# 5 THINGS TO CONSIDER WHEN BUILDING YOUR ROADMAP TO THE CLOUD

## READY TO MIGRATE?
## HERE IS YOUR ROADMAP TO THE CLOUD

*This is your opportunity to make improvements to your work-flow/supply chain and become more efficient, accurate, and connected.*

---

**1**

*Does your ERP integrate with other facets of your operation?*

*Is it Future-Proof?*

### DOES YOUR ERP (ENTERPRISE RESOURCE PLANNING) INTEGRATE WITH ANDROID?

While Android has tremendous capabilities as a front-end system, it will not be nearly as effective if it does not integrate with the back end.

---

**2**

### CAN YOUR WIRELESS NETWORK SUPPORT THE MIGRATION?

Cloud-based systems and Android devices will only be as effective as it's network.

*How many devices do you have?*

*How often do your users need to access data in their workflow?*

---

**3**

*How can the data be accessed and where is it stored?*

*How often are security updates provided?*

### DO YOUR MANUFACTURERS/ DISTRIBUTERS MEET YOUR SECURITY NEEDS?

It is important to create an environment where your company's sensitive data is protected, while allowing the appropriate people the access to the data they need, when they need it.

---

**4**

### WHAT DEVICES DO YOU NEED TO MEET YOUR USER'S NEEDS?

Before you purchase a device, you must understand the specific needs of your supply chain. This will ensure that data is never lost, reduces downtime, and keeps work-flows running smoothly.

*Are touch or voice activated devices needed?*

*Do you need styluses and/or a keboard?*

---

**5**

*What is the timeframe for implementation?*

*What are the costs to train?*

### HOW CAN YOU FUTURE-PROOF YOUR TECHNOLOGY?

When considering migration or implementation of new technology many people only think of the initial price of the product, it's important to consider all the costs from testing to implementation, training, and future updates.

---

## HOW WE CAN HELP

*At Barcoding, Inc., we can help your supply chain and work-flow become more efficient, accurate, and connected.* Contact us today to see how we can help you lead the implementation of cloud and android devices at your organization.
