

Optimise workload placement through modernised infrastructure & hybrid cloud.

According to an IDC study, adopting a hybrid cloud strategy and modernising your infrastructure can optimise workload placement decisions, resulting in maximised IT and business outcomes.

[Read the full white paper.](#)

IDC study findings:

76%

cited security as the #1 factor in workload placement decisions*

88%

plan to deploy private cloud infrastructure*

44%

improved performance up to 50% with a storage refresh*

76%

of respondents improved productivity by at least 30% as a result of deploying hyperconverged infrastructure*

Make the most of your IT modernisation.

Fragmented multivendor ecosystems can cause major complexity issues when organisations try to modernise their IT infrastructure.

Dell Technologies offers a broad infrastructure portfolio as well as cloud offerings, all manageable through a single consistent infrastructure and operations that are jointly engineered with VMware.
