

Dell Technologies and VMware's Commitment to Joint Innovation

How we're moving forward, together.

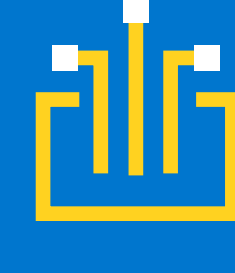

Dell Technologies and VMware have a long history of innovation and technical achievement

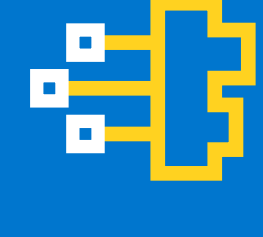

We are grounded in collaboration, joint engineering and strength in partnership. We are committed to providing unique value to our shared customers, delivering integrated IT platforms and multi-cloud solutions that accelerate digital transformation.

Reimagine HCI with VxRail

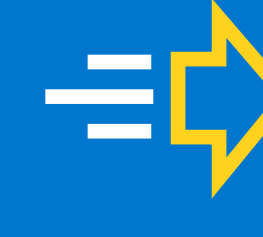

With the launch of VxRail in 2016, not only did we secure our joint engineering relationship, we changed the future of HCI. By providing seamless integration with existing VMware tools, we provide VMware customers with an experience with which they were already familiar.

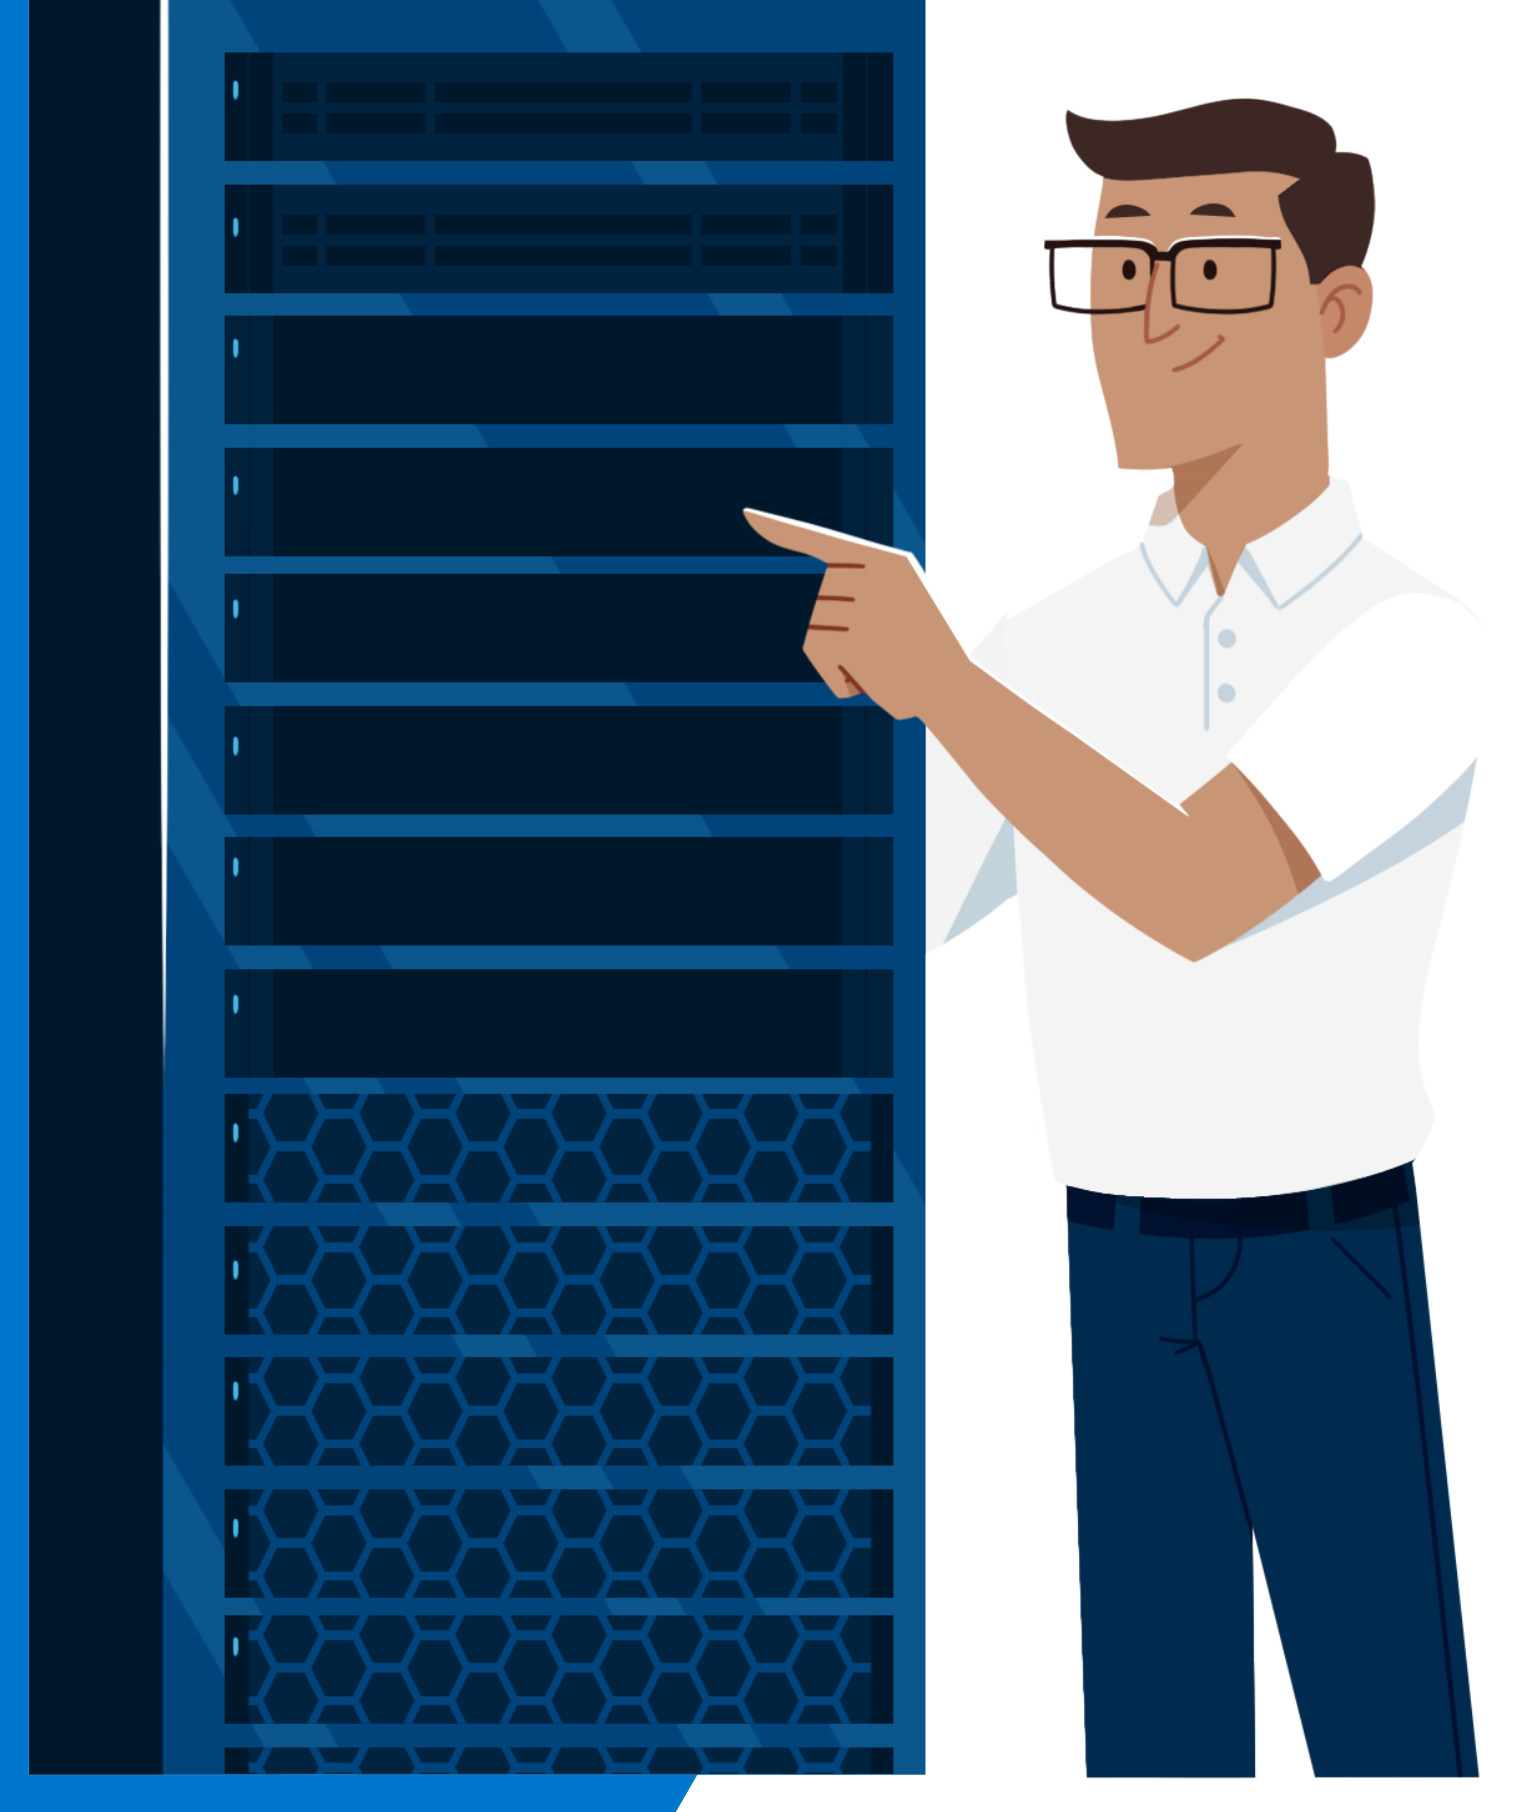

AUTOMATE

INNOVATE

ACCELERATE

The Future of Work from Anywhere

Dell Technologies and VMware collaborate to help IT deploy, secure, manage and support virtually all devices from the cloud with Dell Unified Workspace powered by Workspace ONE. This approach to end-user computing gives workers a frustration-free, ready-to-work experience - in any location. Unified Workspace delivers IT an automated, open, and intelligent solution for management.

Protect Your Data from Endpoint to Infrastructure

Dell Technologies and VMware offer a portfolio of end-to-end products, solutions and services with intrinsically secure infrastructure and devices, comprehensive threat detection and response, data protection and cyber recovery.

Accelerating modern applications

VMware Tanzu on Dell VxRail makes your cloud-native strategy easy. Leveraging consistent infrastructure and operations which support faster application development and lifecycle management, this solution delivers the latest Kubernetes features and tools.

APEX

CLOUD SERVICES

WITH

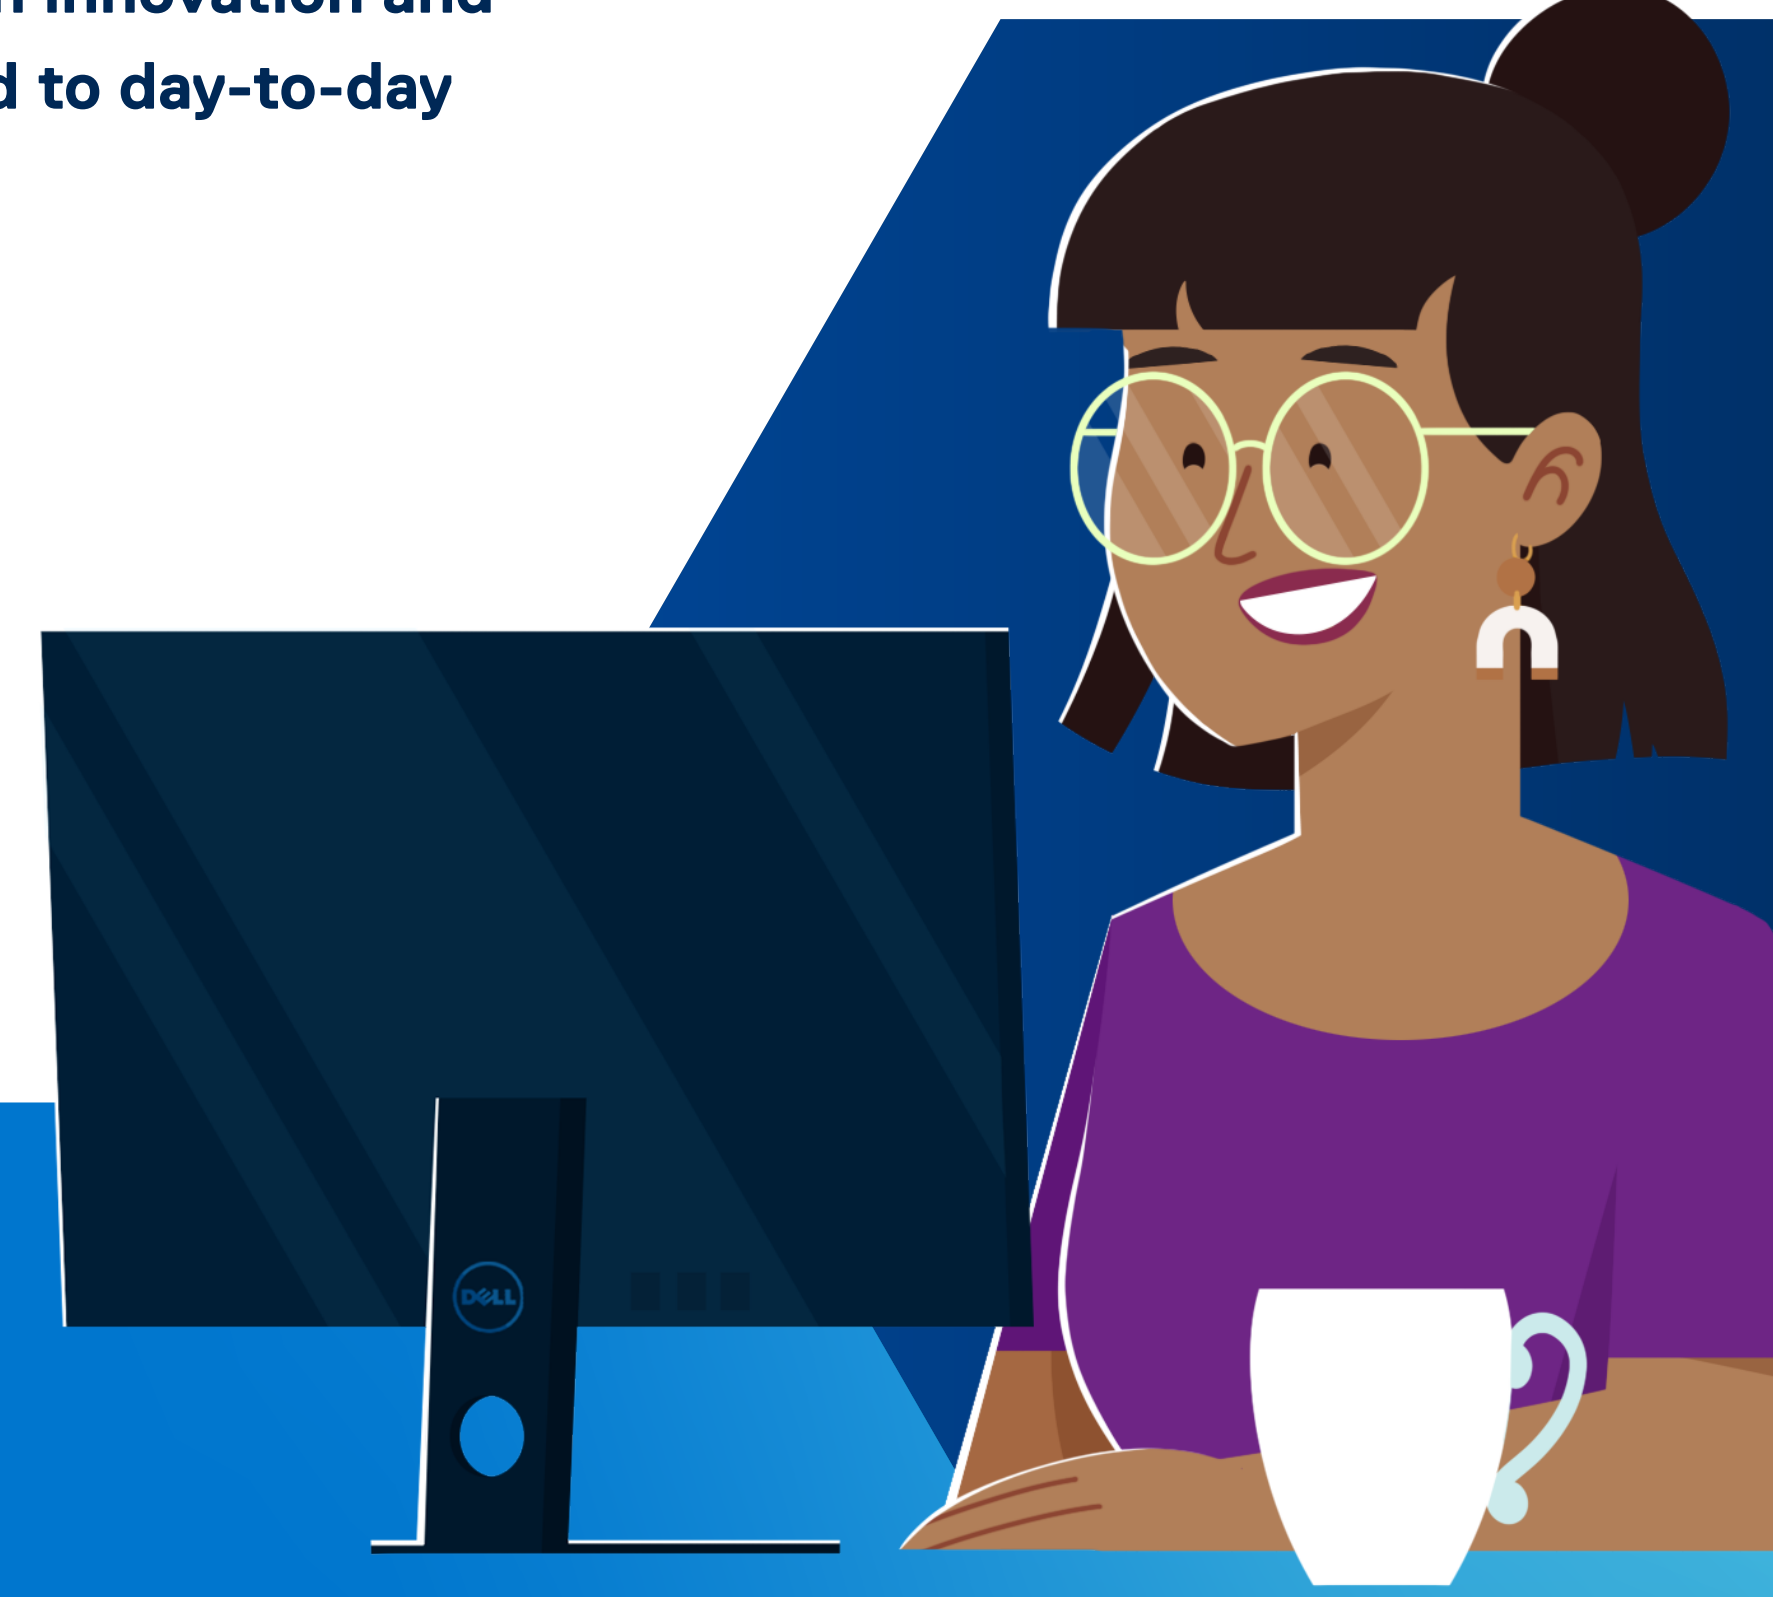

vmware
CLOUD

Simple and consistent cloud as-a-service

Dell APEX delivers Infrastructure-as-a-Service with scalable compute, storage and networking designed for a wide range of use cases.

“APEX Cloud Services with VMware Cloud is a compelling offering that will enable IT staff members to focus on innovation and differentiation as opposed to day-to-day administrative tasks.”
