B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: The 10.7 acre project site does not contain any aquatic resources including wetlands. There are a couple of areas dominated by facultative and facultative wet plant species. One area is located in a recently developed retention basin that receives water from the east and the other area is located adjacent to a railroad borrow ditch located west of the site. These man made areas lack hydric soil indicators and the necessary hydrology to be classified as a wetland. Therefore, the entire 10.7 acres site has been determined to be dryland.
