List of Cookies

Last updated **10 July 2020**.

Strictly Necessary Cookies
First party cookies

Type	Cookie Name	Duration	Description
Magento eCommerce platform	external_no_cache	At end of session	Records whether caching of a page is allowed or not
Magento eCommerce platform	frontend	At end of session	Used to store an anonymous session id
Google Tag Manager	_dc_gtm_UA-	At end of session	Loads other scripts and code into a page. Without it other scripts may not function correctly.
Site security	XSRF-TOKEN	At end of session	This cookie is written to help with site security in preventing Cross-Site Request Forgery attacks.
Cookie banner	hasConsent	At end of session	Tracks whether a user has consented to receive cookies
Tycho	_vam-web_session	At end of session	Stores the session ID for website administrators
Search the Archives	Musearchive_session	At end of session	Stores session ID
Design a Wig	design_a_wig_session	At end of session	Stores session ID
V&A Images	ASPSESSIONIDXXXXXXXX	At end of session	Stores Session ID for V&A Images
V&A Images	Cookies...	365 days	Tracks whether a user has consented to receive cookies

Performance Cookies
First party cookies

Type	Cookie Name	Duration	Description
Google Analytics	_ga	730 months	Distinguishes unique users by assigning a

			randomly generated number as a client identifier. It is included in each page request in a site and used to calculate visitor, session and campaign data for the sites analytics reports.
Google Analytics	ga_session_id	At end of session	Unique session identifier (based on the timestamp of the session_start event) associated with each event that occurs within a session
Google Analytics	_gid	24 hours	Stores and updates a unique value for each page visited.
Google Analytics	*_gat	10 minutes	Throttles the request rate - limiting the collection of data on high traffic sites. It expires after 10 minutes.
Google Analytics	*__utma	1 year	Calculates new and returning visitor statistics. The cookie is updated every time data is sent to Google Analytics. The lifespan of the cookie can be customised by website owners.
Google Analytics	*__utmv	2 years	Used when site owners create custom visitor-level variables for customising what can be measured. The cookie is updated every time data is sent to Google Analytics. It has a default lifespan of two years, although this can be customised by site owners.
Google Analytics	*__utmc	At end of session	Used in combination with the __utmb cookie

			to identify new sessions/visits for returning visitors. When used by Google Analytics this is always a Session cookie which is destroyed when the user closes their browser.
Google Analytics	* __utmz	182 days	Identifies the source of traffic to the site - so Google Analytics can tell site owners where visitors came from when arriving on the site. The cookie has a life span of 6 months and is updated every time data is sent to Google Analytics.
Google Analytics	* __utmt	10 minutes	Throttle the request rate for the service - limiting the collection of data on high traffic sites. It expires after 10 minutes
Google Analytics	* __utmb	30 minutes	Determines new sessions and visits and expires after 30 minutes. The cookie is updated every time data is sent to Google Analytics. Any activity by a user within the 30 minute life span will count as a single visit, even if the user leaves and then returns to the site. A return after 30 minutes will count as a new visit, but a returning visitor.
Hotjar	_hjid	At end of session	Persists the random user ID, unique to that site on the browser. This ensures that behavior in subsequent visits to the same site will be attributed to the same user ID.

	*_hjIncludedInSample	At end of session	Uniquely identifies a visitor during a single browser session and indicates they are included in an audience sample.
	_hjTLDTest	At end of check	Tries to determine the most generic cookie path we should use, instead of the page hostname. This is done so that cookies can be shared across subdomains (where applicable). To determine this, we try to store the _hjTLDTest cookie for different URL substring alternatives until it fails. After this check, the cookie is removed.

Third Party Cookies

Type & Host	Name	Duration	Description
Hotjar script.hotjar.com	_hjIncludedInSample	At end of session	Uniquely identifies a visitor during a single browser sessions and indicates that they are included in a sample
Hotjar script.hotjar.com	_hjCachedUserAttributes	At end of session	Stores User Attributes which are sent through the Hotjar Identify API, whenever the user is not in the sample. These attributes will only be saved if the user interacts with a Hotjar Feedback tool.
Dotdigital engagement cloud webinsight.s3.amazonaws.com	recordID	365 days	Tracks and identifies a visitor as an Engagement Cloud contact whilst they browse a site's pages. This data can then be used for better

			segmenting and targeting of contacts.
Dotdigital engagement cloud webinsight.s3.amazonaws.com	dmSessionID	At end of session	Tracks and identifies a visitor as an Engagement Cloud contact whilst they browse a site's pages. This data can then be used for better segmenting and targeting of contacts.
Google Universal Analytics sketchfab.com	_ga	730 days	Distinguishes unique users by assigning a randomly generated number as a client identifier. It is included in each page request in a site and used to calculate visitor, session and campaign data for the sites analytics reports. By default it is set to expire after 2 years.
Google Universal Analytics sketchfab.com	_gid	24 hours	Stores and updates a unique value for each page visited.
Google Universal Analytics sketchfab.com	_gat	10 minutes	Throttles the request rate - limiting the collection of data on high traffic sites. It expires after 10 minutes.
