Can we add the version number here too?

Marc Rodrigues
Mon, Aug 10, 2020

Of course, Jane.

Please also note that we changed our version numbering. We went from 4.2 to 6.4 to be in line with Collabora Office on the desktop.

The screenshot shows a Microsoft Word document titled 'fields.doc' containing a form for the New Zealand Customs Service. The form is titled 'INWARD REPORT (SHIPS AND BOATS OTHER THAN SMALL CRAFT)' and is labeled 'Form C1'. It features the New Zealand Customs Service logo and the Māori motto 'Te Mana Arai o Aotearoa'. The form is divided into sections, with 'PART A: ARRIVAL DETAILS' containing a table with the following fields:

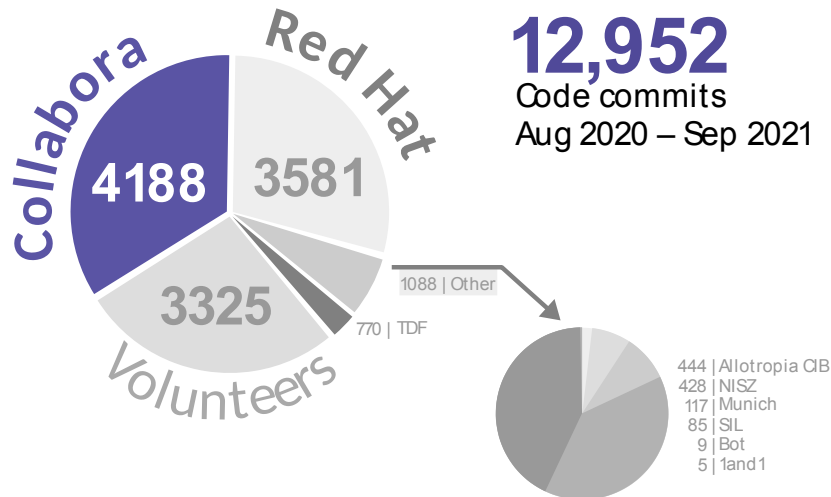

Name of ship	Port of arrival
Date of arrival	Time of arrival
Name of person in charge	Port arrived from
IMO number	Name and address of ship's agent in New Zealand
Gross register tonnes	
Period of stay in New Zealand	

Below the table is a section titled 'IF CARRYING CARGO, BRIEF DESCRIPTION'.

Built on LibreOffice Technology

- 200+ million LibreOffice user-base
- ~1000 people helping to develop LibreOffice
 - 100 localization teams
- Product developed in public: outer-source

Berlin: Federal Ministry of Economics and Technology

City of Rome: Capitol Hill

Performance Wins

Performance breakdown

Coolwsd / core work

- Major improvements in raw data-transfer
 - download, print, presentation

Faster rendering

- Font caching, image scaling
- Faster opening times of document types
- Faster invalidation, scaling to more concurrent users in one document.

Asynchronous (auto) save

- Don't pause while the EFSS backend / WOPI-like transaction completes.

Solves autosave 'stalls' while typing.

Saving document, please wait...

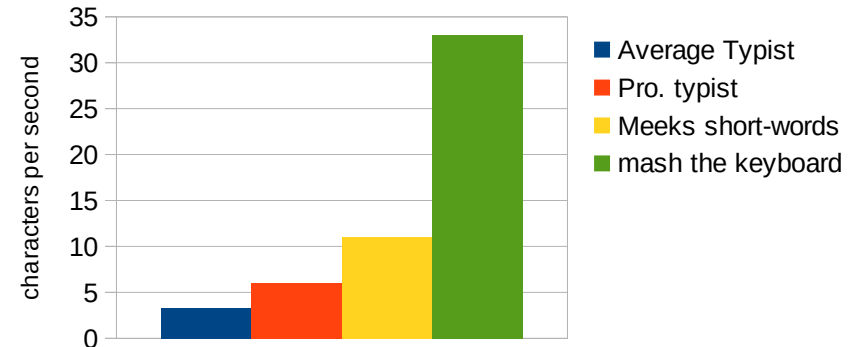

Performance: typing fast ...

- Customer: “we tested it with eight people doing random typing”
- Profiled this use-case; it is/was slow
 - The mis-spelling squiggly-line (cf. wrong language setting?) ...
 - an unfeasible amount of CPU ~90% of rendering time
 - A most beautiful sub-divided, AA b-spline but ... ~2 pixels high mostly
- Mashing the keyboard a pathological case: we’re still working on improving
 - [Test your speed here](#)
- Consider Calc with lots of mis-spelling

Sdf sadf kjh lkshdfk ashdfkjasdhdkf
slkdfhkasdh flksjdh f;ksah dflk kwe
iuh ks,dnf;yi o;wae ,n sadlkjfh

Mashing the keyboard as a test

~10x as bad as reality

Profiling: Javascript was slow: surprise

JS in the browser mostly our bottleneck

- batch-processing of websockets: much faster
 - Don't render one frame per message
- group table handle / cursor movement / DOM re-building → 15x faster
- Reduce GC pressure on image handling
- Kick-out a poorly optimized node module or two.

Interactivity / client-side rendering

- Client-side Calc grid rendering
- Client-side writer page rendering

Work continues here ...

New features to 21.11

RTL support: Arabic, Hebrew, ...

The screenshot shows Microsoft Excel with a spreadsheet containing Arabic text. A dialog box titled "نمط الصفحة: المبدئي" (Page Layout: Default) is open, showing settings for page orientation, margins, and printing options. The spreadsheet content includes a table of Arabic numbers and a list of Arabic words.

Precisely anchor & reflow your boat (and other) images

The screenshot displays a Microsoft Word document with the following content and interface elements:

- Text on the left:**

is no standard definition, so the term applies here to sailing vessels that have a cabin with amenities that accommodate overnight use. To be termed a "yacht", as opposed to a "boat", such a vessel is likely to be at least 33 feet (10 m) in length and have been judged to have good aesthetic qualities.[4] [Sailboats](#) that do not accommodate overnight use or are smaller than 30 feet (9.1 m) are not universally called yachts. Sailing yachts in excess of 130 feet (40 m) are generally considered to be [yachts](#). [5]

Sailing [yachts](#) are actively used in sport and are among categories recognized by the governing body of sailing sports, [World Sailing](#). [6]

Etymology

Sailing yachts are actively used in sport and are among categories recognized by the governing body of sailing sports, [World Sailing](#). [6]

The term, *yacht*, originates from the [Dutch](#) word *jacht* (pl. *jachten*, which means "hunt"), and originally referred to light,
- Text on the right:**

pleasure boats begins with rowed craft in Pharaonic Egyptian times. The history of sailing yachts begins in Europe in the beginning of the 17th century. [James I of England](#). Pleasure vessels acquired the name *yacht* who spent time exiled in Europe and a variety of *jachten* were already well developed as ple his restoration to the English crown, a series of royal yachts, which included at the [Dutch](#) *catamaran*. The first recorded yacht race Charles vessels occurred in 1661, followed by the first open sailing competition in 1663 in English waters. [8]
- Images:**

MORE INFORMATION

[🏠](#) » [Introduction](#)

Introduction

This document will help you integrating with your existing solution. Users can edit the documents hosted in the file storage via web interface.

For this to work, you have to setup and connect several parts to the solution:

- Server for hosting Collabora Online
- Website that presents iframe with the editing capabilities
- Authentication
- Connection to the file storage

The easiest way to integrate Collabora Online is using the WOPI (Web Open Platform Interface) protocol.

Collabora Online implements a protocol inspired by the WOPI (Web Open Platform Interface) protocol. Using the WOPI vocabulary as well as the Collabora Online is a *WOPI client* that can be integrated with a solution: web application and file storage). WOPI is a well documented protocol. For more details please visit the [WOPI documentation](#).

Integration improvements

Nextcloud Office

Integrated, matching themed graphical goodness & innovation ...

- *thanks to Jan, Julius, Szymon, Andreas, Pedro, Kendy ...*

The screenshot shows the Nextcloud Office interface for editing a document named 'test.odt'. The top menu bar includes 'File', 'Edit', 'View', 'Insert', 'Format', 'Table', 'Tools', and 'Help'. The toolbar contains various editing tools like undo, redo, bold, italic, underline, strikethrough, text color, background color, bulleted list, numbered list, and indent. The main editing area displays a document template with the following content:

Your company name or logo

Your company · Street name 123 · 12345 City name

Recipient company name	Invoice no.: 1234501
Street name 123	Project no.: 123456789
12345 City name	Customer no.:12345
Country	Date: 27. Nov 2021

Dear Reader,

thank you for your order. The breakdown is as follows:

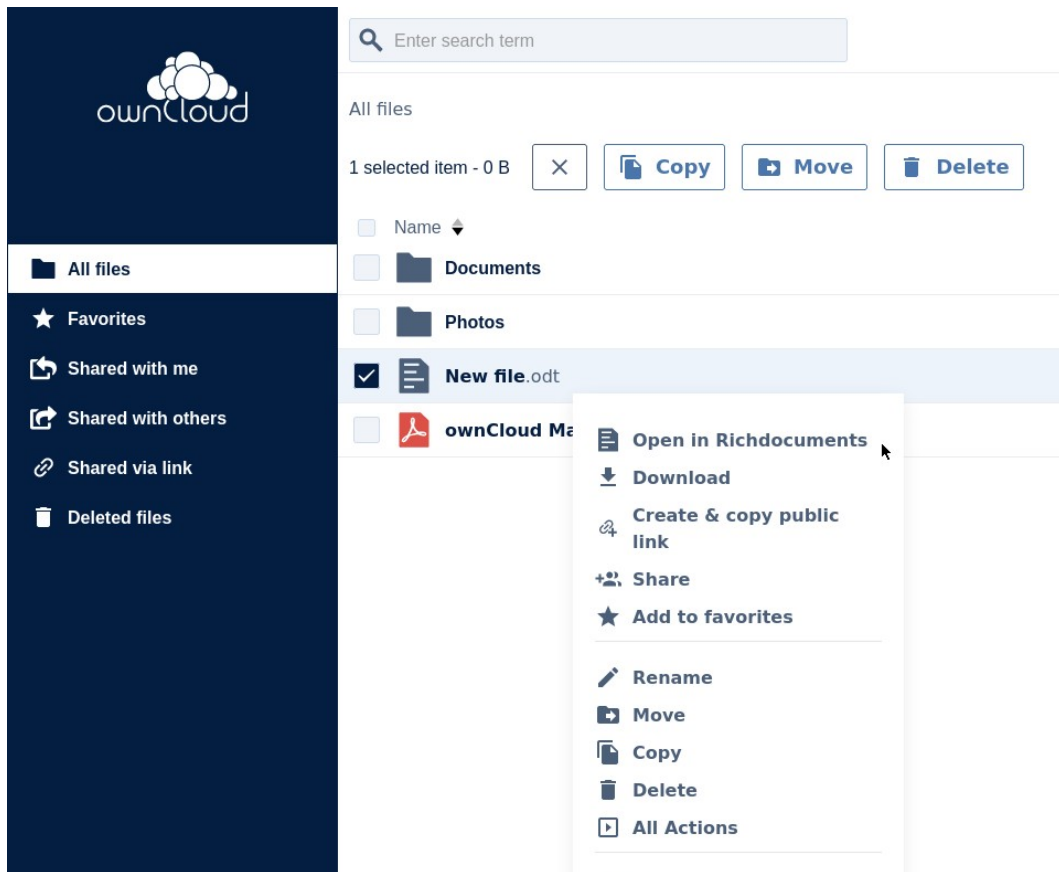

Item	Description	Quantity	Price	Total

The right-hand sidebar shows the 'Style' panel with 'Default Paragraph Style' selected, and the 'Character' panel with 'Source Sans Pro' font and '12 pt' size. The 'Paragraph' panel shows alignment and list options. The 'Spacing' and 'Indent' panels are also visible at the bottom of the sidebar.

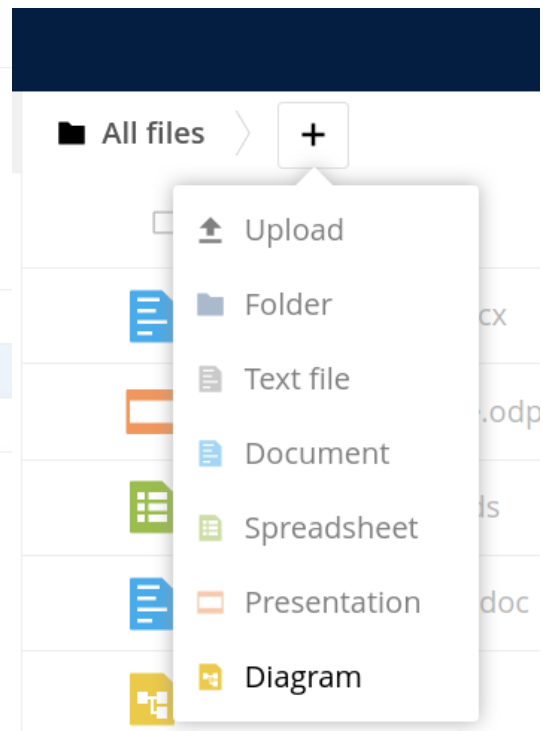

ownCloud Web & OCIS ...

Native integration into ownCloud Web

The screenshot shows the ownCloud Web interface. On the left is a dark blue sidebar with the ownCloud logo and navigation options: All files, Favorites, Shared with me, Shared with others, Shared via link, and Deleted files. The main content area has a search bar at the top. Below it, the 'All files' section shows '1 selected item - 0 B' with buttons for Copy, Move, and Delete. A list of files is displayed with columns for selection, name, and type. The file 'New file.odt' is selected, and a context menu is open over it, listing actions: Open in Richdocuments, Download, Create & copy public link, Share, Add to favorites, Rename, Move, Copy, Delete, and All Actions.

Diagram integration ...

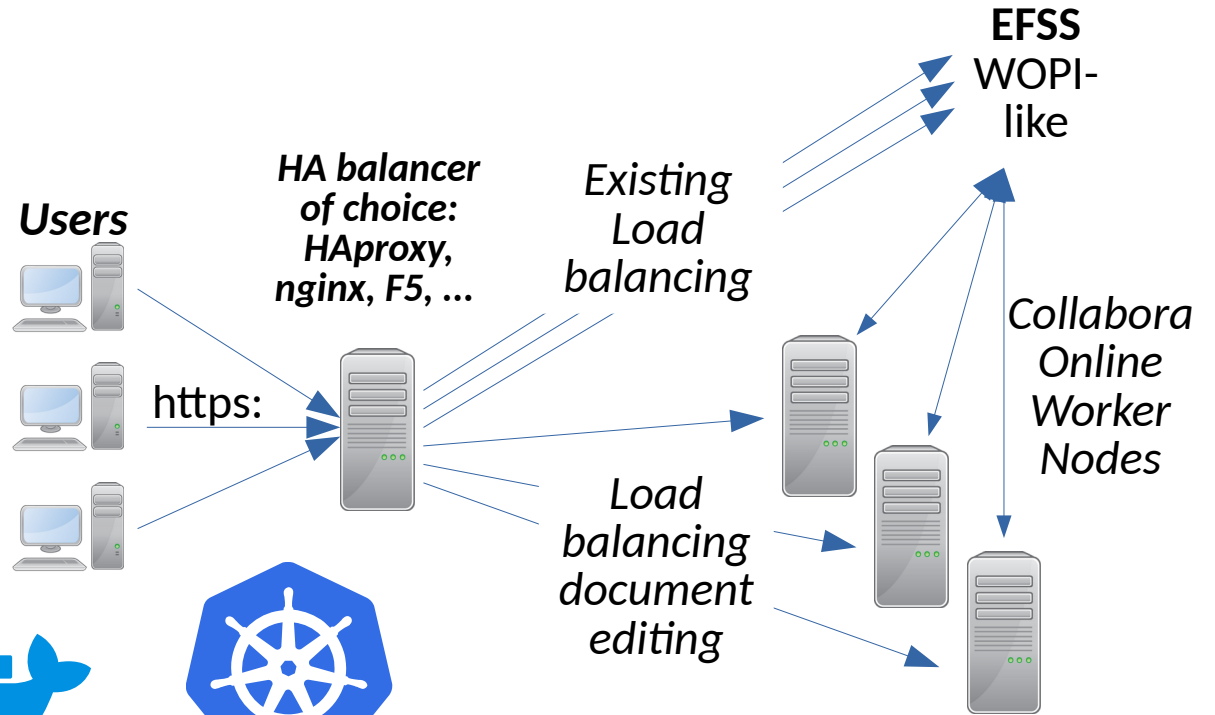

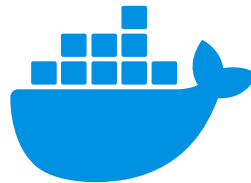

The screenshot shows the 'All files' section of the ownCloud Web interface. A plus sign button is clicked, opening a dropdown menu with the following options: Upload, Folder, Text file, Document, Spreadsheet, Presentation, and Diagram. The 'Diagram' option is highlighted, indicating the integration of diagram files into the file system.

Easy to deploy

High availability - clustered COOL

On the server

- High availability
- Server balancing
- Management (eg. Kubernetes)

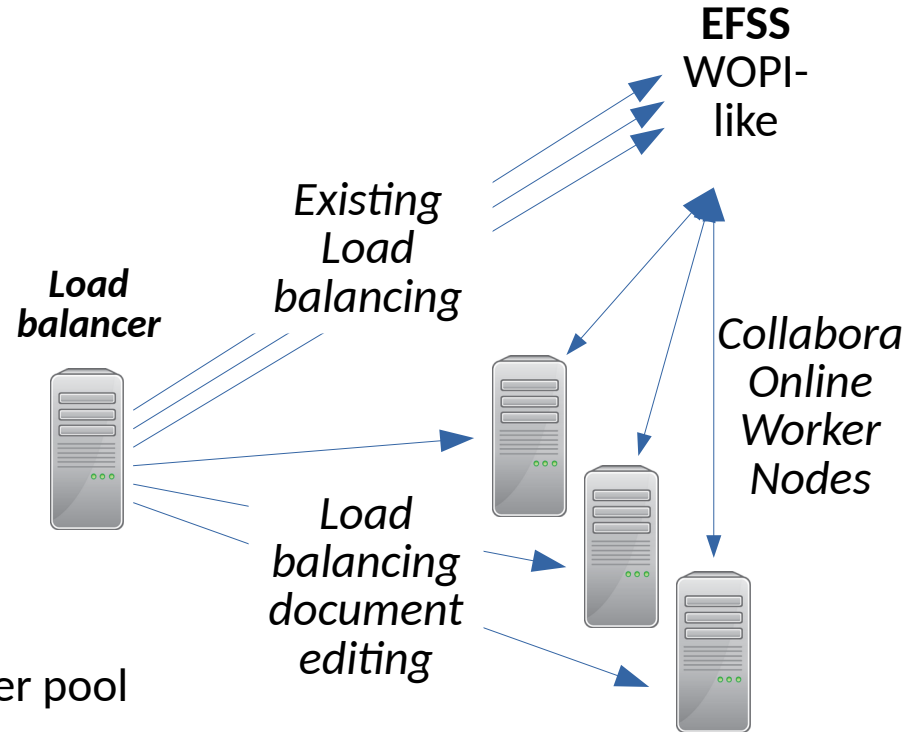

Incremental upgrade-ability ...

Simple: foreach (node)

- Remove one from the load balancer
- Either:
 - Wait for documents to expire
 - Or shut it down to evict users
 - Saving document state
 - Which is re-loaded on another node
- Upgrade node and re-insert into balancer pool

eg. SURF Drive - Dutch Academic network

- 59 institutes, 66,000 users – and 99.996% availability.

Demand scaling / Kubernetes ...

Example 1&1 ([cf. COOL-days talk](#))

- Kubernetes
 - Dynamic load scaling / balancing
- Office Viewer:
 - 100+ instances of COOL
 - 600k conversions / 24hrs
- Office Online Editor
 - 100+ instances of COOL
 - 35,000 edited docs / 24hrs
- 1&1 → huge European hoster: mail.com, gmx.de, web.de etc.
- IONOS / STRATO → also a partner.

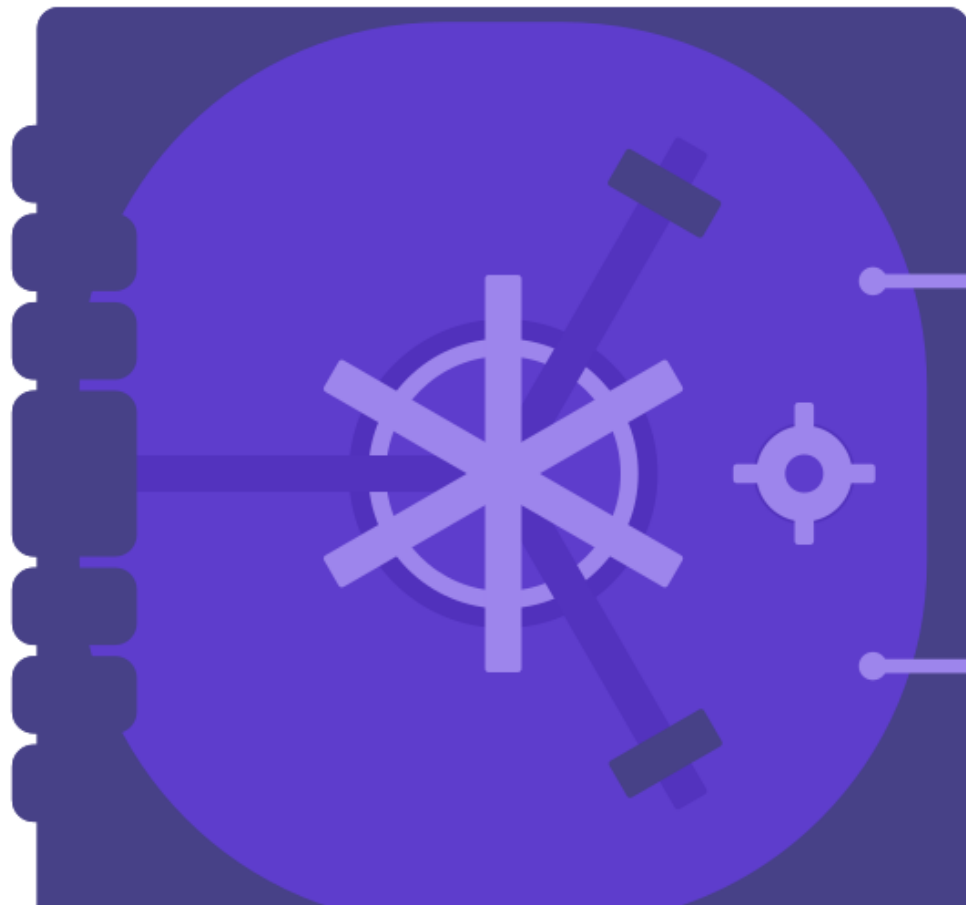

Distinctives

Things you don't get elsewhere

Digital Sovereignty: avoid the data-trap

don't let your document data out of your site [sic]

on your premise / Private network

Virtual machine / Docker container

Seccomp-bpf ~no sys-calls

Extremely sparse filesystem

Chroot per document

Systematic load crash testing

Industry beating coverity score

LibreOfficeKit

rendering instance

- Document data is held in your server room
 - GDPR / jurisdictional compliance par excellence.
- Not sent to every single device to be controlled by the browser + JS + local debugger.
- C'bra sends pixels to clients.

Simple: setup, pricing, support

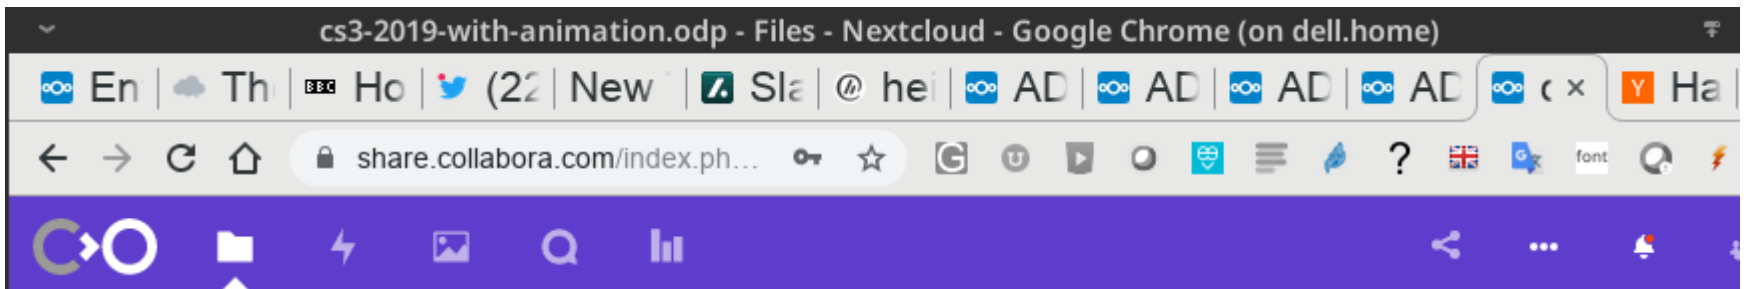

“Are you sure you only need a load-balancer for HA ?”

“Nothing to ask, followed the docs, easy to setup, if only all my problems were that easy”

As many servers & connections & VMs as you need

Dynamically scale your workloads with **Kubernetes**

Beware of the Window + Tabpocalypse: pay just once per user ...

Collabora Online

Conclusions

Collabora Online – best of breed

- Free your documents and yourself
- Easy to setup, maintain & scale
- Secure architecture – easy to comply
- Rapid development & improvement
- Full feature Office + excellent interoperability
- Built by a large community on LibreOffice Technology
- Sensible support & development model

Thanks for listening Questions ?

Oh, that my words were recorded, that they were written on a scroll, that they were inscribed with an iron tool on lead, or engraved in rock for ever! I know that my Redeemer lives, and that in the end he will stand upon the earth. And though this body has been destroyed yet in my flesh I will see God, I myself will see him, with my own eyes - I and not another. How my heart yearns within me. - Job 19: 23-27
