

# Cataract **surgery** success rates

A team at the **Washington DC VA Medical Center** analyzed **1,513** consecutive surgical cases, excluding patients with pre-existing eye disease other than the cataract.

**100%** of eyes  
without complicated surgery  
had **20/40** or better vision 12 months later

**99.1%** of eyes  
with complicated surgery  
had **20/40** or better vision 12 months later
