MicroK8s

**CANONICAL** | **ubuntu**

# We deliver **containers** you develop

## Better customer experiences

### Easier deployments

- Faster, appliance-style deployment of infra and apps
- Reference platform simplifies ongoing maintenance

### Dedicated platforms improve operations

- Full control over resources and workloads
- No noisy neighbours

## Build on MicroK8s, the lightweight Kubernetes

### Exceptional

- Fire-and-forget K8s with transactional over-the-air updates
- Self-healing high availability
- GPU acceleration and other add-ons

### As you want it

- CNCF-conformant
- Platform independent & OCI compliant
- Hardened for regulatory compliance
