

Cannabis use among U.S. Veterans

9% of U.S. Veterans
reported past-year cannabis use

41% of Veterans
who reported past-year cannabis use said
they used it medically

Non-medical cannabis use
was related to heavy episodic alcohol
use and alcohol use disorder

Results based on responses from a representative sample of 2,587 Veterans who took part in the 2014 National Survey on Drug Use and Health. From "Recent cannabis use among Veterans in the United States: Results from a national sample," *Addictive Behaviors*, online Aug. 18, 2017.
