

OVERVIEW

FortiGuard Security Services

To break the attack sequence and protect your organization, you need to detect and rapidly adjust your security posture to newly discovered attacks across ever expanding attack surface.

Can your security do that?

FortiGuard Security Services is a suite of Market-leading, Al-enabled security capabilities providing application Content, Web, Device and User security that continuously assesses the risks and automatically adjusts the Fortinet Security Fabric and Ecosystem. Providing coordinated and consistent real-time defense for the latest attacks across network endpoints and clouds.

Why FortiGuard

Comprehensive. You can only protect against what you see, and in places that you can influence the enforcement in real time. We close the security gaps.

Be everywhere. Coordinated and consistent security detection and response across the attack surface and cycle with the largest portfolio of products supporting hybrid models of hardware, software and as-a-service.

Impact everything. The largest technology and threat intelligence ecosystem with native and API based integration.

Quality of the analysis. All and analytics systems are only as good as the inputs and training that go into them. We deliver credible security analysis results based on a unified data set.

Trainers matters. Our Al is trained by one of the largest and most experienced security research organizations in the industry the FortiGuard Labs.

Data matters. Our Al is trained on one of the largest and most diverse datasets in the industry spanning intelligence from endpoints, networks and clouds.

Scale matters. Our platform ingests and analyzes more then 100 billion events every day, on average, to deliver over one billion security updates daily across the Fortinet security Fabric and ecosystem

Community matters. We see and protect you against millions of events from our global fabric deployments and from our partners preventing a "second" Patient Zero for community known threats.

Time to protection for newly discovered threats.

You can only break the attack sequence if you can update your security posture, in time. We deliver coordinated and automated protection in near real time.

Break the Sequence. We generate in near real time holistic set of new protection for all relevant security technologies, enabling coordinated enforcement that is tailored for the attack sequence

Have the Reach. We automatically distribute the newly created protections, adjusting the Fortinet Security Fabric and ecosystem with coordinated market leading defense

Empower. We continually invest in advanced SOC and NOC tools, training and capabilities making sure that your teams are set for success.

Security efficacy that is backed up by leading certifications and testing organizations FINANCIAL Z SERVICES

Simplicity. Faster time to activation is key in supporting the pace of digital innovation. We deliver easy to choose, attach and consume high performing security.

Operation. Mixes and match security capabilities to fit your diverse set of use cases across the organization, attached them to the desire product across HW, VM and As-A-Service models. Rest assure that they are all designed from the ground up to work together in synergy. Leverage our Fabric management center to gain unified view across your deployment.

Purchasing. We provide you with the freedom of choose a-la-care, optimized bundles for NGFW, cloud, mail, endpoint, etc. AND Enterprise Agreement.

Coordinated market leading security capabilities providing protecting across the attack lifecycle and surface.

Web Security

Optimized to monitor and protect data and applications against web-based attack tactics while assisting you with meeting compliance.

Web and Video **Filtering**

FortiGuard's massive web content rating, and URL databases and AI enabled analysis environments power our accurate web and video filtering services. Providing granular blocking and filtering for web and video categories to allow, log, or block for rapid and comprehensive protection and regulatory compliance.

DNS

Consistent protection against malicious domain blocking attack tactics like DNS tunneling, C2 server identification and Domain Generation Algorithms.

Antibot and CS

Block unauthorized attempts to communicate with compromised remote serves for both receiving malicious commands or extract information

Geo IP

Geo IP add additional protection to this category by providing location information on IP traffic to help manage region-based threats.

WAF

In conjunction with our WAF product, this service delivers automated continuous signature updates that protect against SQL injection, cross-site scripting, and various other attacks, with hundreds of data-type and web robot patterns, vulnerability scan signatures and suspicious URLs.

Content Security

Optimized to monitor and protect against file-based attack tactics, while assisting you with meeting compliance.

Cloud Sandbox

Top-rated behavior-based Al-powered static and dynamic malware analysis to address the rapidly evolving and more targeted threats including ransomware, crypto-malware, and others across a broad digital attack surface. Delivers real-time actionable intelligence and preventions through the automation of zero-day advanced malware detection and response. MITRE ATT&CK - based reporting and investigation tools.

ΑV

FortiGuard Antivirus delivers automated updates that protect against the latest polymorphing attack components. viruses, spyware, and other content-level threats. It uses industry-leading advanced detection engines to prevent both new and evolving threats from gaining a foothold inside your network, endpoint and clouds and access invaluable content.

Innovative Capabilities

Additional capabilities like mobile malware, credential protection, content disarm & reconstruction, Virus outbreak prevention, DLP, dynamic adult image analysis add additional protection to this category

Antispam

Work in conjunction with our mail product to dramatically reduce spam volume at the perimeter, giving you unmatched control of email attacks and infections provide greater protection than standard realtime blacklists

Device Security

Optimized to monitor and protect against device and vulnerability -based attack tactics while assisting you with meeting compliance.

IPS

IPS block the latest stealthy network-level threat & network intrusions working with the most comprehensive IPS Library with thousands of signatures AND backed up by FortiGuard research credited with 850+ Zero-day discoveries. Natively embedded in our context aware policies for full control of attack detection methods to suit complex security applications, resistance to evasion techniques.

OT and IoT

Identify and police common ICS/SCADA protocols and equipment for granular visibility and control with our OT service, and reduce your attack surface with automated discovery, real time query, segmentation and enforcement for IoT devices.

Additional capabilities like device and OS detection, IoT hardware MAC address vendor mapping updates provide additional protection within this category.

Consistent and Coordinated Security Detection and Response

The Fortinet Security Fabric is natively integrated with FortiGuard actionable threat intelligence which is continuously updating rich set of capabilities for content, web, device and user security across the Fabric.

FortiGuard maintain Al-powered analysis environments across unified databases, ensuring that all products operate from the same up to the minute data. Different products gain access to all relevant security technologies appropriate to their function and location across the attack plane ensuring security is deployed consistently and enforced cohesively.

The Fabric is based on common standards and open APIs, so you can connect and leverage your existing investments with our threat insights.

From our threat researchers to yours

Advanced Tools for SOC/NOC

Security Operational Teams / Network Operational Teams

Continuously evaluate and advanced your security posture and set your team for success

Provide you with guided experience to design, implement, and continually advance your security posture Fabric Rating Service provides audit checks, identify critical vulnerabilities, configuration weaknesses and recommend best practice implimentations.

loC

Automated breach defense system that continuously monitors your network for attacks, vulnerabilities, and persistent threats. It provides protection against legitimate threats, guarding your data, defending against fraudulent access, malware, and breaches.

Vulnerability Scan Vulnerability scan network assets for security weaknesses, with on demand or scheduled scans. Comprehensive reports on the security posture of your critical assets and automated scanning of remote location

SOC-as-a-Service

Free your teams to focus on major executions, by offloading all tier one analysis to our team of exports. We will notify you of any significant events that needs your attention and recommend an action plan.

Purchasing Options

We provide you with the freedom to choose and mix and match between:

- A-la-care
- Optimized bundles for products and use cases
- Enterprise Agreement.

This Datasheet includes purchasing options and bundles for the FortiGate product line. For enabling FortiGuard Security Services on all other products and for other use cases please referrer to the relevant product datasheet.
