TITLE I

DEPARTMENT OF DEFENSE

Military Construction Overview

Reprogramming Guidelines.—The following reprogramming guidelines apply for all military construction and family housing projects. A project or account (including the sub-elements of an account) which has been specifically reduced by the Congress in acting on the budget request is considered to be a congressional interest item and as such, prior approval is required. Accordingly, no reprogramming to an item specifically reduced below the threshold by the Congress is permitted, except that the Department of Defense (DOD) may seek reprogramming for appropriated increments.

The reprogramming criteria that apply to military construction projects, which is 25 percent of the funded amount or \$2,000,000, whichever is less, also apply to new housing construction projects and improvements. To provide the Services the flexibility to proceed with construction contracts without disruption or delay, the costs associated with environmental hazard remediation such as asbestos removal, radon abatement, lead-based paint removal or abatement, and any other legislated environmental hazard remediation may be excluded, if such remediation requirements could not be reasonably anticipated at the time of the budget submission. This exclusion applies to projects authorized in this budget year, as well as projects authorized in prior years for which construction has not been completed.

In addition to these guidelines, the Services are directed to adhere to the guidance for military construction reprogramming actions and notifications, including the pertinent statutory authorities contained in DOD Financial Management Regulation 7000.14-R and relevant updates and policy memoranda. Further, the agreement encourages the Office of the Director of National Intelligence to use a format similar to that used by the Office of the Secretary of Defense to submit reprogramming requests.

Facilities Sustainment, Restoration and Modernization (FSRM).—The Department of Defense is directed to continue describing on form 1390 the backlog of FSRM requirements at installations with future construction projects. For troop housing requests, form 1391 should describe any FSRM conducted in the past two years. Likewise, future requirements for unaccompanied housing at the corresponding installation should be included. Additionally, the forms should include English equivalent measurements for projects presented in metric measurement. Rules for funding repairs of facilities under the Operation and Maintenance accounts are described below:

- (1) components of the facility may be repaired by replacement. Such replacement can be up to current standards or codes;
- (2) interior arrangements and restorations may be included as repair;

- (3) additions and new facilities may be done concurrently with repair projects, as long as the final conjunctively funded project is a complete and usable facility; and
- (4) the appropriate Service Secretary shall notify the appropriate committees 21 days prior to carrying out any repair project with an estimated cost in excess of \$7,500,000.

Incremental Funding.—The Committees recognize that providing full funding for military construction projects if they are executable is ideal. However, it continues to be the practice to provide incremental funding for certain large projects to enable the Services to more efficiently allocate military construction dollars among projects that can be executed in the year of appropriation. Therefore, the agreement includes six projects that have been incrementally funded; however, the full authorization of the projects was provided in the National Defense Authorization Act, Fiscal Year 2022.

Military Construction Funding.—The agreement includes \$14,900,000,000, which is \$5,052,969,000 above the budget request, in a continued effort to support current and future force readiness through critical infrastructure investments. Building off the fiscal year 2022 budget request, this level also funds all authorized and unfunded requirements and addresses other priorities that have been historically neglected in budget requests, such as quality of life and research and development facilities. While Congress continues to provide funding above the budget request for military construction, the Committees encourage the Department to adequately resource these accounts.

Military Installation Resilience.—The agreement includes planning and design and unspecified minor construction funding for the Department to address critical resilience requirements, particularly related to current and future risks from extreme weather and anticipated or unanticipated changes in environmental conditions. Recognizing that such investments are key to installation readiness, the agreement provides \$25,000,000 for the Army; \$40,000,000 for the Navy and Marine Corps; \$40,000,000 for the Air Force; and \$15,000,000 for Defense-wide agencies and accounts to continue to develop projects, conduct studies and analyses, and update Unified Facilities Criteria to directly enhance military installation

resilience. No later than 60 days after enactment of this Act, the Services and the DOD Comptroller are directed to provide a spend plan for the funds appropriated in fiscal year 2022.

Laboratory Infrastructure.—The Committees recognize the importance of DOD science and technology laboratories and test and evaluation facilities and support investment in this critical infrastructure. The agreement provides \$85,000,000 for the Army; \$15,000,000 for the Navy and Marine Corps; and \$25,000,000 for the Air Force for planning and design, unspecified minor construction, and authorized major construction projects to address priority laboratory requirements. The Services are directed to submit a spend plan for these funds no later than 30 days after enactment of this Act.

Red Hill Bulk Fuel Storage Facility (RHBFSF).—The Committees express disappointment in the Department's operation and management of the facility and related infrastructure, which has negatively affected and disrupted the lives of servicemembers, their families, and the people of Hawai'i. The Secretary of Defense is directed to provide the Committees a report, within 90 days of enactment of this Act, that identifies the military construction requirements, including remediation efforts, and details its near, mid-, and long term plans related to RHBFSF. The report also should identify the military construction options being considered for alternative fueling capacity throughout the Indo-Pacific. In addition, the report should include cost estimates, to the extent possible, and an analysis of the risk and estimated time frames associated with the options. Lastly, the Committees expect the Department to continue to brief the Committees regularly on the progress of remediation.

Navy Water Purification Infrastructure.—The agreement includes an additional \$50,000,000 for the Navy for planning and design in order to advance future water treatment and distribution infrastructure projects. The Department is directed to submit a spend plan for these additional funds to the Committees no later than 30 days after enactment of this Act.

European Deterrence Initiative (EDI).—The agreement includes \$415,064,000 within the Army, Navy, and Air Force military construction accounts to fund seven EDI projects across Europe as well as minor construction and planning and design. Further, the agreement includes

an additional \$10,000,000 above the budget request for the North Atlantic Treaty Organization (NATO) Security Investment Program to support U.S. allies and partners, deter aggression by the Russian Federation, and promote democratic governance, peace, and stability in Europe.

Child Development Centers (CDCs).—The bill includes \$224,700,000 for seven child development center projects, of which \$33,000,000 is for planning and design for future projects. This investment of resources is necessary to address both insufficient accessibility to childcare facilities, as well as the poor conditions of existing facilities. Such shortfalls in capacity are an unacceptable burden to military families. The Department is directed to assign greater priority to CDC construction projects in future budget requests.

United States Indo-Pacific Command (INDOPACOM).—The INDOPACOM area of responsibility is the largest combatant command and requires a modern, resilient military presence to ensure the continued strength of U.S. national security. However, the Committees are concerned that the Services have not properly prioritized projects within INDOPACOM in recent fiscal years. The agreement provides an additional \$58,600,000 for INDOPACOM planning and design to advance future projects. Additionally, the agreement directs the Assistant Secretary of Defense for Sustainment to report no later than 180 days after the enactment of this Act on: (1) the overall strategy for joint use facilities in the Indo-Pacific; (2) the challenges and benefits of adding ports to the DOD's joint-use planning; and (3) limitations imposed by current authorities that may hinder cost-sharing efforts.

Unfunded Priority Lists (UPL) and Future Years Defense Program (FYDP).—The Committees direct the Department of Defense and all Services, active and reserve components, as well as combatant commanders, as required by law, to submit updated UPL and FYDP lists to the congressional defense committees for military construction projects no later than 10 days after the transmission of the annual President's Budget.

U.S. Space Command Headquarters.—The agreement notes the Government Accountability Office and the Department of Defense Inspector General's inquiries into the

basing decision for U.S. Space Command headquarters. The Committees look forward to receiving the reports.

Shipyard Infrastructure Optimization Plan (SIOP).—The Committees are very concerned that the Navy’s Shipyard Infrastructure Optimization Plan is falling behind schedule and consistently runs over cost estimates. In order to ensure the continued progress of SIOP, the bill provides \$350,000,000 for ongoing SIOP projects requested in the President’s Budget. The

agreement also provides an additional \$275,000,000 for SIOP cost increases and planning and design for future construction projects. This marks the second consecutive year that Congress has provided significant funding beyond the request for SIOP requirements. TITLE II
DEPARTMENT OF VETERANS AFFAIRS
Items of Special Interest

Toxic Exposures.—The Committees remain concerned by the long history of servicemembers being exposed to toxic substances, including Agent Orange, radiation, per- and polyfluoroalkyl substances (PFAS), and open burn pits, and believe that the recent rulemaking activity expanding presumptive benefits for veterans with toxic exposures is a step in the right direction. More must be done, both in expanding access to healthcare for veterans exposed to toxins, as well as ensuring they are receiving the disability and compensation benefits that they have earned.

The Department of Veterans Affairs (VA) is urged to work with the Department of Defense (DOD) to ensure that VA has information about every location in which servicemembers may have been exposed to toxins in order to appropriately adjudicate claims and make determinations about presumptive eligibility. Further, to improve data on veteran exposure to burn pits and potential health effects, the Committees reiterate the direction provided in House Report 117-81, requiring a report within 180 days on burn pit data tracking and reporting.

Additionally, the Committees support the Department's plans to increase research on the effects of and treatments for veterans exposed to toxins during their time in military service, as well as the launch of the Military Exposure Research Program. The Department is encouraged to partner with DOD and other research institutions to leverage its funding and to include gender-specific research in its research efforts. The Committees reiterate the directions provided in House Report 117-81 and Senate Report 117-35 to address concerns from PFAS exposure.

To assist in better understanding the effects of exposure to open burn pits and airborne hazards on the health of veterans, the agreement provides \$10,000,000 for the Airborne Hazards and Burn Pits Center of Excellence.

The Department is directed to provide a spend plan to the Committees on Appropriations detailing the planned use of funds provided in this Act for programs focused on toxic substances within 30 days of enactment of this Act. In addition, the Department is directed, within 60 days of enactment of this Act, to provide a retrospective report detailing spending on programs and

activities focused on toxic substance exposure, including registries, research, reviewing and adjudicating claims, and benefits and health care for fiscal year 2021.

Supply Chain Modernization.—VA has well-documented medical supply chain challenges, and on June 22, 2021, the United States Court of Federal Claims issued an order that required VA to adjust its planned efforts in this area. The Department was provided significant funding intended to expedite their ongoing modernization, but as this effort has continued to demonstrate significant challenges, this bill includes a provision that reallocates funding that VA has not yet used. The Department has not provided a Supply Chain Management Strategy to outline how its various supply chain initiatives relate to each other, and what has been determined to be the best path forward for this initiative, having considered all options. The Secretary is directed, within 30 days of enactment of this Act, to provide the Committees with an update or the final version of its Supply Chain Management Strategy, to include any changes necessary to the fiscal year 2022 Supply Chain Modernization spend plan based on the challenges VA has experienced, including court rulings.

Unobligated Balances of Expired Discretionary Funds.—The Department is directed to submit to the Committees on Appropriations quarterly reports detailing all unobligated balances of expired discretionary funds by fiscal year.

Federal Law Enforcement.—The agreement notes that the explanatory statement accompanying the Commerce, Justice, Science, and Related Agencies Appropriations Act, 2022 directs the Attorney General to ensure implementation of evidence-based training programs on de-escalation and the use-of-force, as well as on police community relations, and the protection of civil rights, that are broadly applicable and scalable to all Federal law enforcement agencies. The agreement further notes that several agencies funded by this Act employ Federal law enforcement officers and are Federal Law Enforcement Training Centers partner organizations. The agreement directs such agencies to consult with the Attorney General regarding the implementation of these programs for their law enforcement officers. The agreement further directs such agencies to submit a report to the Committees on Appropriations on their efforts relating to such implementation no later than 180 days after consultation with the Attorney General. In addition, the agreement directs such agencies, to the extent that they are not already participating, to consult with the Attorney General and the Director of the FBI regarding participation in the National Use-of-Force Data Collection. The agreement further directs such agencies to submit a report to the Committees on Appropriations, no later than 180 days after enactment of this Act, on their efforts to so participate.

This amount is \$30,813,000 above the request, which is intended to help VA process new benefits claims and lower the claims backlog, particularly as VA identifies new presumptive service-connected conditions.

Equitable Relief.—As described in House Report 117-81, the Secretary is directed to continue to grant or extend equitable relief to eligible veterans initially deemed eligible in instances of administrative error, and the agreement requires the report to be submitted to the Committees on Appropriations no later than 90 days after enactment of this Act.

Negligence of Veterans Affairs Employees and Patient Safety.—The agreement notes the direction in Senate Report 117-35 related to negligence of Veterans Affairs employees and patient safety concerns. VA must do more to encourage its employees to identify and report

As such, the Department is requested to track professions and specialties of interest.

The agreement provides \$2,435,182,000 to sustain and increase telehealth capacity, including in rural, highly rural, and underserved communities.

The agreement also includes \$155,970,000 for Substance Use Disorder (SUD) efforts to ensure a greater number of veterans can receive SUD specialty services.

Substance Use Disorders.—The Committees recognize the ongoing work of VA to reduce substance use disorder among veterans, and the importance of programs that utilize harm reduction techniques and offer confidential education information that can reduce substance use, relapse, hospital visits and suicide. The agreement does not include the funding and reporting requirement included in House Report 117-81 to establish an internet-based substance abuse education program, but instead VA is urged to expand its efforts related to SUD education and outreach and required to submit a report to the Committees within 90 days of enactment of this Act on how substance use education programs are being implemented across the Department.

In lieu of the funding in House Report 117-81, the Committees direct VA to allocate up to \$10,000,000 to support partnerships between VA medical centers and NCI-designated comprehensive cancer centers. The Committees further direct VA to provide a report within 90 days of enactment of this Act on how the Department will use these funds and how prior year funds have been used to improve veterans' access to cancer clinical trials, as previously directed.

Furthermore, the agreement makes 25 percent of the funds contingent upon the Secretary providing a plan with benchmarks and measurable metrics for deployment and a plan for addressing all required infrastructure upgrades to the Committees on Appropriations no later than 30 days prior to July 1, 2022. The Secretary is not provided transfer authority and is directed to continue using this account as the sole source of funding within the Department for EHRM.

While the Committees remain supportive of the EHRM initiative and the Secretary's comprehensive strategic review, as with any acquisition of this size and magnitude, there continue to be implementation concerns. The funding level and contingency requirement recognize the implementation delays and challenges to date, as well as the need to communicate a clear plan to address infrastructure needs, deploy the new system, monitor progress, and demonstrate success.

The Committees expect the Department to follow the direction in bill language, as well as in House Report 117-81 and Senate Report 117-35.
