Innovation is Openness

PRESENTATION OF THE FIRM

EXPERTS IN OPEN INNOVATION & INTELLECTUAL PROPERTY

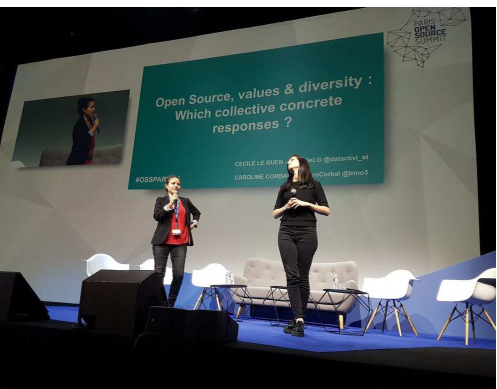

Inno³ is an expert independent consulting firm specializing in **Open Innovation, Open Data** and **Open Source** fields.

From code auditing to the evaluation of valuation policies, our core competencies include the intellectual property management, the transformation of organization and the creation of dynamic ecosystems.

We operate internationally to the benefit of public and private players wishing to adopt the **Open Source, Open Data, Open Hardware** & other **collaborative approaches**.

As part of this collaborative approach/dynamic, we are actively involved in the structuring projects of the sector, through interviews and conferences, but also through the organization and participation in major events, such as :

Our **values** represent **what we are & support**

Our projects and initiatives are built on a shared vision, common objectives and a sustainable collaboration. We hope to include every user in the interaction and co-construction of our missions.
