

# Azure Arc-enabled data services & APEX Data Storage Services

Hybrid Cloud is here to stay and with Dell Technologies APEX Data Storage Services and Microsoft's Azure Arc-enabled data services, managing on-premises Microsoft SQL Server in a hybrid world just became easier.

## Microsoft Azure Arc-enabled data services

Azure Arc-enabled data services provides a version of SQL that can now be deployed on the validated infrastructure of Dell Technologies. Always up-to-date with the current version of SQL there are no more migrations, no more upgrades, and no more end of support — it is simply always current.

## The best of both worlds

Azure Arc-enabled data services and Dell Technologies APEX Data Storage Services both provide elastic scalability. Instances of SQL Server can be ramped up or down to meet the requirements of your workloads. APEX Data Storage Services allows seamless scaling of capacity up and down and simple pricing with a single rate for base capacity and on-demand usage, so there is no penalty for the flexibility of on-demand, elastic usage

1. Deployment time (TTV) measured between order acceptance and activation. Subject to credit approval, acceptance of APEX terms by required parties and site qualification which must be completed before order placement, and participation in pre-order planning. Product availability, international shipping, holidays and other factors may impact deployment time. Not applicable to Dell-managed colocation deployment. For Time-To-Value objectives and regional offer availability, visit [Dell.com/Access-APEX](http://Dell.com/Access-APEX).

2. Based on hardware availability on common underlying platform configurations. Actual hardware availability may vary.
