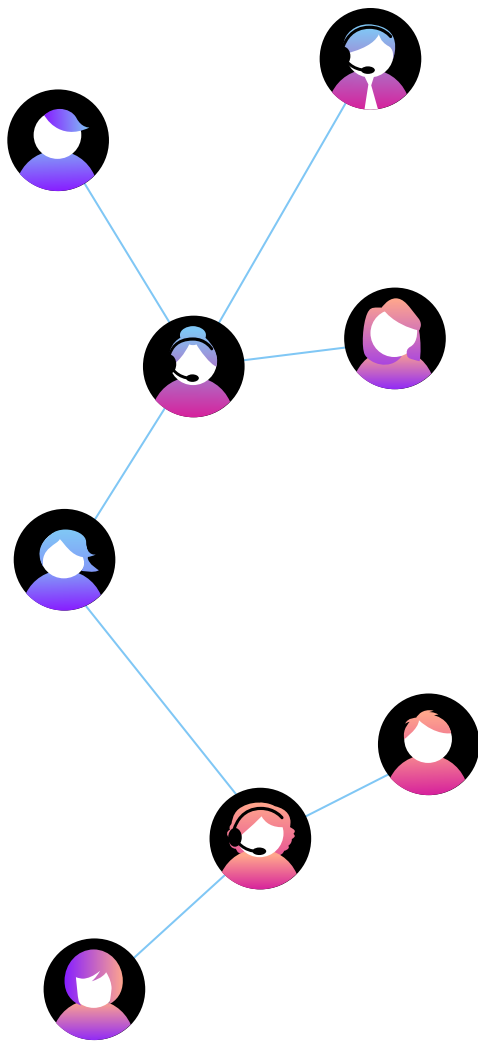

Collaborate Anytime

Increase work flexibility and productivity with the best of both worlds. Make or receive calls globally whether working remotely or at the office with Microsoft Teams-enabled devices, including desk phones and mobile. At the same time, integrate seamlessly with mission-critical business applications such as CRM and contact center to enhance business communications.

Enhance Collaboration and Productivity Without Disruptions

Vonage Business Communications for Teams means you can keep your existing phone system, which includes your desk phones, phone numbers, calling plans, extensions, and call flows. You can continue using any existing call center or compliance features and integrations too.

Save Time and Money

Protect your IT investments while providing all the tools necessary to help grow your business and increase employee satisfaction with Microsoft Teams. Minimize disruption by maintaining the technology employees are accustomed to using every day. With Vonage Business Communications for Teams, you get a truly unified communications process. Enjoy features like call presence, click-to-dial, voicemails with transcription, and SMS and MMS messaging. The Vonage integration is easy, whether you want to add 1 or 100+ users at a time.

Vonage Makes Direct Routing Better

Whether you are an MS Teams customer looking for advanced telephony and global calling plans or a Vonage customer using Microsoft Teams collaboration features, Vonage Direct Routing delivers the power of Vonage Business Communications to provide reliable, enterprise-grade calling globally.

Let Vonage be your IT Extension

Vonage Professional Services can quickly provision calling, SMS and MMS and use existing phone numbers and devices through Vonage's Direct Routing for Microsoft Teams. You can rely on Vonage's customer support to address communication needs supplied by Vonage.

Benefits of Direct Routing

Vonage's Direct Routing helps organizations provide a truly immersive unified communications experience on the Microsoft Teams cloud communications and collaboration platform.

Built from the network up, Vonage embedded integrations provide reliability, reduce delays, and enhance the quality of service for your Office 365 tasks, including Microsoft Teams.
