## COMPANY PROFILE

WATERAX has a long, proud and exciting history of moving water around the world. WATERAX originated as Watson Jack & Company, which was founded in 1898 by Montreal, Quebec native John Colquhoun Watson Jack. Born on August 19, 1870, Jack was a Canadian inventor, businessman and trail-blazer.

Since the 1960s, the MARK-3® series has been the gold standard in performance, reliability and durability. The MARK-3® is the standard wildland portable fire pump trusted by forestry agencies around the world and a truly innovative Canadian success story. Between the 1980s and 2010s the company continued to transform, operating under different banners until it was incorporated into WATERAX in 2014. Based in Montreal, Quebec, today the company exports wildland firefighting equipment to over 50 countries around the world.

WATERAX is a vibrant, Montreal-based company whose work makes a real difference to wildland firefighters worldwide. We're a successful, multi-disciplinary team of professionals who share a core belief in teamwork and reward for a job well done.

A product is only as good as the service behind it. At WATERAX, we back up our quality products with steadfast service. Trust us to be there when you need us.

Quality. Reliability. Trust. Our pumps are as tested and proven as the men and women who use them every day.

## OUR MISSION

The WATERAX mission is to place powerful, precision engineered lightweight portable pumps into the hands of our heroic wildland firefighters to move water to keep people safe, protect our forests and communities from the ravages of wildfires.

# WATERAX'S LONG AND PROUD HISTORY

**1898**

Montreal native John Colquhoun Watson Jack establishes Watson Jack & Co.

**1954**

Watson Jack & Co. and its FH Hopkins subsidiary are acquired by BJ Coghlin & Co.

**1964**

WAJAX acquires Pacific Marine's fire division and is renamed Pacific Pumpers Inc. This move solidifies WAJAX's position as the leading North American manufacturer of forest fire protection products. The MARK-3® brand is introduced and rapidly becomes the standard portable fire pump for wildland, used by forestry agencies around the world.

**1983**

WAJAX sets up its Fire Control Division.

**2000**

Wildfire Fire Equipment is acquired by Tyco International.

**2014**

The business is incorporated as WATERAX to reference the history and know-how of WAJAX.

## TODAY,

The WATERAX brand harnesses the powerful essence of the historical names Watson & Jack Co, WAJAX and Wildfire. By returning to its roots, WATERAX is aligning itself with the original purpose of the company, with a new identity that communicates the core nature of our manufacturing activities and our distinctive portable pump products brand. In other words, we've been moving water for a very long time!

**1925**

John Colquhoun Watson Jack introduces a powerful 200-PSI portable fire pump called the WAJAX (an acronym of his name).

**1959**

The company is renamed Wajax Equipment.

**Early 1980s**

Pacific Pumpers changes its name to WAJAX-Pacific Fire Equipment Inc.

In the ensuing years the company expands beyond wildland fire control to become an industry-leading manufacturer of firefighting equipment for the U.S. industrial and marine markets.

**1995**

Wildfire Fire Equipment, a newly formed company, purchases WAJAX Ltd's Fire Control Division.

**2010**

Wildfire is acquired through a management buyout and renamed to Wildfire Environmental.

**2020**

WATERAX introduces the MARK-3® Watson Edition pump, the first ever purpose-built engine designed specifically for wildland firefighting.

# THE WATERAX WAY

WATERAX is proud to continue its almost century-long tradition of designing, manufacturing and supporting high-performance and durable portable pumps. The key to its success lies in its ability to craft high quality components which form the cornerstone of superior and dependable pump performance.

## DETACHABLE MULTI-STAGE PUMP ENDS

WATERAX performance and dependability come from our superior multi-stage pump end design that provides unrivaled pressure and volume.

Unique blister resistant mechanical rotary seal to prolong pump end longevity. Maintenance free sealed bearing to avoid the need for greasing the pump end in the field. Anodized aluminium impellers and pump body which eliminate galvanic corrosion common with bronze impellers.

## LOW MAINTENANCE DRIVE ASSEMBLY

Originally designed for the BB-4®, the WATERAX low maintenance drive assembly has been time-tested under the most difficult conditions and proven to be dependable and reliable for more than 40 years.

## INNOVATIVE QUICK-RELEASE CLAMP

Our innovative pump end quick-release clamp provides ease of maintenance without having to disassemble the complete unit, thus significantly reducing equipment downtime, which can prove crucial in emergency situations.

## CONVENIENT 2-IN-1 SYSTEM

The WATERAX 2-in-1 system enables the easy interchanging of pump ends in the field. The platform is also compatible with either a high-pressure or a mid-range pump end, providing users with maximal performance flexibility at the lowest possible cost.

# THE WATERAX PLATFORM

WATERAX offers a complete line of high performance pump ends suited to meet the most difficult water handling requirements. The WATERAX platform is composed of a low maintenance drive assembly, a Mid-Range pump end and four high-pressure pump ends. The platform's unique feature is its quick-release clamp system which allows for the hook up of any WATERAX pump end to its drive assembly as well as almost instantaneous pump end detachment and interchange. This reduces equipment downtime, increases its flexibility and significantly cuts costs. These components are ideal for original equipment manufacturers looking to adapt high quality pump ends to their respective fire apparatus.

## WATSON EDITION PUMP END

The Watson Edition Pump End is a 4-stage high-pressure pump end that delivers the same optimized hydraulic efficiency as other pumps in its category, but with 40% less weight due to its corrosion-free composite material and compact frame featuring impellers that are 25% smaller.

**MARK-3® Watson / 4-stage**

## HIGH-PRESSURE PUMP ENDS

The WATERAX high-pressure centrifugal pump ends are offered in 4-stage, 3-stage, and 2-stage configurations. They deliver pressure up to 440 PSI (30.3 BAR) and flows reaching 106 GPM (401 L/min) and are ideal pump ends for moving water over long distance and high elevation.

In addition, all these pump ends have interchangeable spare parts. This helps keep inventory levels and costs low while maximizing the utility and versatility of each stored part. The quality, reliability and durability of these pump ends are what makes them the most trusted in the fire industry.

**12-16S / 4-Stage**

**18-16S / 3-Stage**

**25-16S / 2-Stage**

## MID-RANGE PUMP END

The WATERAX B2X is a Mid-Range 2-stage centrifugal pump end that delivers pressure up to 200 PSI (13.8 BAR) and flows reaching 300 US GPM (1136 L/min). A strong show of pressure and volume it is the ideal pump end for dual attack lines dedicated to wildland & urban interface operations.

It is also perfect for high volume remote watering, booster line applications, brush trucks, slip-on units and for uphill tandem operations. The suction and discharge use a combination of Victaulic and national pipe threads to facilitate its plumbing.

**B2X / 2-Stage**

## DRIVE ASSEMBLY

WATERAX offers an outstanding drive assembly that boosts the performance of pump ends. The drive assembly increases the speed of pump revolutions resulting in increased pressure and volume. The drive assembly is used with the WATERAX quick-release clamp to enable the coupling of the drive assembly to the desired pump end.

**C-7220 / Drive Assembly**

# WATERAX PUMPS

WATERAX has a 120-year track record developing and implementing innovative water-moving solutions designed to withstand the demanding situations and rugged environments in which they are used.

## MARK-3<sup>®</sup> WATSON EDITION

Maintaining the tradition while moving technology forward: the MARK-3<sup>®</sup> Watson Edition plugs right into your existing MARK-3<sup>®</sup> water-moving systems. It will set a new benchmark of excellence for high-pressure fire pumps in the wildland firefighting community for generations to come.

## MARK-3<sup>®</sup> PORTABLE HIGH-PRESSURE FIRE PUMP

The 4-stage detachable pump end patented in 1958 gave birth to the iconic MARK-3<sup>®</sup>. Since WJAX first introduced the MARK-3<sup>®</sup> in 1964, it has been the standard wildland portable fire pump used by forestry agencies around the world. A truly outstanding and reliable performer, the MARK-3<sup>®</sup> fire pump is designed to withstand the rigors of firefighting and it is at the core of most water delivery system in wildland operations.

## BB-4<sup>®</sup> HIGH-PRESSURE FIRE PUMP

The BB-4<sup>®</sup> is a full line of high-pressure centrifugal pumps that has been used by forest agencies for over 40 years in Type 6 brush trucks. It has become the weapon of choice in wildland operations. The BB-4<sup>®</sup> comes in portable & vehicle-mounted configurations and all models feature a unique greaseless sealed bearing and a blister-resistant mechanical rotary seal. The 4-stage pump end on the BB-4<sup>®</sup> is identical to the pump end on the MARK-3<sup>®</sup> unit which greatly reduces your spare parts inventory and improves your ability to respond to unforeseen equipment damage.

## BB-4<sup>®</sup> DIESEL HIGH-PRESSURE FIRE PUMP

The legendary BB-4<sup>®</sup> is available in Diesel! Strong enough to operate as a source pump for tandem and parallel pumping, it is also optimal for direct attack firefighting, remote watering, sprinkler systems, and is a popular choice for slip-on units. The 4-stage pump end on the BB-4<sup>®</sup> is identical to the pump end on the MARK-3<sup>®</sup> unit, which greatly reduces your spare parts inventory and improves your ability to respond to unforeseen equipment damage.

## B2X<sup>™</sup> MID-RANGE PUMP

The B2X<sup>™</sup> is a full line of Mid-Range portable pumps that delivers the best performance of its class with minimal operating costs. The B2X<sup>™</sup> comes in portable & vehicle-mounted configurations and is powered by Briggs & Stratton Vanguard or Honda 4-stroke engines.

## B2X<sup>™</sup> DIESEL MID-RANGE PUMP

A strong show of both pressure and volume makes it the ideal pump for vehicle-mounted applications dedicated to municipal and wildland urban interface operations. The WATERAX quick-release clamp provided on the B2X<sup>™</sup> pump provides ease of maintenance without having to disassemble the complete pump unit thus significantly reducing equipment downtime.

## STRIKER<sup>™</sup> HIGH-PRESSURE FIRE PUMP

The STRIKER<sup>™</sup> is a full line of high-pressure fire pumps powered by Honda 4-stroke engines. Applications include cabin protection, skid units and snow making.

## MINI- STRIKER<sup>®</sup> LIGHTWEIGHT HIGH-PRESSURE FIRE PUMP

The MINI-STRIKER<sup>®</sup> pump pairs a reliable single stage pump end with the Honda 4-stroke 2.1 HP engine. Extremely portable and lightweight this mini powerhouse performs well when used by itself or in tandem with other pumps, and is a very popular choice for entry level skid applications.

## VERSAX<sup>®</sup> MULTIPURPOSE PUMP

The VERSAX<sup>®</sup> is a multipurpose self-priming pump. This unit is driven by a 6 HP or 9 HP Honda engine. This workhorse can be used as a portable pump or on a slip-on unit. Its compact design makes it ideal for a variety of applications such as firefighting, tank filling, water transfers and ATV slip-ons.

PORTABLE  
HIGH-PRESSURE  
FIRE PUMP

# The Next Generation MARK-3® Fire Pump

The **MARK-3®** lightweight portable fire pump has been moving water for forestry agencies around the world since 1964.

It quickly became the gold standard for performance, reliability and durability in wildland firefighting operations.

To improve the MARK-3® pump and update it for the challenges of modern-day wildland firefighting, WATERAX sought the feedback of wildland firefighters.

They challenged WATERAX to cut down size and weight without sacrificing performance and reliability.

While maintaining the iconic look of the classic **MARK-3®** pump, the all-new **MARK-3® Watson Edition** is an entirely new platform that boasts exciting modernized features including the first-ever purpose-built engine for a wildland pump.

**20%** SMALLER    **30%** LIGHTER    **100%** MARK-3®

# A Modern Pump for the Modern Firefighter

Maintaining the tradition while moving technology forward: the **MARK-3® Watson Edition** plugs right into your existing **MARK-3®** water-moving systems. It will set a new benchmark of excellence for high-pressure fire pumps in the wildland firefighting community for generations to come. The **MARK-3® Watson Edition** greatly improves user experience in the following areas:

## Mobility

*Unit is 30% lighter and 20% smaller.*

- Integrated carriage system
- Easy loading / unloading
- Option to backpack engine side up or down
- Integrated carry handle

## Safety

*Pump design and features to improve firefighter safety.*

- Ergonomic carriage system reduces the risk of back injuries
- Padded straps protect shoulders and back from bruising
- Muffler heat shield protects against severe burns
- Lighter pump reduces incidence and severity of slips, trips, falls and transport-related injuries

## User-friendliness

*Smart, intuitive and easy to use.*

- LED visual interface
- Engine operating status
- Troubleshooting function
- Integrated hour meter and tachometer
- High temperature protection

## Ease of start

*Starting a MARK-3® pump has never been this easy!*

- Less force required for easier pull start
- Foothold for improved steadiness
- Engine warm-up indicator
- Anti-flooding feature reduces risk of flooding engine

#### **4-Stage High-Pressure Pump End**

*Same Performance, Less Weight, More Compact*

- 30% smaller impellers
- 50% reduction in pump end weight
- Optimized hydraulic efficiency
- Corrosion-free composite material

#### **High-Performance Engine**

*Smaller, Quieter, More Powerful*

- Unmatched power-to-weight ratio
- Purpose-built
- More power, 30% lighter
- Perfectly optimized for smaller pump end

#### **Modern User Interface**

*Smart and Intuitive*

- Maintenance indicator
- Fuel depletion indicator
- Engine warm-up indicator
- Loss of prime protection (overspeed)
- High temperature protection (overheat)
- Integrated hour meter and tachometer
- USB port for advanced diagnostics
- Bluetooth® connectivity

# MARK-3<sup>®</sup> PORTABLE HIGH-PRESSURE FIRE PUMP

Launched in 1964, the MARK-3<sup>®</sup> lightweight portable pump has been the pump of choice for most wildland fire agencies around the world for decades. Backed by its proven record, the MARK-3<sup>®</sup> pump today is known for high performance, reliability and durability. Its consistent high-pressure output, ability to pump in tandem or series, and toughness to withstand the rigours of firefighting have made the MARK-3<sup>®</sup> the core of most remote water-delivery systems in wildland fire suppression. Following a series of improvements in 2015, today the MARK-3<sup>®</sup> gives new meaning to durability and reliability.

The upgraded version requalified under the USDA Forest Service 100-hour endurance test in San Dimas on 08/04/15 and has been requalified under QPL Number 5100-274.

## AVAILABLE WITH CONFIGURATIONS THAT INCLUDE:

- Fuel tank
- Quick-connect adaptor
- Suction protector

## APPLICATIONS

- Direct attack wildfire operations
- Relay tank pumping for remote watering during firefighting operations
- High-elevation firefighting in mountainous areas
- In series pumping over long distances
- Parallel pumping for higher volumes

## FEATURES AND BENEFITS

- Quick-release clamp and detachable pump end for minimal equipment downtime
- Unique blister resistant mechanical rotary seal to prolong pump end longevity
- Sealed bearing to eliminate pump end greasing in the field
- Aluminum alloy pump components and anodized parts for lighter weight and greater resistance to corrosion

## MARK-3<sup>®</sup> HIGH-PRESSURE FIRE PUMP

When fires occur in remote locations such as wildland forests and mountainous regions, you need a lightweight, robust and compact portable pump, which will allow you to relocate quickly while minimizing fatigue. The MARK-3<sup>®</sup>, with its unmatched power-to-weight ratio and two-stroke engine, is your ideal solution.

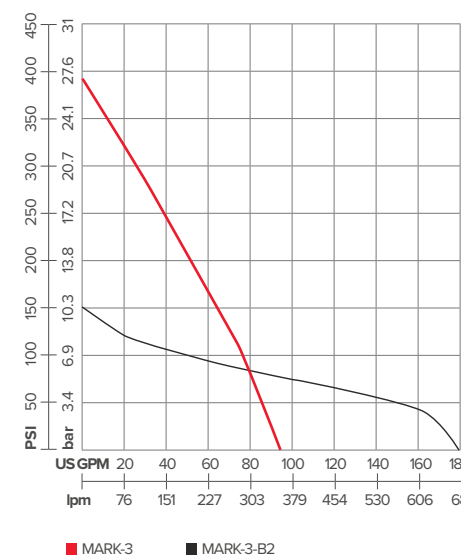

WATERAX acquired the intellectual property and the rights to manufacture the long-lasting 185cc from ROTAX<sup>®</sup>. We invested heavily in new tooling and major improvements on key engine components in order to make the 185cc engine lighter and more durable.

**MARK-3<sup>®</sup>**  
Portable High-Pressure Fire Pump

The WATERAX 185cc engine features the following enhancements:

- Nikasil-coated cylinder
- Impregnated crankcase
- Composite cooling fan
- Longer recoil rope

### MARK-3<sup>®</sup>

Engine brand: WATERAX 185cc  
Engine type: Gas 2-Stroke

#### Flow rate at specified pressure

Maximum pressure: **380 PSI** (26.2 bar)  
Free flow: **98 US GPM** (371 lpm)  
Maximum head: **878'** (268 m)  
Weight: **58 lbs** (27 kg)

Flow Rate			Pressure	
US GPM	(lpm)	@	PSI	(bar)
78	(295)	@	100	(6.9)
65	(246)	@	150	(10.3)
38	(144)	@	250	(17.2)

### MARK-3-B2

Engine brand: WATERAX 185cc  
Engine type: Gas 2-Stroke

#### Flow rate at specified pressure

Maximum pressure: **155 PSI** (10.7 bar)  
Free flow: **180 US GPM** (681 lpm)  
Maximum head: **358'** (109 m)  
Weight: **58 lbs** (27 kg)

Flow Rate			Pressure	
US GPM	(lpm)	@	PSI	(bar)
25	(95)	@	125	(8.6)
65	(246)	@	100	(6.9)
150	(568)	@	50	(3.4)

## MINI BASIN ITEM NO. 300393

The Mini Basin is designed for the secondary containment of hazardous materials from fuel and oil spills that occur when operating engine driven, gasoline and diesel powered equipment. It easily collapses for maximum portability and was designed to fit in the MARK-3<sup>®</sup> kit assembled at numerous fire caches. Strengthening rods, reinforced corners and grommets are provided to add stability and offer a tie-down option.

**Construction:** 22 oz red vinyl.

**Dimensions (deployed):** 32" x 32" x 4" (81 x 81 x 10 cm)  
**(collapsed):** 4 1/2" X 1 1/2" X 32" (10.5 x 3.8 x 81 cm)

## MARK-3<sup>®</sup> PUMP CARRYING PACK ITEM NO. 250117

The C-7404 is a carrying pack designed to transport the MARK-3<sup>®</sup> fire pump. It features adjustable nylon straps and also serves as an effective resting surface for operating the pump on the terrain.

ITEM NO.	MODEL NO.	DESCRIPTION
100137	MARK-3W	MARK-3 <sup>®</sup> Watson Edition
100099	MK3-QS	The MARK-3 <sup>®</sup> -QS model includes quick-connect discharge adaptors and suction-thread protection.
100102	MK3-TQS	The MARK-3 <sup>®</sup> -TQS model includes a fuel tank, quick-connect discharge adaptors and suction-thread protection.
100105	MK3-U	The MARK-3 <sup>®</sup> -U model includes the SAE 45 fuel connector.

\*Product and specifications are subject to change without notice.

\*All pictures shown are for illustration purpose only, actual product may vary due to product enhancement.

# BB-4<sup>®</sup>

HIGH-PRESSURE  
PORTABLE FIRE PUMP

# BB-4<sup>®</sup>

## HIGH-PRESSURE PORTABLE FIRE PUMP

The BB-4<sup>®</sup> is a high-pressure centrifugal pump that has been used by forestry agencies to combat wildfires for over 40 years. It has been the weapon of choice in many wildland operations and is especially suited for type 6 brush trucks. Available in portable and vehicle-mounted configurations, the BB-4<sup>®</sup> pump generates the high pressure required to overcome challenges that arise in difficult terrain. A unique feature of the BB-4<sup>®</sup> pump is the quick-release pump head that is interchangeable with the MARK-3<sup>®</sup>. This greatly reduces spare part inventories and allows for quick infield swap outs.

### AVAILABLE IN DIFFERENT CONFIGURATIONS:

- Portable
- Vehicle-mounted
- Horizontal and vertical drive orientation
- Engine-mount control panel
- Fuel tank
- Exhaust primer

### APPLICATIONS

- Direct attack wildfire operations
- Slip-on units
- Relay tank pumping for remote watering during firefighting operations
- High-elevation firefighting in mountainous areas
- In series pumping over long distances
- Parallel pumping for higher volumes

### FEATURES AND BENEFITS

- MARK-3<sup>®</sup> compatible quick-release clamp and detachable pump end for minimal equipment downtime and inventory
- Unique blister resistant mechanical rotary seal to prolong pump end longevity
- Sealed bearing to eliminate pump end greasing in the field
- Drive assembly for reliable, low maintenance performance
- Aluminum alloy pump components and anodized parts for lighter weight and greater resistance to corrosion
- Multiple engine types available
- Choice of manual, electric or exhaust priming
- Fastwire included on all vehicle-mounted units
- EPA certified

Portable

Vehicle-Mount Horizontal Drive

Vehicle-Mount Vertical Drive

### BB-4-18P

Engine brand: Briggs & Stratton Vanguard  
Engine type: Gas 4-Stroke

**Flow rate at specified pressure**  
Maximum pressure: **440 PSI** (30.3 bar)  
Free flow: **104 US GPM** (394 lpm)  
Maximum head: **1015'** (309 m)  
Weight: **153 lbs** (69 kg) – **194 lbs** (88 kg)

Flow Rate			Pressure	
US GPM	(lpm)	@	PSI	(bar)
99	(375)	@	150	(10.3)
80	(303)	@	250	(17.2)
49	(185)	@	350	(24.1)

### BB-4-21H

Engine brand: Honda GX630  
Engine type: Gas 4-Stroke

**Flow rate at specified pressure**  
Maximum pressure: **440 PSI** (30.3 bar)  
Free flow: **106 US GPM** (401 lpm)  
Maximum head: **1015'** (309 m)  
Weight: **169 lbs** (77 kg)

Flow Rate			Pressure	
US GPM	(lpm)	@	PSI	(bar)
105	(397)	@	150	(10.3)
94	(356)	@	250	(17.2)
65	(246)	@	350	(24.1)

### BB-4-23VX

Engine brand: Briggs & Stratton Vanguard  
Engine type: Gas 4-Stroke

**Flow rate at specified pressure**  
Maximum pressure: **440 PSI** (30.3 bar)  
Free flow: **106 US GPM** (401 lpm)  
Maximum head: **1015'** (309 m)  
Weight: **154 lbs** (70 kg) – **194** (88 kg)

# BB-4<sup>®</sup>

## HIGH-PRESSURE FIRE PUMP DIESEL

The BB-4<sup>®</sup> diesel high-pressure fire pump pairs the proven WATERAX 4-stage high-pressure pump end with a powerful Kubota D902 25 HP diesel engine. Compatible with type 4, type 5, type 6 brush trucks and listed on the USFS type 6 Fire Apparatus specifications, the diesel BB-4<sup>®</sup> pump is suited to operate in a variety of fire operations. This unit is optimal for direct attack, remote watering, sprinkler systems and is popular for slip-on units.

### AVAILABLE IN DIFFERENT CONFIGURATIONS:

- Horizontal and vertical drive orientation

### APPLICATIONS

- Brush trucks
- Attack line firefighting
- Long hose lay for remote watering during firefighting operations
- High-elevation firefighting in mountainous areas
- High pressure provides accuracy in flow trajectory
- In series pumping over long distances
- Parallel pumping for higher volumes

### FEATURES AND BENEFITS

- 4-stage pump end compatible with MARK-3<sup>®</sup> pump for in-field exchanges
- Quick-release clamp for minimal equipment downtime
- Sealed bearing to eliminate pump end greasing in the field
- Belt drive system for reliable, low maintenance performance
- Aluminum alloy pump components and anodized parts for lighter weight and greater resistance to corrosion
- EPA certified

### BB-4-D902

This high-pressure fire pump has been used by forest agencies in Type 6 brush trucks for over 40 years. The BB-4<sup>®</sup> Diesel comes in a vertical pump drive mount as standard, with a horizontal-drive mount optional. It is powered by the Kubota D902 Super Mini-Series 3-cylinder liquid-cooled diesel engine.

### D902-E4B

Engine brand: Kubota D902-E4B  
Engine type: Diesel

**Flow rate at specified pressure**  
Maximum pressure: **395 PSI** (27.2 bar)  
Free flow: **106 US GPM** (401 lpm)  
Maximum head: **911'** (278 m)  
Weight: **280 lbs** (127 kg)

Flow Rate			Pressure	
US GPM	(lpm)	@	PSI	(bar)
103	(390)	@	150	(10.3)
95	(360)	@	250	(17.2)
55	(208)	@	350	(24.1)

ITEM NO.	MODEL NO.	DESCRIPTION
100095	BB-4 <sup>®</sup> -D902V	The BB-4 <sup>®</sup> -D902V is standardly configured with a vertical-drive unit and FastWire cable with 14-pin connectors. Optional features include: electronic primer, rain cap, forestry-spark arrestor, and panel-mount control panel.
100097	BB-4 <sup>®</sup> -D902H	The BB-4 <sup>®</sup> -D902H is standardly configured with a horizontal-drive unit and FastWire cable with 14-pin connectors. Optional features include: electronic primer, rain cap, forestry-spark arrestor, and panel-mount control panel.

# B2X™

MID-RANGE PORTABLE  
FIRE PUMP

# B2X™

## MID-RANGE PORTABLE FIRE PUMP

The B2X pump is a mid-range fire pump, available in vehicle-mounted and portable configurations, dedicated to wildland and urban interface operations. The various models are powered by choice of Briggs and Stratton Vanguard or Honda 4-stroke engines. Combining both pressure and volume, it is ideal for dual attack line operations, remote water transfer and structure protection. The B2X delivers the best performance of its class with minimal operating costs. Unlike other pumps, the B2X uses a low maintenance drive-belt system that provides efficient and dependable performance.

### AVAILABLE IN DIFFERENT CONFIGURATIONS:

- Portable
- Vehicle-mounted
- Horizontal and vertical drive orientations
- Engine-mount control panel
- Fuel tank
- Exhaust primer

### APPLICATIONS

- Interface wildfire operations
- Vehicle-mounted applications
- Brush trucks
- Initial attack units
- Slip-on units
- Structure protection
- Water transfer
- Boat fire pump
- Simultaneous attack lines

### FEATURES AND BENEFITS

- Quick-release clamp and detachable pump end for ease of maintenance and minimal equipment downtime
- Unique blister resistant mechanical rotary seal to prolong pump end longevity
- Sealed bearing to eliminate pump end greasing in the field
- Drive assembly for reliable, low maintenance performance
- Aluminum alloy pump components and anodized parts for lighter weight and greater resistance to corrosion
- Fastwire included on all vehicle-mounted units
- EPA certified

Portable

# B2X™

## MID-RANGE PUMP DIESEL

The B2X-D902 diesel unit is a mid-range fire pump ideal for brush trucks used in wildland and urban interface operations. A strong show of both pressure and volume makes it the ideal pump for vehicle-mounted applications dedicated to municipal operations and in wildland urban interface areas. The WATERAX quick-release clamp provided on the B2X pump provides easy maintenance without the need to disassemble the complete pump unit, which significantly reduces equipment downtime.

### AVAILABLE IN DIFFERENT CONFIGURATIONS:

- Horizontal and vertical drive orientation

### APPLICATIONS

- Vehicle-mounted applications
- Brush trucks
- Initial attack units
- Slip-on units
- 2 x 1-1/2" simultaneous attack lines
- Structure protection
- Water transfer
- Boat fire pump

### FEATURES AND BENEFITS

- Detachable pump end for ease of maintenance
- Drive-belt system for reliable, low maintenance performance
- Aluminum alloy pump components and anodized parts for lighter weight and greater resistance to corrosion
- EPA certified

## B2X-D902

The B2X™ Diesel comes in a vertical pump drive mount as standard with a horizontal drive mount optional. It is powered by the Kubota D902 Super Mini-Series 3-cylinder liquid cooled diesel engine.

### D902-E4B

Engine brand: Kubota D902-E4B  
Engine type: Diesel

**Flow rate at specified pressure**  
Maximum pressure: **180 PSI** (12.4 bar)  
Free flow: **310 US GPM** (1173 lpm)  
Maximum head: **415'** (127 m)  
Weight: **280 lbs** (127 kg)

Flow Rate			Pressure	
US GPM	(lpm)	@	PSI	(bar)

MORE IN IT FOR YOU

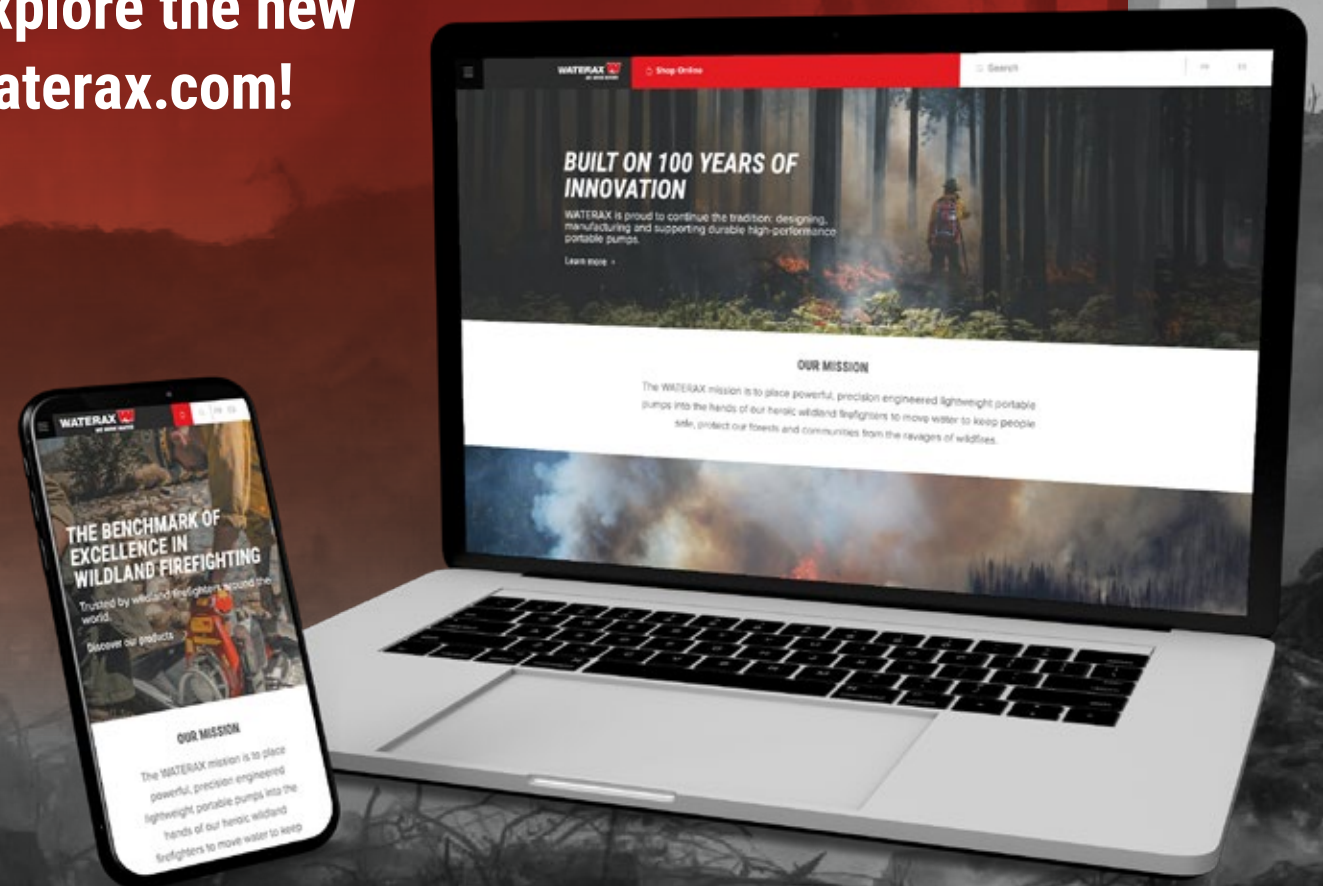

# YOU'LL BE PUMPED ABOUT OUR NEW WEB SITE!

A fresh new look. Easier to navigate. Mobile friendly.

With its practical pump selector and other new features, our new site is an information tool that makes product research and procurement easier for you! Even our [e-store](#) got a makeover!

Plus interactive maps for finding dealers and repair centers, everything to make your WATERAX experience even smoother.

## Explore the new waterax.com!

A photograph of a forest fire. The sun is low in the sky, creating a hazy, orange glow. The ground is covered in dry brush and small fires. The text 'STRIKER' is overlaid in large white letters on the right side of the image.

# STRIKER<sup>®</sup>

HIGH-PRESSURE  
PORTABLE FIRE PUMP

# STRIKER®

## HIGH-PRESSURE PORTABLE FIRE PUMP

STRIKER® high-pressure pumps pair a Honda 4-stroke engine with either 2 or 3 stage WATERAX pump end. Applications include skid units, cabin protection and snowmaking. They share common parts with the MARK-3® and BB-4® pumps and are renowned for the same durability and reliability.

### APPLICATIONS

- Direct attack firefighting operations
- Long hose lay for remote watering during firefighting operations
- High-elevation firefighting in mountainous areas
- In series pumping over long distances
- Parallel pumping for higher volumes
- Slip-on units
- Snowmaking

### FEATURES AND BENEFITS

- Quick-release clamp and detachable pump end for minimal equipment downtime and inventory
- Unique blister resistant mechanical rotary seal to prolong pump end longevity
- Sealed bearing to eliminate pump end greasing in the field
- Drive-belt system for reliable, low maintenance performance
- Aluminum alloy pump components and anodized parts for lighter weight and greater resistance to corrosion
- Fastwire included on all vehicle-mounted units
- EPA certified

### STRIKER II® HIGH-PRESSURE 2-STAGE FIRE PUMP

The WATERAX STRIKER II®, pairs a reliable 2-stage pump end with a Honda 4-stroke engine. It can be used by itself, in tandem or in parallel with other WATERAX pumps. It is also a very popular choice for slip-on applications.

Portable

### STRIKER-3 HIGH-PRESSURE 3-STAGE FIRE PUMP

The WATERAX STRIKER-3 also known as ULTRAstriker® provides additional pressure useful to overcome longer distance and elevation. It can be used by itself, in tandem or in parallel with other WATERAX pumps.

Vehicle-Mount

#### STRIKER II®

Engine brand: Honda, GX390 Series  
Engine type: Gas 4-Stroke

**Flow rate at specified pressure**

# MINI- STRIKER<sup>®</sup>

LIGHTWEIGHT  
HIGH-PRESSURE  
FIRE PUMP

# MINI-STRIKER®

## LIGHTWEIGHT HIGH-PRESSURE FIRE PUMP

The MINI-STRIKER® is a portable and lightweight pump that is well suited for initial attack operations and is a very popular choice for entry level skid applications. The MINI-STRIKER® fire pump combines a single-stage pump end powered by a reliable Honda 4-stroke 2.5 HP engine to generate class leading performance.

### APPLICATIONS

- Initial attack firefighting
- Sprinkler operations
- Entry level slip-on units
- Cottage protection

### FEATURES AND BENEFITS

- Lightweight aluminum alloy pump components
- Portable and compact
- Reliable 4-stroke Honda engine
- Robust carrying handle
- Integrated fuel tank
- Optional turnkey cart system

Portable

Vehicle-Mount Configuration

### GXH50

Engine brand: Honda GXH50 Series  
Engine type: Gas 4-stroke

**Flow rate at specified pressure**  
Maximum pressure: **85 PSI** (5.9 bar)  
Free flow: **80 US GPM** (303 lpm)  
Maximum head: **196'** (60 m)  
Weight: **20 lbs** (9 kg) – **103 lbs** (47 kg)

**VERSAX<sup>®</sup>**

**MULTIPURPOSE  
PUMP**

# VERSAX®

## MULTIPURPOSE PUMP

The VERSAX® is a versatile, rugged and economical twin-impeller self-priming pump powered by a Honda engine. It provides superior water-transfer performance as well as the ability to combat fire from greater distances and points of elevation. The VERSAX® is a multipurpose fire pump that can also be used for other applications such as tank filling, water transfers and as ATV slip-on units.

### APPLICATIONS

- Firefighting
- Tank filling
- High head general water transfer
- Boom spraying
- Irrigation
- ATV slip-ons

### FEATURES AND BENEFITS

- Twin-impeller design provides additional pressure for longer and higher pumping applications
- Pump casing and diffusers manufactured from quality corrosion-resistant grade aluminum for long life
- Nylon glass fibre reinforced impellers are fully corrosion-proof and lightweight
- Removable discharge and suction ports
- Provide quick access inside the pump volute
- Cost-effective ports replacement in case of damage (e.g. damaged threads)
- 3-way discharge port for easy installation
- Powder-coated casing for added corrosion resistance
- Self-priming for more versatile installation options
- Easy access to drain port
- Low oil protection
- Fastwire™ included on all vehicle-mounted units
- Comprehensive user and service manuals
- EPA certified

# HIGH-PRESSURE PUMP ENDS

WATERAX offers a complete line of high performance pump ends suited to meet the most difficult water handling requirements. The performance and dependability of our pumps come from our superior multi-stage pump end design, patented in 1958, that provides unrivaled pressure and volume.

- Unique blister-resistant mechanical rotary seal to prolong pump end longevity
- Maintenance-free sealed bearing to avoid the need for greasing the pump end in the field
- Anodized aluminium impellers and pump body which eliminate galvanic corrosion common with bronze impellers

WATERAX high-pressure centrifugal pump ends are offered in 4-stage, 3-stage and 2-stage configurations. They deliver pressure up to 440 PSI (30.3 bar) and flows reaching 310 US GPM (1173 lpm) and are ideal pump ends for moving water over long distances and high elevations.

Visit the WATERAX online store to purchase exclusive genuine spare parts for your multi-stage high-pressure centrifugal pump ends.

Access all related documents, such as support documents, tech notes, data sheets, owner's manuals and educational videos at the WATERAX online store.

\*Grease gun no longer included in tool kit. Can be ordered separately.

# FUEL TANK ACCESSORIES FOR THE MARK-3®

## METAL JERRY CAN MODEL NO. 600376

Heavy-duty construction throughout, this pick-up portable unit has no petcock or other cumbersome protrusions. Its self-sealing quick coupler enables gasoline line to be changed from one can to another in seconds. 5 US gals (18.9 L).

- US Forest Service approved.
- NSN 7240-01-044-5523

## AIR TRANSPORT FUEL TANK MODEL NO. 600429

Tough, lightweight, and rust proof with its unique and integrated fuel supply adaptor, this container meets the rigid US Military and UN standards (certification #MIL-C-53109). It is the only container to be registered by Transport Canada for UN performance packaging (certification #UN 3H1 / Y1.0 / 200 / yy / Can / Spr 2 456 / 2.3mm). Seamless all-plastic material, permanently "olive drab" coloured finish. 5.3 US gals (20 L). Includes inner filter and ball-type 1/4-turn fuel supply adaptor B-7462.

- Approved for air transport via rotary or fixed wing aircraft.

B-7462  
Sold separately

## MARINE FUEL TANK MODEL NO. 800863

The slim design of this marine fuel tank allows storing standing up or lying down. Comes with a standard fuel gauge. UL and CSA standards certification for portable marine fuel tanks. High-density polyethylene, permanently red coloured finish.

- Capacity of 6.6 US gals (25 L) or 3.2 US gals (12 L).

Tanks sold separately
