

Residency Services

Certified technical experts for

Data Center Infrastructure solutions

- ✓ Ease the transition to new technology
- ✓ Extend technology value to maximize return on investments
- ✓ Keep data center operations running at peak performance
- ✓ Enhance internal capabilities and repurpose existing resources to higher value projects

Offered Onsite or Remote, with 4-week minimum durations for onsite and 2-weeks for remote

Seamlessly integrate and optimize new or existing infrastructure into data center operations

Directed by you, certified technologists with validated expertise and skills act as an extension of your IT staff, enabling you to realize the full value of your digital environment.

Whether you need help transitioning to new technology after deployment or require additional expertise and resources to support general IT operations, residents can extend technology value utilizing best practices.
