

Dell Technologies Safety & Security Validation Matrix

H14530.14

May 2020

Abstract

This document shows how we partner with leading Safety & Security providers to configure various Dell EMC arrays, clusters, and cloud storage offerings to easily implement onto a Dell EMC storage system.

Dell Technologies Solutions

Safety & Security Lab
Validated

Validation testing

Validation testing determines the performance baseline, including bandwidth specifications and failure and recovery scenarios, for Video Management Software (VMS) providers when using Dell EMC storage systems. Various test scenarios are performed that replicate typical production environment activities related to several different system component failures and normal break fix best practices.

You can use the results presented in this document to determine what specific version of the ISV software, Dell EMC storage platform, model numbers, and Dell EMC storage operating environment have been validated.

The Dell EMC Safety & Security Lab team conducts tests in collaboration with the respective ISVs to determine the validated results.

Dell EMC arrays and clusters

Dell EMC storage arrays are ideal for storing video and audio data. Dell EMC offers the following storage options for video and audio data:

- Dell EMC Isilon
- Dell EMC Unity
- Dell EMC SC series
- Dell EMC ECS Object Storage

Storage protocols

- NAS storage** Isilon storage cluster tests use SMB except where noted.
- SAN storage** Unity and SC series storage array tests use iSCSI and FC except where noted.
- ECS Object Storage** ECS object storage tests use S3.

Functional testing

Functional testing differs from validation testing in that functional testing verifies that a VMS is compatible with Dell EMC storage systems. For video management applications the Functional test verifies compatibility for write, read, archive retention policies, and stable connectivity.

This type of testing does not include failure and recovery scenarios and performance benchmarking. Functional testing does not establish sizing guidelines but it may include the results from a single server baseline test.

Current VMS Validations

Major safety and security vendors partner with the Dell EMC Safety & Security Lab to validate security applications with Dell EMC's portfolio of products and solutions.

- [VxRail and vSAN](#)
- [Mission critical](#)
- [Non-mission critical](#)
- [Previous generation validations](#)

- V-T1 (Validated Tier 1)** Indicates that the storage platform is fully validated as primary storage for the safety and security workload.
- V-T2 (Validated Tier 2)** Indicates that the storage platform is fully validated as a secondary storage for the safety and security workload.
- F-T1 (Functional Tier 1)** Indicates that the storage platform has been functionally verified for use as a primary storage platform but has not been fully validated.
- F-T2 (Functional Tier 2)** Indicates that the storage platform has been functionally verified for use as a secondary storage platform but has not been fully validated.

The following tables show the most current validations with the latest Dell EMC storage solutions.

VxRail and vSAN

Dell Technologies Solution | Safety & Security installations that include VMware vSAN or VxRail integration.

Table 1. Edge VMS Validation testing with vSAN and ECS

VMS	vSAN	With ECS via GeoDrive
Genetec	PowerEdge R740xd	V-T1, V-T2
Milestone	PowerEdge R740xd	V-T1, V-T2

Table 2. Edge VMS Validation testing with vSAN, VxRail and Isilon

VMS	vSAN	With Isilon
Genetec	VxRail	V-T1
Milestone	VxRail	V-T1
Verint	VxRail	V-T1

Mission critical

Installations that include critical cameras where zero video frame loss is acceptable during storage recovery activities, such as disk rebuilds and controller outages that are required for maintenance upgrades or failures. Storage solutions include Isilon Gen 6, Unity, ECS Gen2 and Gen3, and PowerEdge Gen13 and Gen14.

Table 3. VMS storage validation testing

VMS	Isilon (NAS)	Unity (SAN)	ECS via GeoDrive	PowerEdge Storage
Airship	V-T1	—	—	—
Avigilon	V-T1, V-T2	—	—	—
FLIR	—	V-T1	—	—
Genetec	V-T1	V-T1	V-T1	V-T1
Godrej IQ Vision	V-T2	V-T1, V-T2	—	—
Honeywell	V-T1	—	—	—
ISS	V-T1	V-T1	—	—
Milestone	V-T2	V-T1, V-T2	V-T2	V-T1, V-T2
Panasonic	V-T1	—	—	—
Pelco	V-T1	—	—	—
Qognify VisionHub	V-T1	V-T1	—	V-T1
Qognify Cayuga	V-T1	—	F-T1	—
S-1 Corporation	V-T1	—	—	—
Synectics	V-T1	V-T1	—	—
Verint	V-T1	V-T1	V-T1	V-T1

Non-mission critical

Installations that include noncritical cameras where some video frame loss is acceptable during storage recovery activities, such as disk rebuilds and controller outages that are required for maintenance upgrades or failures.

NOTE: For mission critical safety and security video applications, Dell EMC recommends Unity, Isilon, or ECS with GeoDrive.

Table 4. VMS Validation testing with SC series and ME4

VMS	SC	ME4
Genetec	V-T1	V-T1
Milestone	V-T2	V-T2

Previous generation validations

Installations that include storage arrays that are end of life.

Table 5. VMS Validation testing with Unity, ECS, and Isilon

VMS	NAS storage	SAN storage	Object storage
	Isilon	VNX	ECS via GeoDrive
Aimetis	V-T1	V-T1	—
Bosch	—	V-T1	—
Digifort	—	V-T1	—
IndigoVision	V-T1	—	—
Infinova	V-T1	—	—
LENSEC	V-T1	—	F-T1

Validated VMS partners

Validating partner safety and security solutions for hardware and software performance within the customer environment can be complex and time consuming. Dell EMC Safety & Security Labs are outfitted with leading technology from all major safety and security vendors, allowing us to validate all best-of-breed physical security applications with the Dell Technologies portfolio of products and solutions. These proven lab validations with key partners accompany extensive documentation to simplify deployment and reduce risk of video loss for our customers

Aimetis Symphony

SAN storage systems tested

The following table shows the Aimetis Symphony versions and SAN firmware versions that have been included in validation testing.

Table 6. Aimetis Symphony and Dell EMC SAN storage system versions tested

Version	Firmware	Tier	Array
6.12.3	OE5.32.000.5.x	1	VSS100 VNX5400

NAS storage systems tested

The following table shows the Aimetis Symphony versions and NAS releases that have been included in validation testing.

Table 7. Aimetis Symphony and Dell EMC NAS storage system versions tested

Version	OneFS release	Tier	Cluster
6.14.5.1	8.0.0.1	2	X410

Table 7. Aimetis Symphony and Dell EMC NAS storage system versions tested (continued)

Version	OneFS release	Tier	Cluster
6.12.3	7.1.0.0	2	NL400 X410

Airship Digital Video Recording System

NAS storage systems tested

The following table shows the Airship Digital Video Recording System versions and NAS releases that have been included in validation testing.

Table 8. Airship Digital Video Recording System and Dell EMC Isilon storage system versions tested

Version	OneFS release	Tier	Cluster
5.4.1.290	8.1.1.1	1	A2000

Avigilon Control Center System

NAS storage systems tested

The following table shows the Avigilon Control Center System versions and NAS releases that have been included in validation testing.

Table 9. Avigilon Control Center System and Dell EMC NAS storage system versions tested

Version	OneFS release	Tier	Cluster
6.14.8.26	8.1.2	1	H400 A2000
6.12	8.1.1.1	2	H400
6.10	8.0.1.2	1	X410
6.8	8.0.1.2	1	X410
5.8.2.14	8.0.0.2	1	NL410 HD400

Bosch Video Recording Manager

SAN storage systems tested

The following table shows the Bosch Video Recording Manager versions and SAN firmware versions that have been included in validation testing.

Table 10. Bosch Video Recording Manager and Dell EMC SAN storage system versions tested

Version	Firmware	Tier	Array
3.0.0073	OE5.32.000.5.x	1	VNX5300 VSS100 VNXe3200

Digifort Enterprise

SAN storage systems tested

The following table shows the Digifort Enterprise versions and SAN firmware versions that have been included in validation testing.

Table 11. Digifort Enterprise and Dell EMC SAN storage system versions tested

Version	Firmware	Tier	Array
7.1.0.0	OE5.32.000.5.x	1	VNXe1600 VSS1600

FLIR Latitude

SAN storage systems tested

The following table shows the FLIR Latitude versions and SAN firmware versions that have been included in validation testing.

Table 12. FLIR Latitude and Dell EMC SAN storage system versions tested

Version	Firmware	Tier	Array
8.0.X.61XX	4.5.0.0.5.096	1	Unity 500
6.2	OE5.32.000.5.x	1	VNX

Genetec Security Center

SAN storage systems tested - mission critical

The following table shows the Genetec Security Center and SAN firmware versions with mission critical storage arrays that have been included in validation testing.

Table 13. Genetec Security Center and SAN storage system versions tested

Version	SAN firmware	Tier	Array
5.7	4.3.1.1525703027 4.2.3.9670635 4.2.1.9535982 R7.02.30.021.01 7.2.30.21 7.2.31.3 GT275R005-04	1	Unity300 Unity500 Unity600
5.6	4.2.0.9392909	1	VNX
5.4	OE5.32.000.5.x OE5.33.000.5.x	1	VNX

		—	Xeon E5-2650 V4	256 GB	15 x 10 TB	6	
		—	Xeon E5-2650 V4	256 GB	14 x 10 TB	6	
	R530	—	Xeon E5-2650 V4	256 GB	6 x 6 TB	6	
	R430	—	Xeon E5-2650 V4	256 GB	1 x 400 GB SSD	1	

S-1 Video Management Software (SVMS)

NAS storage systems tested

The following table shows the SVMS versions and Isilon OneFS releases that have been included in validation testing.

Table 43. SVMS and NAS storage system versions tested

Version	OneFS release	Tier	Cluster
5.0.9.114	8.1.2 8.1.1.1	1	A2000 A200
2.65.0.0	8.0.1.2	1	NL410

Synectics Digital Recording System

SAN storage systems tested

The following table shows the Synectics Digital Recording System and SAN firmware versions that have been included in validation testing.

Table 44. Synectics Digital Recording System and SAN storage system versions tested

Version	SAN firmware	Tier	Array
1.17.0.16	OE5.33.008.5.119	1	VNX

NAS storage systems tested

The following table shows the Synectics Digital Recording System versions and Isilon OneFS releases that have been included in validation testing.

Table 45. Synectics Digital Recording System and NAS storage system versions tested

Version	OneFS release	Tier	Cluster
1.17.0.16	7.2.1	1	HD400 NL410

Verint Nextiva

SAN storage systems tested - mission critical

The following table shows the Verint Nextiva and SAN firmware versions with mission critical storage arrays that have been included in validation testing.

Table 46. Verint Nextiva and SAN storage system versions tested

Version	SAN firmware	Tier	Array
7.5.1.7623	4.2.1.9535982	1	Unity300
6.4.3.2811	4.2.0.9392909	1	VNX
6.4.1591	3.1.3.7141854	1	VNX

Table 46. Verint Nextiva and SAN storage system versions tested (continued)

Version	SAN firmware	Tier	Array
6.4	OE5.32.000.5.x OE5.33.000.5.x	1	VNX

SAN storage systems tested - nonmission critical

The following table shows the Verint Nextiva and SAN firmware versions with nonmission critical storage arrays that have been included in validation testing.

Table 47. Verint Nextiva and SAN storage system versions tested

Version	SAN firmware	Tier	Array
5.7	4.3.1.1525703027 4.2.3.9670635 4.2.1.9535982 R7.02.30.021.01 7.2.30.21 7.2.31.3 GT275R005-04	1	SC5020 SCv3000 ME4012

ECS Object Storage systems tested

The following table shows the Verint Nextiva versions and ECS releases that have been included in validation testing.

Table 48. Verint Nextiva and Dell EMC storage system versions tested

Version	ECS	GeoDrive	Array	vSAN host
7.5.1.7623	3.2	1.2.2.1	ECS U400	E560

NAS storage systems tested

The following table shows the Verint Nextiva versions and Isilon OneFS releases that have been included in validation testing.

Table 49. Verint Nextiva and NAS storage system versions tested

Version	OneFS release	Tier	Cluster
7.5.1.7623	8.1.1.1 8.1.0.2	1	H400 A2000
6.4.3.2811	8.0.0.2	1	HD400
6.4.1591	7.2.1.1	1	HD400 NL410
6.4	7.1.1.1 7.1.0.0	1	NL400

VxRail and vSAN

The following table shows the Verint Nextiva versions and vSAN releases that have been included in validation testing.

Table 50. Verint Nextiva Edge validation testing with vSAN, VxRail, and Isilon

Version	vSAN	VxRail	OneFS release	Tier
7.6.0.747	6.7 Update 3	E560	8.1.2	1

Dell EMC servers tested

The following table shows the Verint Nextiva and server versions that have been included in validation testing.

Table 51. Verint Nextiva and Dell EMC servers tested

Version	Server	Virt	Processor	Memory	Drives	RAID	RAID controller
6.4.3.2811	R730xd	E	Xeon E5-2650 V4	256 GB	16 x 4 TB	6	H730P
	R630	E	Xeon E5-2650 V4	256 GB	14 x 10 TB	6	H730P

Virtualization options (Virt):

- E - VMware ESXi
- B - Bare metal
- H - Microsoft Hypervisor

Body-worn and VMS verifications

The following table shows the VMS and Body camera providers that have partnered with Dell EMC for Functional testing.

Table 52. Functional testing

Partner	Verification Test type	Isilon	SAN	ECS
Axon Commander	Body Camera	X	X	—
Dallmeier	VMS	—	X	—
DutyVue	Body Camera	X	X	X
Edesix	Body Camera	X	X	X
IndigoVisionFL	Body Camera	X	X	X
LenSec	VMS	X	—	—
NUUO	VMS	—	X	—
Reveal	Body Camera	X	X	X
VIEVU	Body Camera	X	X	X

Notes, cautions, and warnings

 **NOTE:** A NOTE indicates important information that helps you make better use of your product.

 **CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

 **WARNING:** A WARNING indicates a potential for property damage, personal injury, or death.
