

The Dell Latitude 7220 Rugged Extreme Tablet brings many advantages to skilled labor use cases

vs. three consumer-grade tablets with rugged cases

Tablets that can't withstand the day-to-day rigors of your unique work environment can result in downtime and lost data. If your job doesn't involve sitting behind a desk in an air-conditioned office, the Dell™ Latitude™ 7220 Rugged Extreme Tablet might be the right tool for you.

Consistent performance no matter where you work

The Latitude 7220 Rugged Extreme performed consistently in conditions that service techs and forklift drivers face daily.*

- Surface Pro 8 shut down in extreme heat and cold
- iPad Pro 11-inch and Galaxy Tab S7+ performance suffered in extreme heat

Geekbench 5 CPU performance scores (multi-core)
Normalized | Higher is better

*Dell Latitude 7220 Rugged Extreme rated to handle temps between -20°F/-29°C and 145°F/63°C

Usable after repeated falls

The Dell Latitude 7220 Rugged Extreme remained fully functional after 26 drops with slight wear on edges/corners.

- Surface Pro 8 usability was compromised when the glass shattered on the third drop

Readable in bright sunlight

A brighter screen makes it easier to read maps and check job orders in the field.

Screen brightness while unplugged (nits) | Higher is better

Resistant to heavy rain

The Dell Latitude 7220 Rugged Extreme was the only device that stayed powered on, had no visible damage, and was fully functional after a 10-minute long rain-like dousing.

- Samsung Galaxy Tab S7+ shut down after removal from wet conditions
- Neither iPad Pro 11-inch nor Surface Pro 8 recovered after being in rain-like conditions for 10 minutes

Stay productive on the job

While we found after-market accessory add-ons for all the devices we tested, only the Dell Latitude 7220 Rugged Extreme Tablet contained an abundance of connections for a wide variety of skilled labor use cases.

What we tested

Dell Latitude 7220 Rugged Extreme Tablet

- Powered by an Intel® Core™ i5-8365U processor
- Windows 10 Pro OS provides a full-featured, computer-like experience with Microsoft 365 desktop or online apps¹

Apple iPad Pro 11-inch

- OtterBox® rugged case
- Powered by an Apple M1 chip
- Apple iPadOS® OS delivers a limited-feature, smartphone-like experience with Microsoft 365 mobile apps²

Samsung Galaxy Tab S7+

- SaharaCase® rugged case
- Powered by a Qualcomm® SDM865+ processor
- Google™ Android™ OS delivers a limited-feature, smartphone-like experience with Microsoft 365 mobile apps³

Microsoft Surface Pro 8

- Urban Armor Gear rugged case
- Powered by an Intel Core i5-1135G7 processor
- Windows 10 Home OS provides a full-featured, computer-like experience with Microsoft 365 desktop or online apps⁴
