

## Six Ways to Stay Safe When Working on Cranes in Marine Terminals

**1** Turn off, de-energize, and lockout and tagout all power sources before servicing.

**2** Identify confined spaces on cranes and follow safety precautions when entering.

**3** Wear fall protection when working on elevated surfaces outside the crane's cab.

**4** Know the locations of pinch points and crushing hazards.

**5** Be aware of vehicle traffic patterns and conduct work in a protected area.

**6** Maintain clear and open radio communication with crane operators.
