# Welcome!

FSFE Sicily Local Group

Who we are, where we want to go!

Who we are

Sicilian volunteers are distributed mainly from Palermo to Caltanissetta, however there are other individuals across the region.

Our mission is to make people understand what Free Software really is and what it means, creating a network of people helping each others in its usage.

Our primary target are for this reasons schools, students, and PAs across the territory, not avoiding collaborations with local G/LUGs and other similar associations.

Our "HQ"

We have a permanent space for the activities in Caltanissetta, guests of the I.I.S.S. Luigi Russo school. We have a small multi seat space with 4 monitors, and a server room with all the necessary equipment.

What we have done so far

- (GNU)Linux Day(s), 2017-2018-2019
- "Alternanza scuola-lavoro", PCTO, other kind of activities across 8 different schools in Palermo, Cefalù and Caltanissetta.
- Migration of the school "HQ" administration to 90% FLOSS software.
- Other things I surely don't remember now :D (Sorry!)!

What we want to do next

- Collaborations with the USR (Ufficio Scolastico Regionale, local regional school administration), to make other schools more Free!

- New project involving other schools, in the mechanics of migrations, replicating the success of the "HQ" migration

- New, more structured projects, designing and writing of Free Softwares, for this kind of PAs, involving the students

- UPDATE THE WIKI of the Local Group! (I'm really sorry about this too, forgive me please!)

Done!

Thanks everyone for the patience, time and attention!

My contact: mibofra@fsfe.org (obviously!)

Local Group ML: fsfe-sicily@lists.fsfe.org (Thanking so much the System Hackers group for this!)
