kaspersky

Updated: November 2022

Our mission is simple — building a safer world.

And in fulfilling that mission we aim to become the global leader in cybersecurity — by securing technology to make sure that the possibilities it brings become opportunities for each and every one of us.

**Bring on endless possibilities.
Bring on a safer tomorrow.**

Eugene Kaspersky, CEO

Bring on the future

Our promise

We believe in a tomorrow where technology improves all of our lives. Which is why we secure it, so everyone, everywhere, can benefit from the endless opportunities it brings.

Global Transparency Initiative

- Key transparency principles
- Global Transparency Initiative
- Independent assessments and certifications
- Bug Bounty Program

Our key transparency principles

Data sent to Kaspersky is crucial for protecting users, it is robustly protected and is not attributed to a specific individual.

We detect and neutralize threats, regardless of their origin or purpose.

We work with international organizations to fight cybercrime.

We are committed to the trustworthy development of our technologies and solutions.

We cooperate with the IT security industry in joint cybercrime investigations.

Global Transparency Initiative

Launched in 2017, Kaspersky's Global Transparency Initiative is aimed at engaging the broader information security community and other stakeholders in validating and verifying the trustworthiness of our products, internal processes, and business operations.

It includes a number of actionable and concrete measures:

Cyberthreat-related data infrastructure relocation to Switzerland.

Creation of a global network of Transparency Centers in some regions, where Kaspersky's trusted partners and government stakeholders can review the company's code, software updates and threat detection rules.

Third-party security assessments of Kaspersky's engineering and data management practices to verify the security of the company's solutions.

Global Transparency Initiative

It includes a number of actionable and concrete measures:

Vulnerability management program, under which security researchers can report vulnerabilities or bugs found in our systems for a designated reward.

Transparency reports, in which we publicly share information about the number of requests for user data and technical expertise received.

Cyber Capacity Building Program – a dedicated training to share security evaluation knowledge with a broader community.

Kaspersky Global Transparency Initiative

Cyberthreat-related user data storage and processing

Malicious and suspicious files received from users of Kaspersky products in Europe, North and Latin America, the Middle East, and also countries in Asia-Pacific region are processed and stored in Switzerland.

Transparency Centers

A facility for customers, partners and government stakeholders to review the company's code, software updates and threat detection rules, along with other activities.

Independent reviews

Regular third-party assessment of internal processes to confirm the security of Kaspersky's processes and systems, including:

- SOC 2 audits by a Big Four firm
- ISO 27001 certifications for the company's data systems

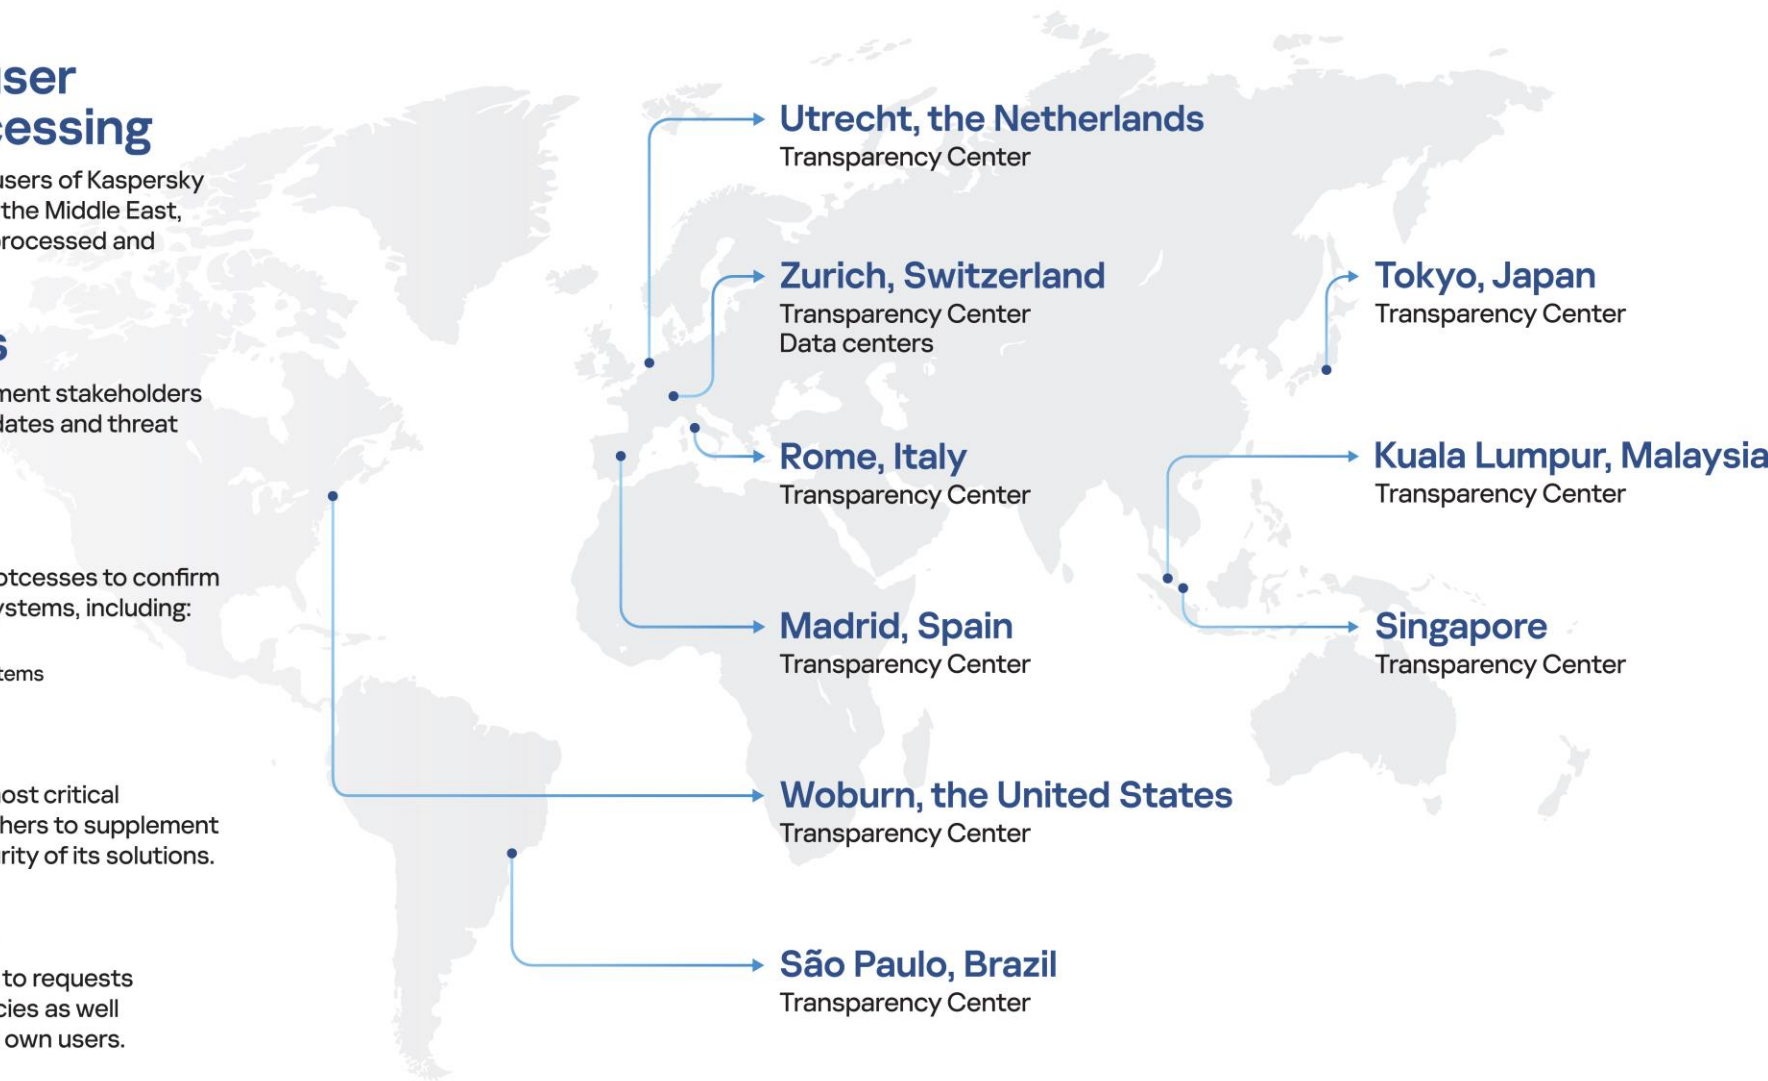

Bug bounty program

Increased bug bounties up to \$100k for the most critical vulnerabilities aim to engage security researchers to supplement the company's own work in ensuring the security of its solutions.

Transparency reports

Regular updates on how Kaspersky responds to requests from government and law enforcement agencies as well as to personal data-related requests from its own users.

Kaspersky Transparency Centers

Review options:

Blue Piste (both remote & physical)

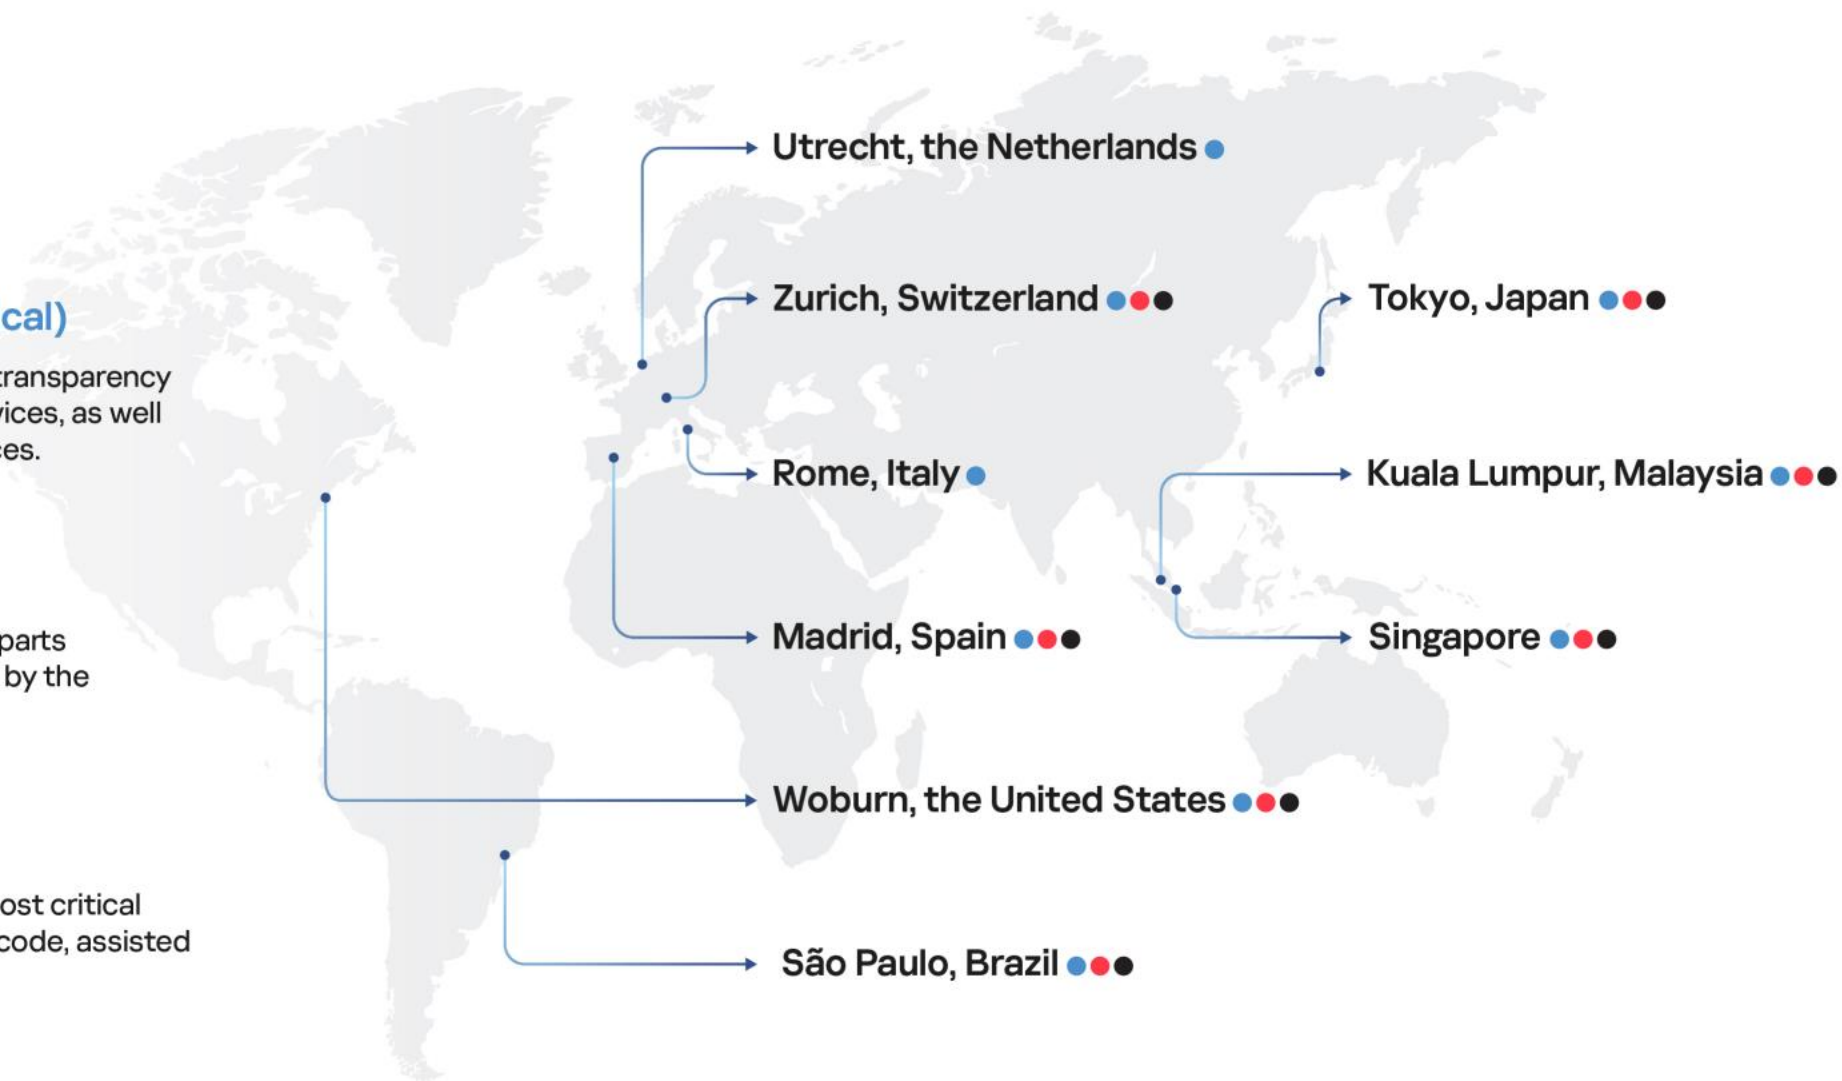

An overview of Kaspersky's transparency practices, products and services, as well as data management practices.

Red Piste

A review of the most critical parts of the source code, assisted by the company's experts.

Black Piste

The deepest review of the most critical parts of Kaspersky's source code, assisted by the company's experts.

Kaspersky Global Transparency Initiative: our results in numbers

in Switzerland – globally known as a neutral country, and with strict data protection regulation.

Here we process and store cyberthreat-related user data from Europe, North and Latin America, the Middle East, and also several countries in Asia-Pacific region.

In Brazil, Italy, Japan, Malaysia, the Netherlands, Singapore, Spain, Switzerland, and the United States

confirming the trustworthiness of Kaspersky engineering practices:

- SOC 2 audit by a 'Big Four' accountancy firm
- ISO 27001 certification

by public and private stakeholders, including two 'red piste' visits with a source code review

with total payments equal to \$75,750

Independent assessments and certifications

SOC

The Service Organization Controls (SOC) Reporting Framework, a globally recognized report for cybersecurity risk management controls, was developed by the American Institute of Certified Public Accountants (AICPA). Kaspersky successfully renewed SOC 2 audit in 2022.

[Learn more](#)

ISO/IEC 27001

The most widely used information security standard prepared and published by the International Organization for Standardization (ISO), the world's largest developer of voluntary international standards. Information security management system of Kaspersky has been certified against ISO/IEC 27001:2013 international standard.

[Learn more](#)

Bug Bounty Program

Kaspersky is committed to the principles of [ethical vulnerability disclosure approach](#). To ensure the integrity of our products, Kaspersky has been running its public bug bounty program since 2016. The company also supports the Disclose.io framework, which provides Safe Harbor for vulnerability researchers concerned about negative legal consequences of their discoveries.

Rewards

\$100,000

for the discovery and coordinated disclosure of severe vulnerabilities (high-quality report with PoC).

\$5,000 – \$20,000

for the discovery of vulnerabilities allowing different and less severe types of remote code execution.

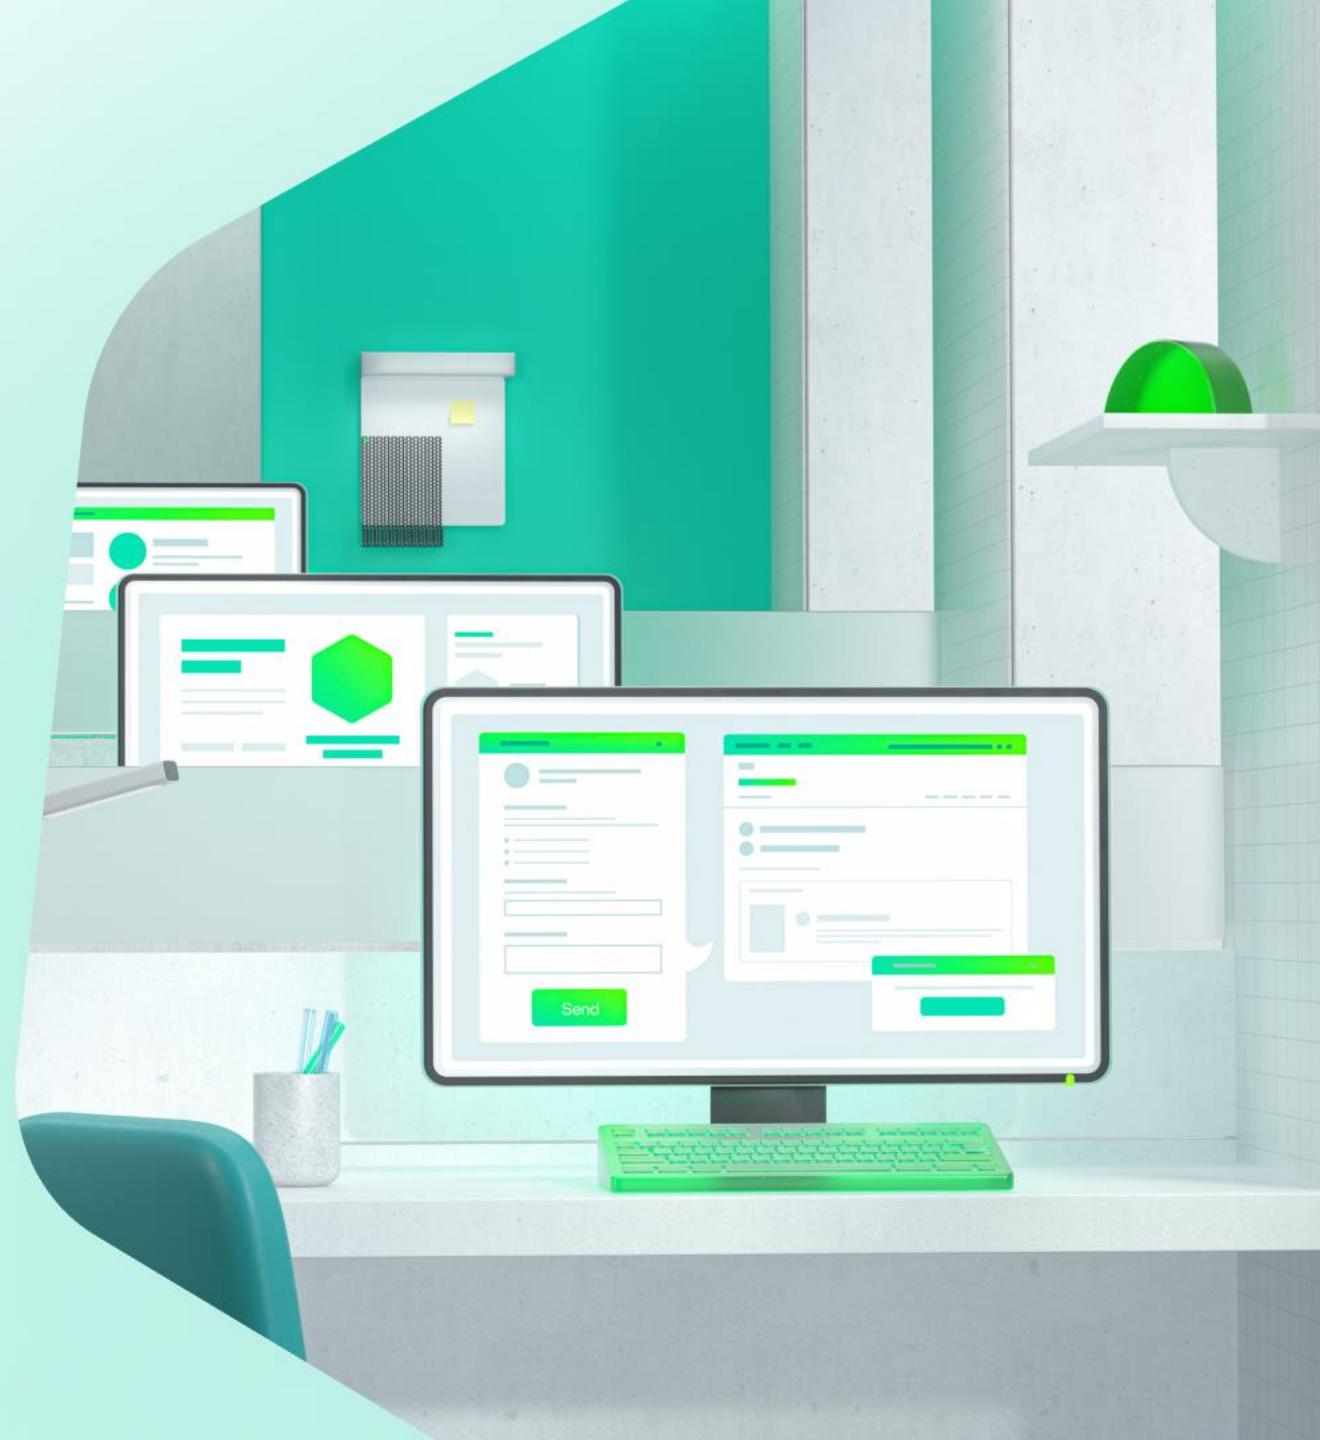

\$1,000 – \$5,000

for discovery of bugs allowing local privilege escalation, or leading to sensitive data disclosure.

Advanced persistent threat landscape in 2021

Kaspersky's Global Research and Analysis Team (GReAT) is well-known for the discovery and dissemination of the most advanced cyberthreats. According to their data, in 2021 the top targets for advanced persistent threats (APT) were governments, and the most significant threat actor was Lazarus.

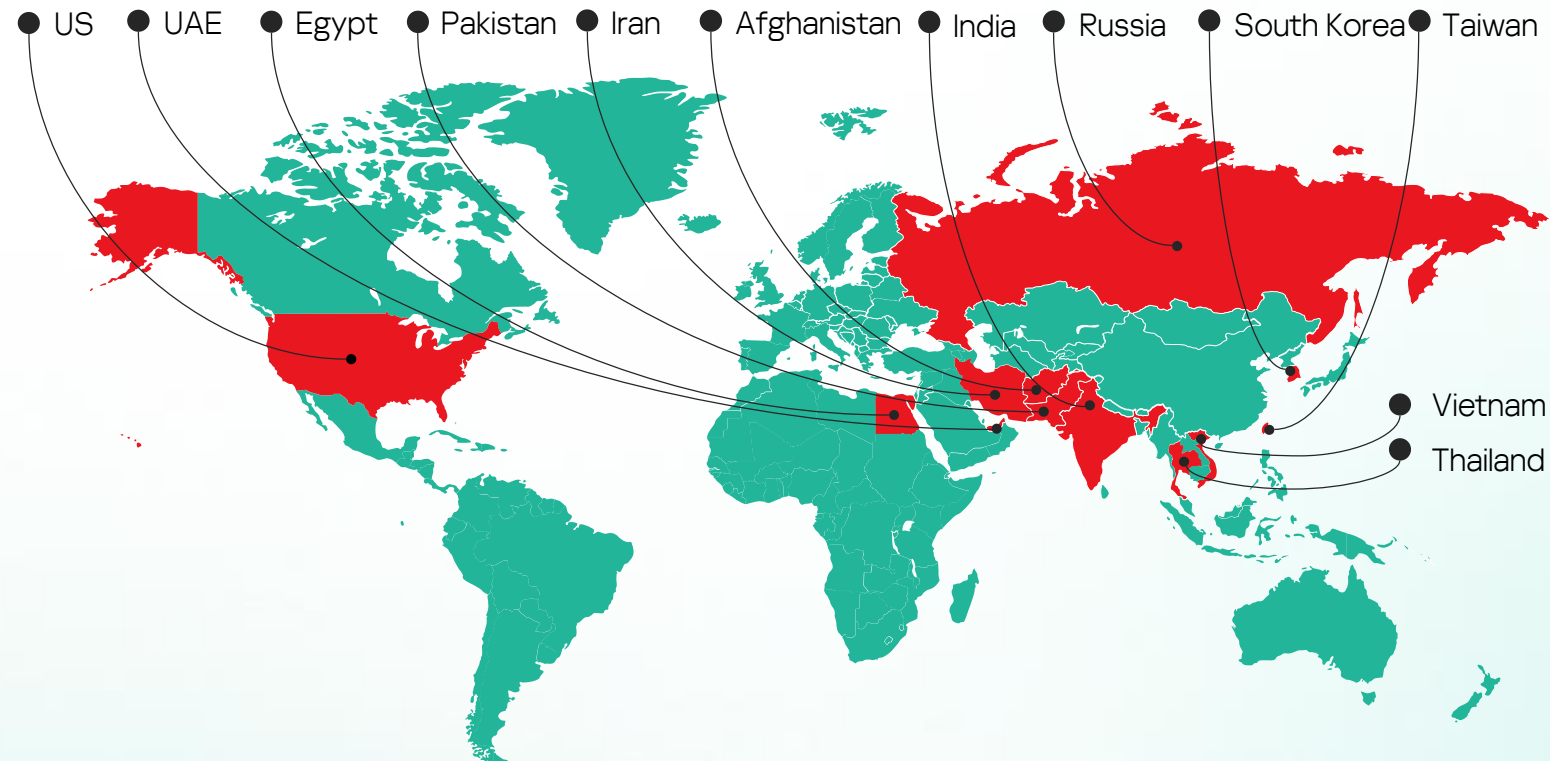

Top 10 targets

Enabling a privacy-minded world

Privacy has become a commodity of value with more and more users understanding its importance and the need to change their habits to protect their digital presence. Being not just a cybersecurity company, but a privacy company, Kaspersky invests not only in privacy features, but also works to enable users to protect their data and digital privacy through educational assets and hands-on tools.

From cybersecurity to Cyber Immunity

Traditional (cybersecurity)

Endless vulnerability/
antidot race

Virus/antivirus, email fishing/email protection

Secure by Design (Cyber Immunity)

Defined by product goal
and security objective

Microkernel, isolated domains, security policies

KasperskyOS

Architectural approach creates an environment where a vulnerability or bad code is no longer a big deal.

- IT system's "inherent" protection – its ability to withstand cyberattacks without any additional (applied) security tools
- The hands-on methodology to create IT systems with "innate" protection
- The platform for building Cyber Immune IT-systems – KasperskyOS, proprietary microkernel operating system for IT-products with high demands on cybersecurity

KasperskyOS areas of application

KasperskyOS-based solutions have “innate” protection against the consequences of the intrusion of malicious code and hacker attacks.

They perform its functions even in an aggressive environment without additional security features.

Kaspersky awards

- Overview
- Top 3 metrics

More than 600 awards

One of the five biggest endpoint security vendors*.

Kaspersky Internet Security was honored with the **Product of the Year 2020** award by independent test lab AV-Comparatives**.

[Learn more](#)

*The company was ranked fifth by IDC estimations in 'Worldwide Consumer Endpoint Security Market Shares, 2020: The COVID-19 Pandemic Contributed to a Market Surge' (Doc #US47714321 / June 2021) and ninth in 'Worldwide Corporate Endpoint Security Market Shares, 2020: Pandemic and Expanding Functionality Propelled Market Growth' (Doc #US47768021 / June 2021).

** Kaspersky's flagship home user security solution – Kaspersky Internet Security – was honored with the [Product of the Year 2020](#) award for an impressive sixth time, in an annual report released by independent test lab AV-Comparatives. Kaspersky was acknowledged ahead of 16 peers by achieving Advanced+ awards in seven rigorous tests, to rank the company highest overall across the participating Windows security products.

As cybersecurity becomes vital for every individual and entity, trust in providers is essential. We protect home users and corporate clients worldwide, and market recognition is really important for us. In 2021, Kaspersky products participated in 75 independent tests and reviews. Our products were awarded 57 firsts and received 63 top-three finishes.

* 75 independent tests were completed by Kaspersky products in 2021 alongside 13 competitors. More than 80 vendors took part in the tests, but only those who participated in 35% or more of the tests had their results represented in the chart.

ESG

As we work to create a safer future, we are concerned about the well-being of the world not beyond in the context of its digital reality. Gender equality, accessible knowledge, volunteering, child safety, animal protection and more are all issues that are crucial to us.

We are also committed to social responsibility through volunteerism and philanthropy in the different regions in which the company operates.

We cooperate with non-profit organizations, support charity initiatives and create our own social programs.
