

New Mexico Prescription Monitoring Program

Temporary Information Page

The New Mexico Prescription Monitoring Program information website, located at <https://nmpmp.org>, is temporarily offline. As we work to restore service, the following information may be useful:

- The New Mexico Prescription Monitoring Program is still fully functional. Web-based PMP access, for account registration and patient history checks, remains accessible at [New Mexico PMP AWARE](#).
- PMP checks are still available for registered users through your Electronic Health Record systems, via PMP Gateway. More information about PMP Gateway can be found at the bottom of the [Pharmacy Links](#) page.
- Pharmacies, dispensers, and other PMP data submitters, can still upload PMP data through the normal channels. For more information, or to start PMP data submissions, please visit [PMP Clearinghouse](#).
- PMP regulatory information can be found at the Board of Pharmacy [Rules and Laws](#) page. Additional regulatory information, including terms of mandatory PMP usage, can be found in the regulations of the individual practitioner's licensing board.
- For additional assistance, please contact the PMP as follows:

PMP Accounts and Registration Assistance:

nm.pmp@state.nm.us

(505) 222-9847

Other general PMP inquiries:
