

Use the cloud you want, when you want with Dell Technologies APEX Multi-Cloud Data Services

Combine the performance and scale of Dell Technologies infrastructure with the economics and application services of the cloud.

It's a multi-cloud world

With a variety of public cloud vendors that are all continuously innovating and developing new capabilities, determining the right cloud for your organization is a complex decision.

APEX Multi-Cloud Data Services enables organizations to leverage multiple clouds and maximize business outcomes. It provides the ability to switch clouds quickly and easily based on specific application needs.

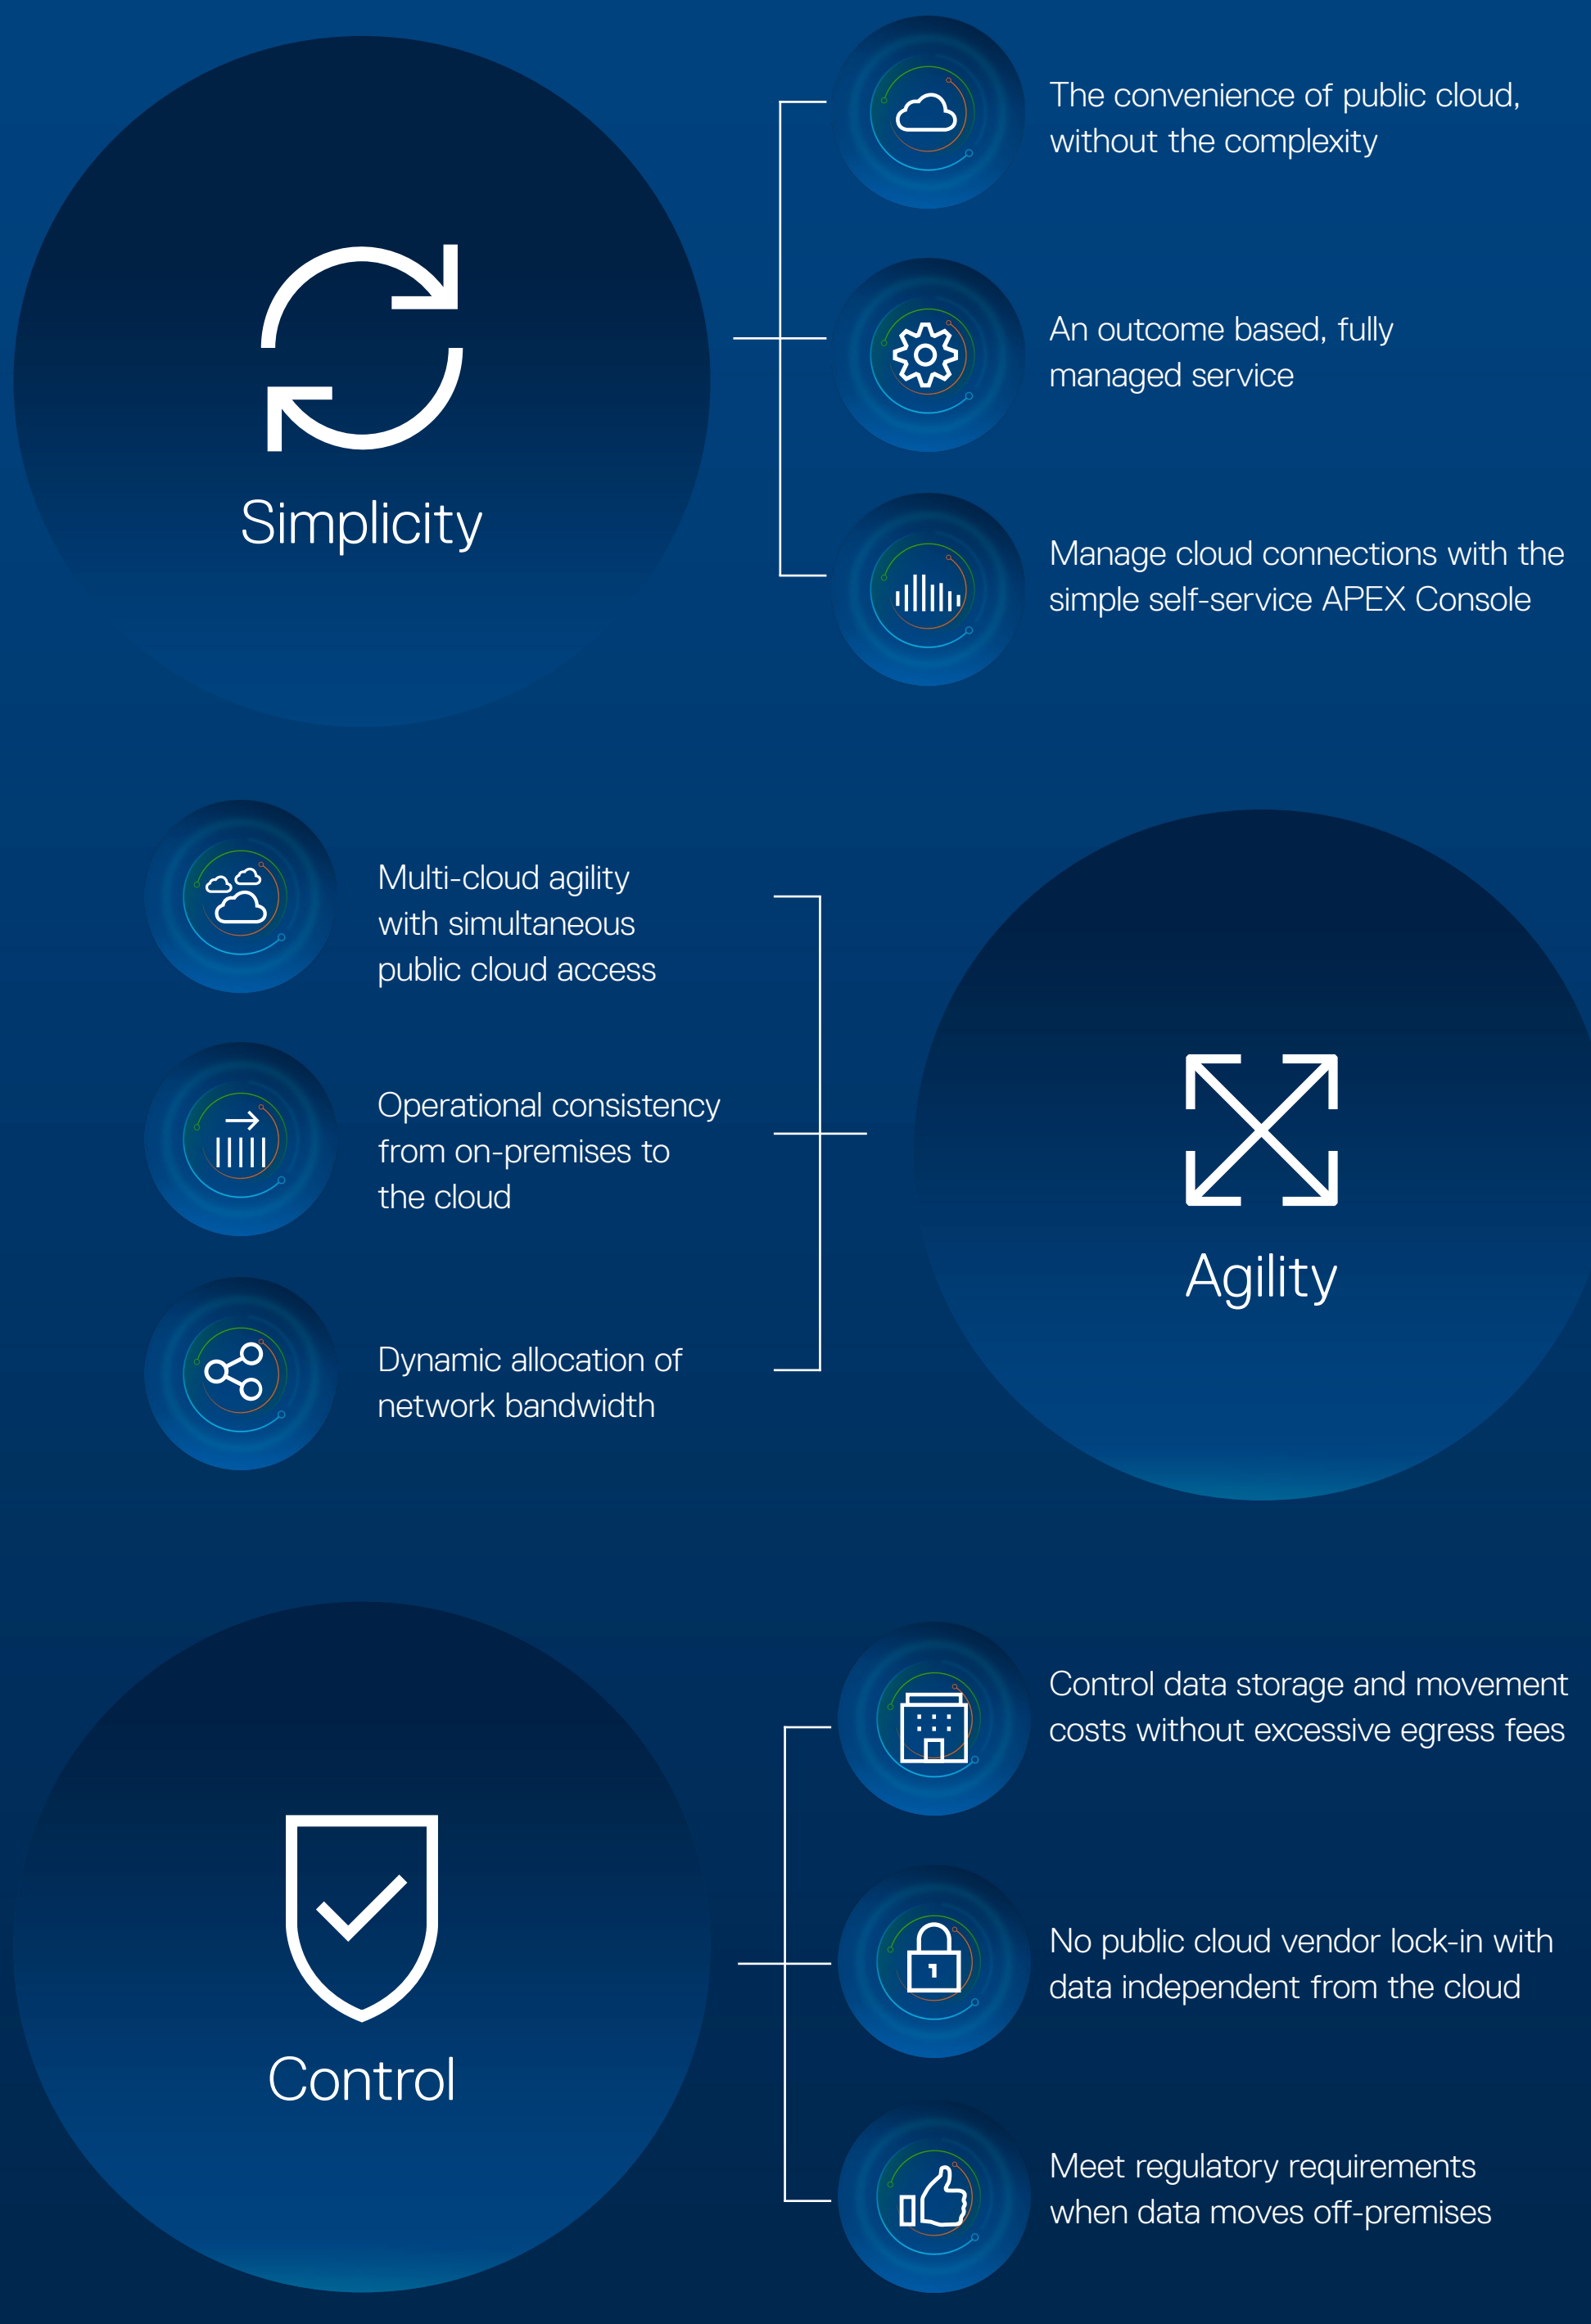

The value of multi-cloud

In the data era, multi-cloud is the standard. Organizations want the agility of cloud and they want it everywhere, but this can lead to operational complexity. There is a better way.

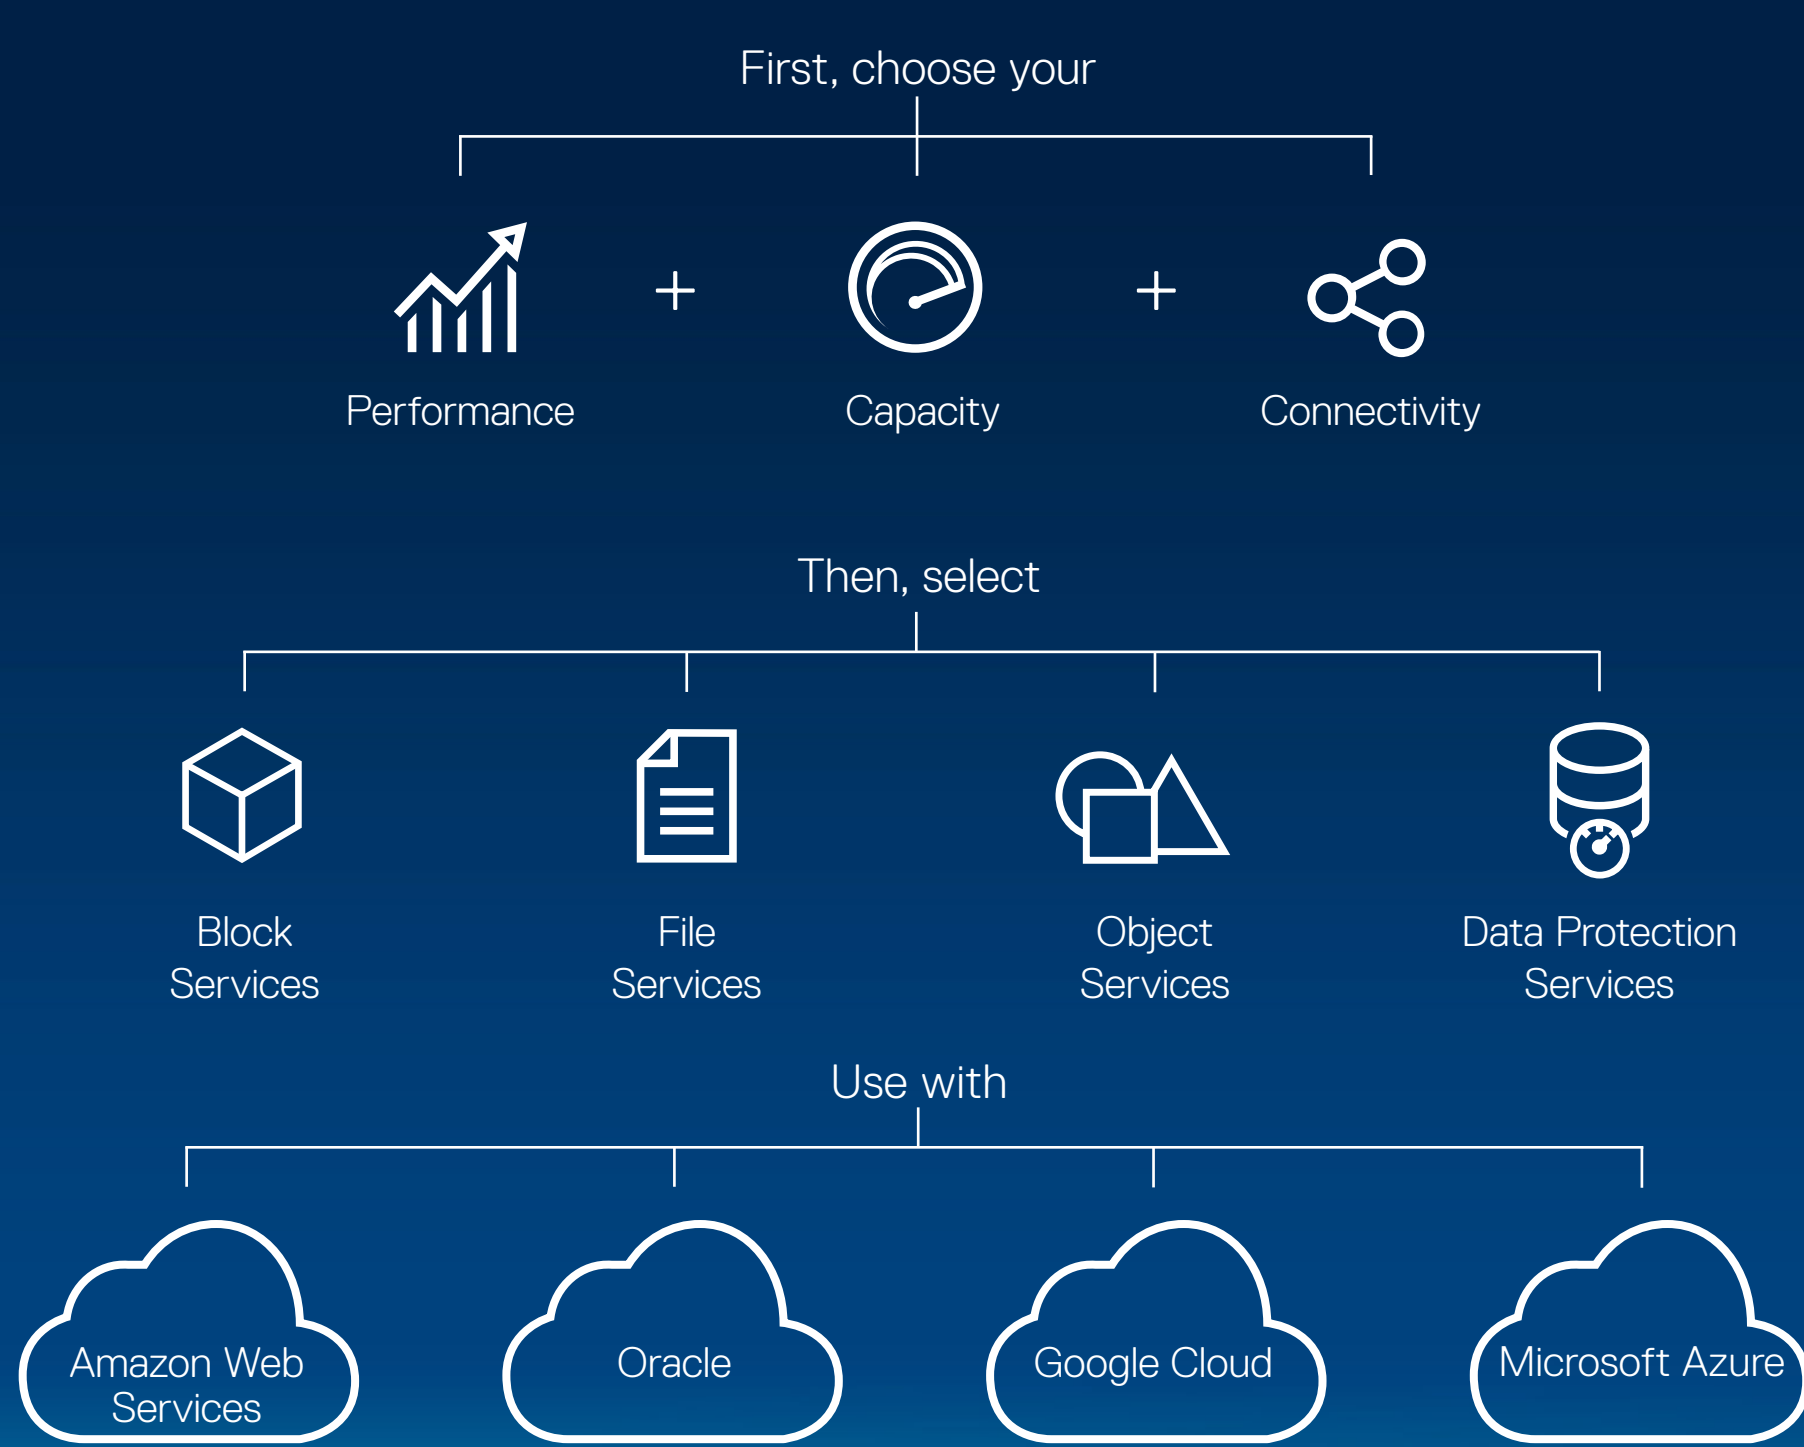

Why Dell Technologies APEX Multi-Cloud Data Services?

APEX Multi-Cloud Data Services offers multi-cloud agility with simultaneous public cloud access, so users can take advantage of the cloud services of choice, without moving data between clouds.

Build your multi-cloud, your way

Use the cloud you want, when you want.

Combine performance and scale with economics and application services with Dell Technologies APEX Multi-Cloud Data Services.
