¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: Historically, the Project Area was a private farm managed as irrigated agricultural fields before the farm was sold to the various gravel pit and aggregate operations. The area currently consists of undeveloped land with no evidence of aquatic resources. Although the site supports some wetland vegetation, the surveys have revealed that none of the sample points met the hydric soil or wetland hydrology indicator criteria. Furthermore, in 2016 an 8-month long groundwater monitoring study was done at the site. None of the groundwater pits had surface water or groundwater that met the wetland hydrology criteria.
