

# NATIONAL GUARD Joint Continental United States Communications Support Environment (JCCSE)

## FACT SHEET

### MISSION

**Providing reliable and timely flow of information to support mission needs**

The JCCSE is a joint U.S. Northern Command and National Guard Bureau effort that enables the reliable, timely flow of key information to support state and federal military activities – routine and otherwise – required for homeland defense, civil support and other mission needs.

### OVERVIEW

A major JCCSE element is the capability to link an incident site anywhere in the United States to state and national headquarters.

The JCCSE involves organizational components such as the National Guard Coordination Center (NGCC), Joint Forces Headquarters-States Joint Operations Centers, the Joint C4 Coordination Center (JCCC), and other technology infrastructure components.

The JCCSE includes the organizational components, communications systems and programs that support connectivity, collaboration, situational awareness and coordination. The JCCSE also includes key capabilities: Joint Information Exchange Environment (JIEE), Joint Incident Site Communications Capability (JISCC), and the JCCC.

### HIGHLIGHTS

**JIEE:** A web-based software application in use by the 50 states, three territories and the District of Columbia to support coordination and situational awareness of incidents and related missions, and mission coordination through tracking of requests for information (RFIs) and requests for assistance (RFAs).

**JISCC:** A deployable communications package that can be towed or airlifted to incident sites, providing reach-back connectivity via satellite and high-frequency radio to enable incident area voice, video and data services. The JISCC provides interoperable capabilities between a variety of radio communications equipment used by first responders and state and federal agencies.

**JCCC:** An element of the NGCC that serves as the single point of contact for the coordination of the joint force command, control, communications, and computer (C4) systems. The JCCC includes subject matter experts in planning, operations and system control.

**U.S. Northern  
Command &  
National Guard  
Bureau**

**Anywhere in the  
U.S.**

**JIEE, JISCC  
and JCCC**
