B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: Erosional Features (EF) #1, #2, and #3 are drainage swales located in uplands that convey storm water from the adjacent agricultural field and surrounding structures. These swales do not exhibit a defined bed, bank, or ordinary high water mark and are not susceptible to use in interstate or foreign commerce; therefore these swales are not considered to be "waters of the U.S." and are not jurisdictional.

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
