Version 1.0
Last Updated March 1, 2015.

1. PRODUCT DESCRIPTION

Registrars wishing to offer Premium Names ("Premium Names") are subject to the terms and conditions contained in this document. Premium Names include names in Premium and Sunrise Premium products. Premium names are optional and registrars are not required to offer Premium Names. Registrars may register domain names as usual but Premium Names will appear as 'Not Available' in EPP and the web portal.

This product is covered under and governed by the Master Services Agreement of VoxPop.

Registrars MUST communicate to, and obtain consent to charge, in a clear and conspicuous way, the Registered Name Holder for fees that are consistent with Premium name fees, including renewal fees.

2. CATEGORIES

Premium Names can only be assigned to one category at a time. Each domain has a specific price on it, which can be modified at any time subject to giving prior notice to the Registrar as required by terms of VoxPop's Registry Agreement with ICANN. All create, renew, transfer and restore commands will use the new prices IMMEDIATELY once they are changed. The list of price categories will include the following pieces of information:
- Category Name
- Create Price
- Renew Price
- Transfer Price
- Restore Price

3.DOMAIN CHECK RESPONSES

Domain check responses for domain names that are part of a premium category will return the category name, price for create, renew, transfer, and restore operations. For registrars that are not subscribed to the Categories feature, the web portal will display the domain name as not available.

4.DOMAIN CREATE COMMANDS

Domain "create" commands must contain the additional information for the extension including the indicated price value for each affected operation. The presence of the price element in the "create" signifies that the applicant agrees to the specified Category of the domain name.

5.DOMAIN INFO RESPONSES

Domain "info" responses for registered domains that are part of a premium category will return the following information: category name, price for create, renew, transfer and restore operations. This information will only be returned to the sponsoring registrar or a Non-Sponsoring registrar who is subscribed to the Categories feature and has the "authinfo" code associated with the domain name.

6.DOMAIN TRANSFER COMMAND

Domain transfer commands for domain names that are part of a category must contain the additional information required for the extension including the name of the category value attached to the Transfer Price. The presence of the price element in the "transfer" signifies that the applicant agrees to the specified Category of the domain name. Premium Names cannot be transferred to registrars that are not accredited to sell Premium Names. The transfer request may fail in that case.

7.DOMAIN RENEW COMMAND

"Renew" commands for domains which are part of a premium category must contain the additional information for the extension including the name of the Category and the costs attached to the Renew Price.
