CADA SEGUNDO CUENTA

10 MANERAS DE ACELERAR SU SITIO DE WOOCOMMERCE

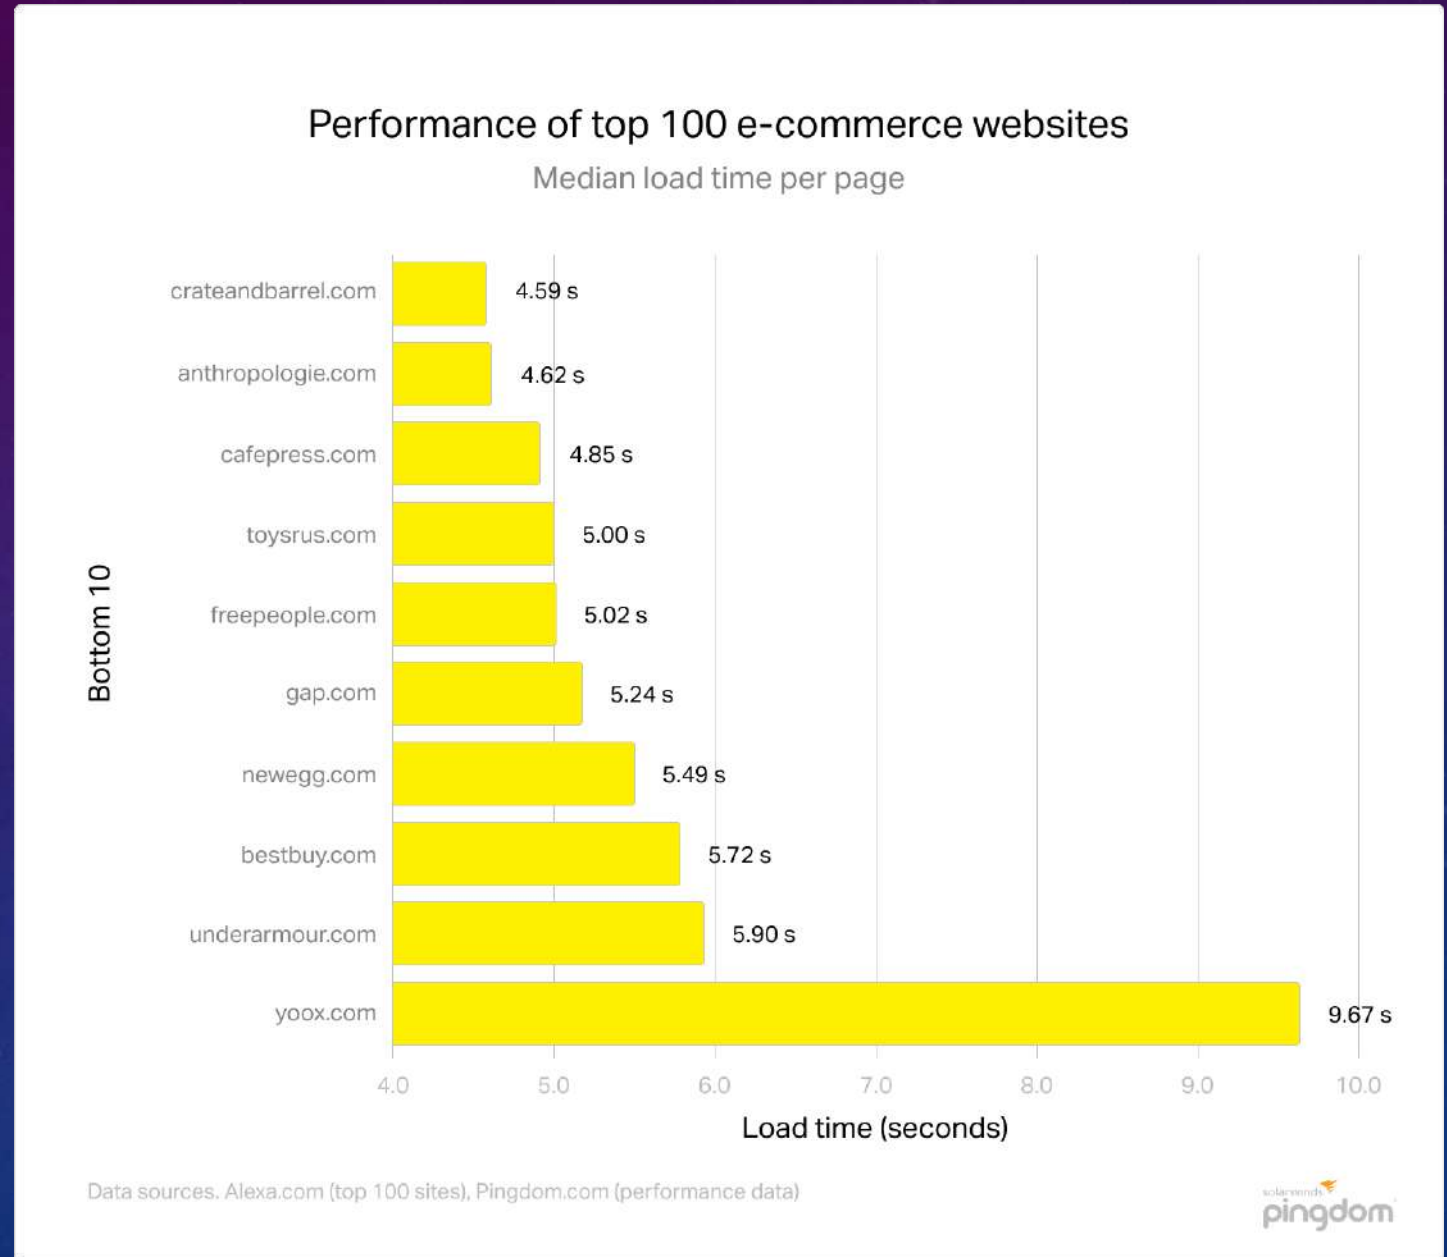

“TODO EL MUNDO EN LÍNEA
SE ESTÁ VOLVIENDO MÁS
LENTO, JUSTO CUANDO
QUEREMOS QUE TODO SEA
MÁS RÁPIDO”

ME
TAPPING MY FEET WHILE WAITING FOR THE
MICROWAVE TO FINISH HEATING MY PIZZA ROLLS

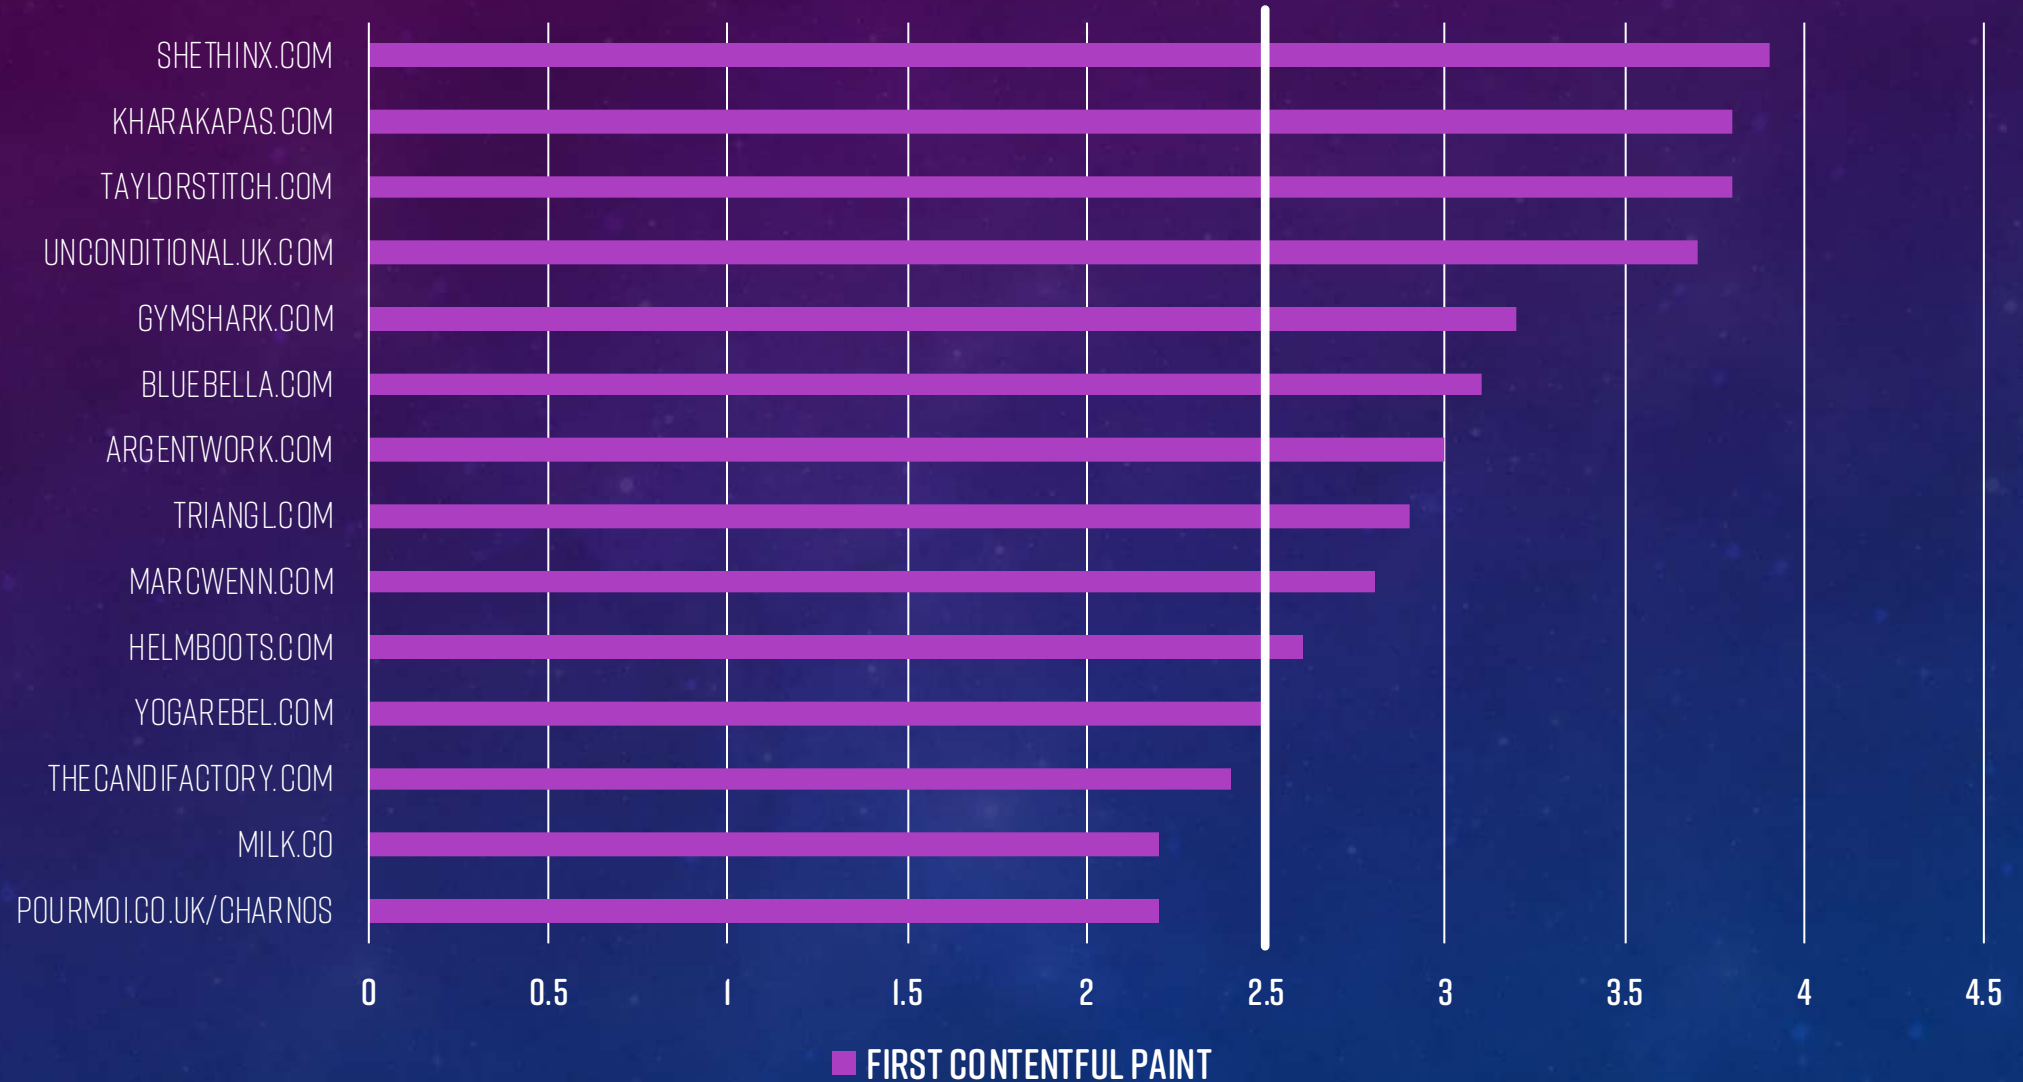

EN 2018, PINGDOM OBSERVE LOS 100 MEJORES TIENDAS EN LINEA. LO PEOR ES QUE TOMABAN 5 O MÁS SEGUNDOS EN CARGAR.

LAS TIENDAS EN LINEA CON WOOCOMMERCE PUEDE TARDAR ENTRE 2 Y 4 VECES LOS 5 SEGUNDOS.

PERO ESTO NO ES EXCLUSIVO DE UN PLATAFORMA PARTICULAR ...

TIEMPO DE CARGA DE LAS MEJORES TIENDAS DE ROPA HECHO CON SHOPIFY

GOOGLE PAGE SPEED INSIGHTS MUESTRA MÁS SOLO EL TIEMPO DE CARGA DE UN SITIO. TAMBIÉN MUESTRA EL **“TIME TO INTERACTIVE.”**

ESE ES EL MOMENTO EN EL QUE EL USUARIO REALMENTE PUEDE INTERACTUAR CON EL SITIO, **CUANDO ES ÚTIL.**

EL PROMEDIO DE ESAS TIENDAS FUE DE 17.6 SEGUNDOS.

ESTO NO ES ALGO DE **SHOPIFY**.

ESTO NO ES ALGO DE **WOOCOMMERCE**.

ESTO SE DEBE A QUE **NECESITA-APRENDER-CÓMO-
ADMINISTRAR-TUS-IMÁGENES-EL-CSS-PLUGINS-DE-
TERCEROS-Y-JAVASCRIPT.**

EN 79% DE LOS CLIENTES QUE REPORTAN
INSATISFACCIÓN CON LA VELOCIDAD
DE CARGA DE LA TIENDA AL MOMENTO DE
COMPRAR NO LO VUELVAN A HACER EN EL
MISMO SITIO.

EL 53% DE LOS USUARIOS MÓVILES
DEJAN UN SITIO QUE TARDA MÁS
DE TRES SEGUNDOS PARA CARGAR.

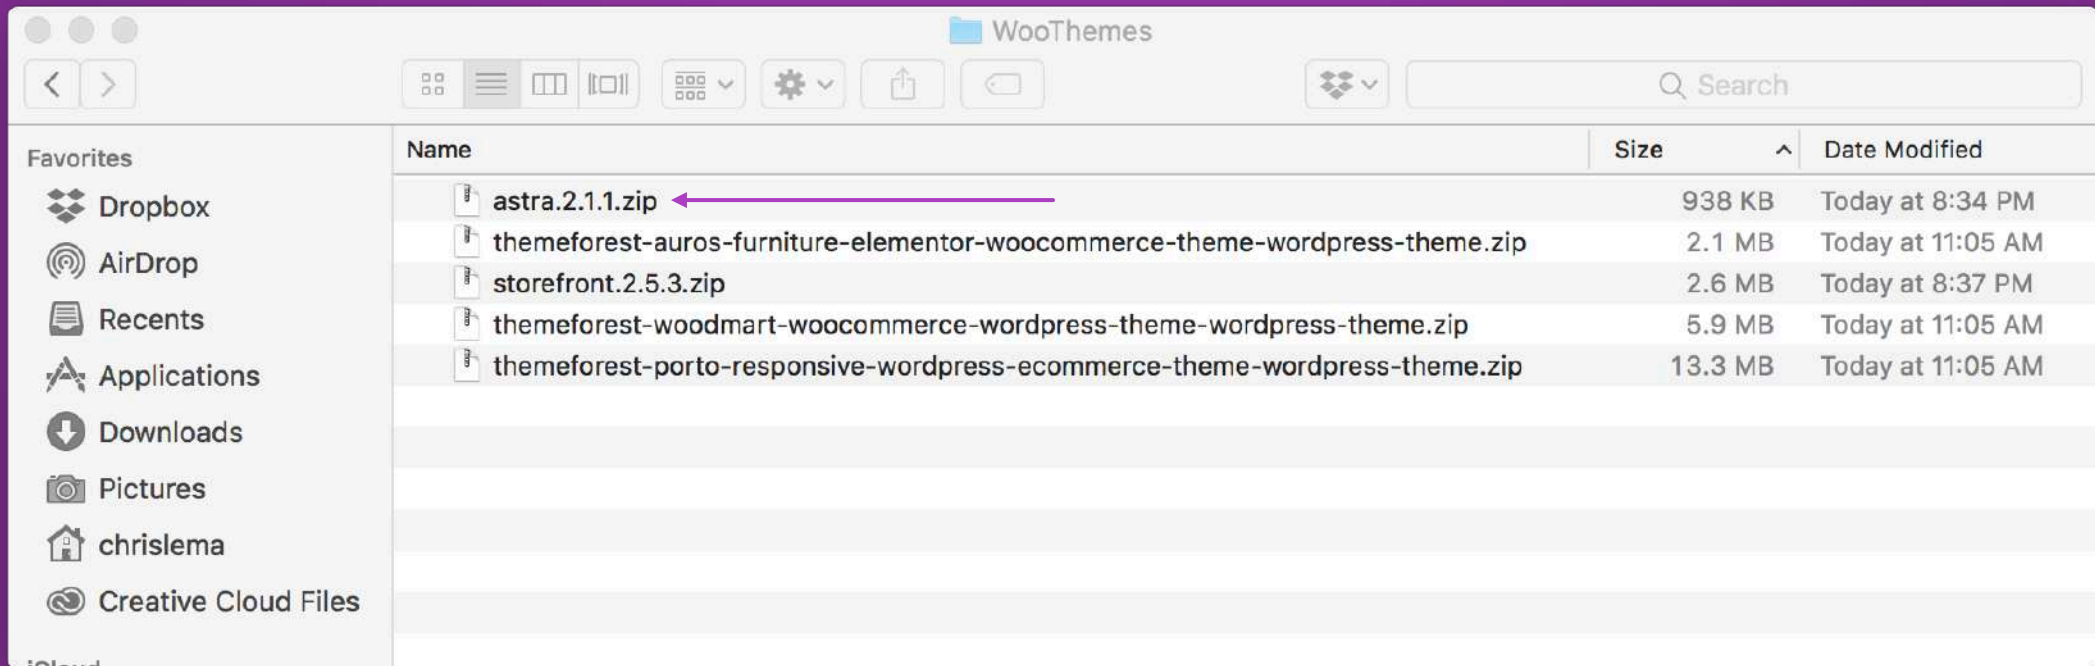

UN RETRASO DE **UN SEGUNDO** EN LOS TIEMPOS DE CARGA PUEDE RESULTAR EN UN 7% MENOS DE CONVERSIONES Y SI GANA \$100K EN UN DÍA, UNA MEJORA DE UN SEGUNDO AGREGA \$7,000 POR DÍA.

SI SU TIENDA ES LENTA, NO SE ENCUENTRA EN
LOS RESULTADOS DE GOOGLE. LOS PRIMEROS
5 RESULTADOS OBTIENEN 68% DE TODOS
LOS CLICS.

ESO SIGNIFICA QUE PERDERÁ ESE TRÁFICO.

A CONTINUACION 10 COSAS QUE PUEDES
HACER PARA ACELERAR TU TIENDA CON
WOOCOMMERCE.

CAMBIA SU TEMA - PORQUE LA MAYORÍA DE LOS “MEJORES” TEMAS ESTÁN MAL CODIFICADOS.

CAMBIA SU HOSPEDAJE

USA LOS “FIREWALL RULES” QUE PUEDES USAR CON CLOUDFLARE.

The screenshot shows the Cloudflare dashboard for the domain mywoodemo.com. The navigation bar includes icons for Overview, Analytics, DNS, SSL/TLS, Firewall, Access, Speed, Caching, Workers, Page Rules, Network, Traffic, Stream, Custom P..., Apps, and Scrape S... The Firewall Rules section is active, showing a 'Create Firewall Rule' form. The rule name is 'Block Bad Bots'. The matching criteria are: 'Threat Score' greater than '10' AND 'Known Bots' equals 'Off'. The expression preview shows '(cf.threat_score gt 10 and not cf.client.bot)'. The action is set to 'Block'.

MINIFIQUE LOS ARCHIVOS HTML & CSS

The screenshot shows the WP Rocket File Optimization settings page. The left sidebar contains navigation options: DASHBOARD, CACHE, FILE OPTIMIZATION (selected), MEDIA, PRELOAD, ADVANCED RULES, DATABASE, CDN, HEARTBEAT, ADD-ONS, Cloudflare, and TOOLS. The main content area is titled 'File Optimization' and includes a 'Show Sidebar' toggle. It is divided into two sections: 'Basic Settings' and 'CSS Files'. The 'Basic Settings' section has three checked options: 'Minify HTML', 'Combine Google Fonts files', and 'Remove query strings from static resources'. The 'CSS Files' section has two checked options: 'Minify CSS files' and 'Combine CSS files'. It also features an 'Excluded CSS Files' text area with a sample path and a note about domain stripping. The 'Optimize CSS delivery' option is also checked.

File Optimization

Show Sidebar

Basic Settings

[NEED HELP?](#)

- Minify HTML**
Minifying HTML removes whitespace and comments to reduce the size.
- Combine Google Fonts files**
Combining Google Fonts will reduce the number of HTTP requests.
- Remove query strings from static resources**
Removes the version query string from static files (e.g. style.css?ver=1.0) and encodes it into the filename instead (e.g. style-1.0.css). Can improve your GTMetrix score. [More info](#)

CSS Files

[NEED HELP?](#)

- Minify CSS files**
Minify CSS removes whitespace and comments to reduce the file size.
- Combine CSS files** (Enable Minify CSS files to select)
Combine CSS merges all your files into 1, reducing HTTP requests. Not recommended if your site uses HTTP/2. [More info](#)

Excluded CSS Files
Specify URLs of CSS files to be excluded from minification and concatenation (one per line).

```
/wp-content/plugins/some-plugin/(.*).css
```

The domain part of the URL will be stripped automatically.
Use (.*).css wildcards to exclude all CSS files located at a specific path.

- Optimize CSS delivery**
Optimize CSS delivery eliminates render-blocking CSS on your website for faster perceived load time. [More info](#)

LazyLoad

[NEED HELP?](#)

It can improve actual and perceived loading time as images, iframes, and videos will be loaded only as they enter (or about to enter) the viewport and reduces the number of HTTP requests. [More Info](#)

Enable for images

Enable for iframes and videos

Replace YouTube iframe with preview image
This can significantly improve your loading time if you have a lot of YouTube videos on a page.

Emoji

Use default emoji of visitor's browser instead of loading emoji from WordPress.org

Disable Emoji
Disable Emoji will reduce the number of external HTTP requests.

Embeds

Prevents others from embedding content from your site, prevents you from embedding content from other (non-whitelisted) sites, and removes JavaScript requests related to WordPress embeds

Disable WordPress embeds

CONTROL THE WORDPRESS HEARTBEAT

The screenshot shows the WP Rocket dashboard with the Heartbeat settings page open. The sidebar on the left contains the following menu items: DASHBOARD (Get help, account info), CACHE (Basic cache options), FILE OPTIMIZATION (Optimize CSS & JS), MEDIA (LazyLoad, emojis, embeds), PRELOAD (Generate cache files), ADVANCED RULES (Fine-tune cache rules), DATABASE (Optimize, reduce bloat), CDN (Integrate your CDN), and HEARTBEAT (Control WordPress Heartbeat API). The main content area is titled 'Heartbeat' and includes a 'Show Sidebar' toggle set to 'ON'. Below the title, there is a 'NEED HELP?' link. The main text explains that reducing or disabling the Heartbeat API's activity can help save server resources. A checkbox labeled 'Control Heartbeat' is checked. A section titled 'Reduce or disable Heartbeat activity' provides instructions on how to reduce activity (changing frequency from one hit per minute to one hit every 2 minutes) and a warning that disabling it entirely may break plugins and themes. Three expandable sections are visible: 'Reduce activity' for 'Behavior in backend', 'Reduce activity' for 'Behavior in post editor', and 'Reduce activity' for 'Behavior in frontend'. A 'SAVE CHANGES' button is located at the bottom of the page.
