

ELNEC International Fund

ELNEC's primary aim is to educate nurses to improve end-of-life care. While our initial efforts, launched in 2000, were focused in the United States, many ELNEC trainers have had opportunities to travel internationally and provide this education to nurses and other healthcare providers throughout the world. Currently ELNEC trainers and faculty have represented 99 countries. In this increasingly global world, these opportunities have highlighted the imperative that we disseminate the valuable work and accomplishments of the trainers in this country to the international community; however it is costly to do such work.

All tax deductible contributions will go to the ELNEC International Fund. The dollars raised will be used for direct cost of international outreach, including: distribution of ELNEC curricula, translation of curricula, hosting courses in other countries, and scholarships for international colleagues to attend a U.S. course. For more information, visit www.aacnnursing.org/ELNEC/International
