

# GEODIS ROAD NETWORK

## Day-definite, fully bonded, integrated road network

Linking domestic presence of GEODIS in key markets of SG, MY to support multi-modal gateway strategy.

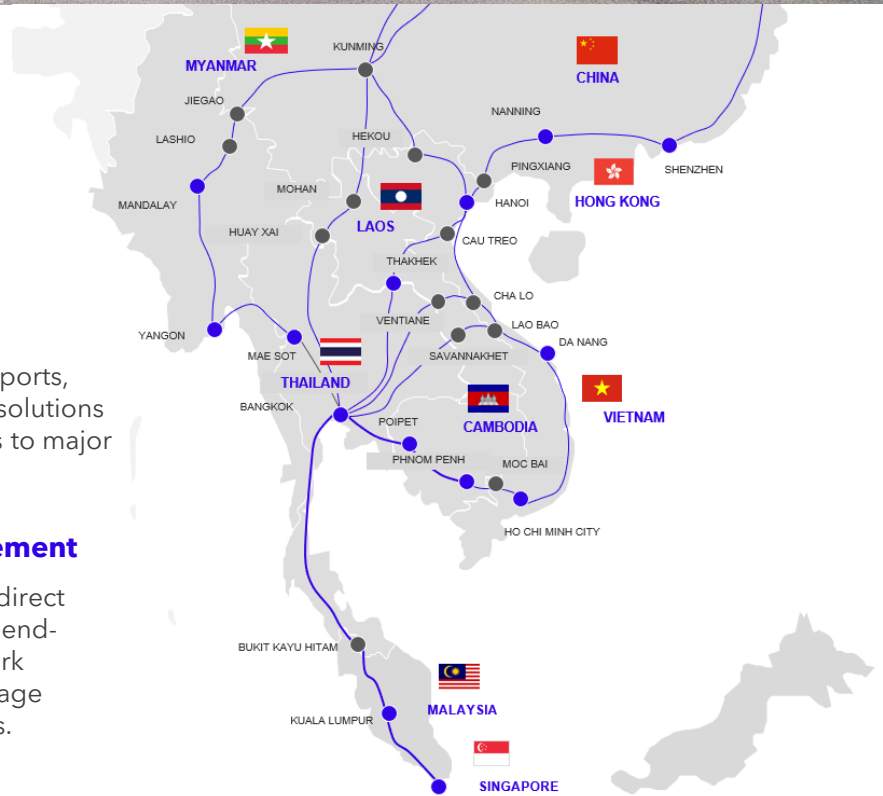

## Gateway/hub connectivity

Feeding to major air hubs and seaports, the Network bridges multi-modal solutions through hinterland feeder services to major sea and airports in the region.

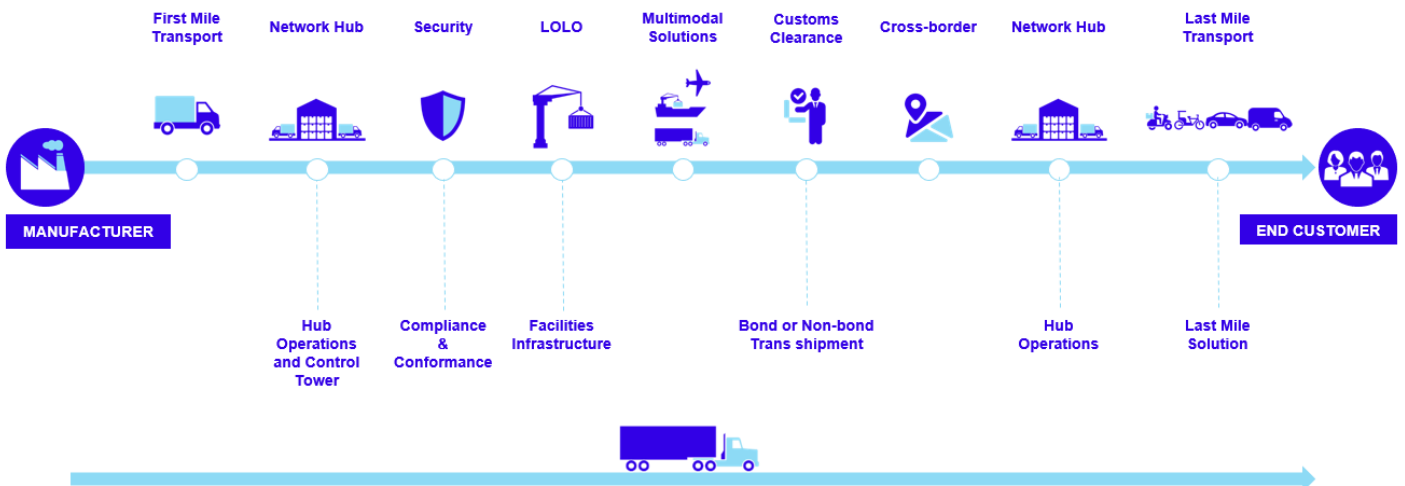

## Centralized Network Management

Fully controllable operations by a direct network management team - with end-to-end visibility and reliable network delivering service and cost advantage over traditional air and sea options.

## END-TO-END CONTROL

# CUSTOMS CLEARANCE CAPABILITIES

## IRIS

All in one Freight Management Application connected through our entire network of offices and agents. It supports all transport modes as well as providing end-to-end visibility based on live information.

**INTELLIGENT  
REAL-TIME  
INFORMATION  
SYSTEM**
