Google Classroom

Where teaching and learning come together

Your all in one place for learning, Google Classroom is an easy-to-use and secure tool that helps educators manage, measure, and enrich learning.

Easy to get started and simple to use

Anyone in your school community can learn to use Classroom, in minutes. Because it's directly integrated into Google Workspace for Education, you can seamlessly use it with familiar applications like Gmail, Calendar, and Docs.

Built for learning together

Collaborate with the whole class, groups, or individuals within Classroom in the same document. Or connect face-to-face with reliable, secure Google Meet video conferencing – accessible directly within Classroom.

Engage from anywhere, on any device

Make your classes more versatile and mobile – Classroom can be accessed on any device, even with low bandwidth or offline.

150+ million

students and teachers around the world use Classroom.

"Google's education tools are designed for an education environment. But they're also invaluable for our administrators, starting with the basic real-time collaboration capability."

Hector Perez, Executive Director of Technology, United Independent School District

Google for Education

Bring teaching and learning together

Enhancing what's possible for teachers, students, and education leaders

Classroom was built to give teachers easier, more dynamic ways to connect with their students. We listen to feedback from educational communities around the world in order to improve our tools to elevate the magic of teaching and learning

Save time.

Streamline classroom management

- Manage multiple classes from one place and easily switch from class to assignment to student
- Add students to a new course quickly by sharing a link or code
- Integrate your favorite EdTech tools with Classroom add-ons [1,2]

Grade efficiently

- Access grading features from anywhere, even on mobile
- Track student progress with a holistic view of their scores in your gradebook

Provide clear and rich feedback

- Keep grading consistent and transparent with rubrics displayed right alongside student work
- Store frequently used feedback in a customizable comment bank

Personalize learning.

Support all types of learners

- Students can learn in their best ways when you adjust settings for accessibility or set up student accounts for individualized education plans
- Assign material to specific groups that need differentiated coursework

Help students stay organized

- Coursework documents upload as templates to give each student a copy
- Due dates automatically appear on student calendars when an assignment is distributed
- Everyone in the class can stay on track with student and teacher to-do pages

Encourage critical thinking

- Students can check their own work against hundreds of millions of published sources to flag missing citations before submitting
- Teachers can detect potential plagiarism by scanning student submissions against a domain-specific repository of past student work [1]

Manage with ease.

Apply analytics to keep improving

- Investigate system performance and security issues by accessing audit logs [2] from the Admin Console, or use reports to identify events like how a class or student was deleted
- Export Classroom logs to BigQuery to analyze student adoption or engagement [1,2]

Stay flexible and scalable

- Serve any size educational community
- Create and manage classes at scale by syncing Classroom rosters from your student information system
- Export grades from Classroom to your student information system
- Install third-party EdTech tools to multiple teachers at once with Classroom add-ons [1,2]

Stay secure and compliant

- Rely on our industry-leading global network built with multilayered, full-stack security
- We meet the most rigorous global education standards for security and privacy, and we're audited by independent, third-party organizations
- There's no advertising in Classroom and a student's personal information isn't used to create ad profiles for targeting
- Only Classroom participants have access to their specific class activities and content

1. Available in Google Workspace for Education paid editions
2. Coming soon

A solution for every school and every budget

Classroom is free for educational institutions, whether they use Google Workspace for Education or a traditional learning management system. Schools that need more enhanced tools within Classroom can purchase the Teaching and Learning Upgrade, Education Standard, or Education Plus editions.
