Family caregiving for service members and Veterans with TBI and polytrauma

Who are the caregivers?

How many hours per week do they devote to caregiving?

Based on survey of 564 caregivers of service members and Veterans with TBI and other injuries who received care in VA Polytrauma Rehabilitation Centers between 2001 and 2009. Data collected a median of four years after injury. From "The Invisible Side of War: Families Caring for US Service Members with Traumatic Brain Injuries and Polytrauma," Journal of Head Trauma Rehabilitation, January/February 2012.
