Cyberthreats throughout the seasons

New beginnings bring new risks

Machine learning perfects new detection indicators.

Frozen temperatures paralyze IT

Cloud-based; immune to extreme weather devastation.

Colds & flu cause staff shortages

Simple protection even when IT staff are absent.

March madness despite known risks

Message filtering stops users opening risky emails.

Black Friday and Cyber Monday

Rugged protection against online shopping spam.

Staff logging on over Easter break

Multi-device protection for mobile and remote work.

Halloween havoc

Resurrect any ghosted messages via secure search.

May Day and the right to privacy

Suspicious mail goes to an admin-only folder.

Back to school blues

Intuitive single-view console requires no training.

Tennis tumult & dodgy streaming

Automated detection for online streaming malware.

Office on the beach

Blocks unknown & zero-day malware in OneDrive files.

Football frenzy & stadium Wi-Fi

Filters out threats on insecure public Wi-Fi.
