¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District’s list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

D. Excluded Waters or Features

Excluded waters ((b)(1) – (b)(12)): ⁴			
Exclusion Name	Exclusion Size	Exclusion ⁵	Rationale for Exclusion Determination
Section I	0.39 acre(s)	(b)(1) Non-adjacent wetland.	Section I is an emergent wetland located in a depressional area of a horse pasture and is outside of any identified flood plain according to the FEMA National Flood Hazard Map. Section I is not adjacent to any “waters of the U.S.” Section I receives hydrology from upland runoff. The ATP tool was used for the date of the delineation and conditions were considered normal.
Section II	0.77 acre(s)	(b)(1) Non-adjacent wetland	Section II is an emergent wetland located in a depressional area of a horse pasture and is outside of any identified flood plain according to the FEMA National Flood Hazard Map. Section II is not adjacent to any “waters of the U.S.” Section II receives hydrology from upland runoff. The ATP tool was used for the date of the delineation and conditions were considered normal.

USGS Sources	N/A.
USDA Sources	N/A.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
