

**U.S. ARMY CORPS OF ENGINEERS  
REGULATORY PROGRAM  
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)  
NAVIGABLE WATERS PROTECTION RULE**

**I. ADMINISTRATIVE INFORMATION**

Completion Date of Approved Jurisdictional Determination (AJD): 8/4/2020

ORM Number: SPK-2020-00452

Associated JDs:

Review Area Location<sup>1</sup>: State/Territory: CA City: Roseville County/Parish/Borough: Placer County

Center Coordinates of Review Area: Latitude 38.780207 Longitude -121.307634

**II. FINDINGS**

**A. Summary:** Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale:
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

**B. Rivers and Harbors Act of 1899 Section 10 (§ 10)<sup>2</sup>**

N§ 10 Name	§ 10 Size		§ 10 Criteria	Rationale for § 10 Determination
N/A.	N/A.	N/A.	N/A.	N/A.

**C. Clean Water Act Section 404**

Territorial Seas and Traditional Navigable Waters ((a)(1) waters): <sup>3</sup>				
(a)(1) Name	(a)(1) Size		(a)(1) Criteria	Rationale for (a)(1) Determination
N/A.	N/A.	N/A.	N/A.	N/A.

Tributaries ((a)(2) waters):				
(a)(2) Name	(a)(2) Size		(a)(2) Criteria	Rationale for (a)(2) Determination
N/A.	N/A.	N/A.	N/A.	N/A.

Lakes and ponds, and impoundments of jurisdictional waters ((a)(3) waters):				
(a)(3) Name	(a)(3) Size		(a)(3) Criteria	Rationale for (a)(3) Determination
N/A.	N/A.	N/A.	N/A.	N/A.

Adjacent wetlands ((a)(4) waters):				
(a)(4) Name	(a)(4) Size		(a)(4) Criteria	Rationale for (a)(4) Determination
N/A.	N/A.	N/A.	N/A.	N/A.

<sup>1</sup> Map(s)/figure(s) are attached to the AJD provided to the requestor.

<sup>2</sup> If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

<sup>3</sup> A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

NAVIGABLE WATERS PROTECTION RULE**

**D. Excluded Waters or Features**

Excluded waters ((b)(1) – (b)(12)): <sup>4</sup>				
Exclusion Name	Exclusion Size		Exclusion <sup>5</sup>	Rationale for Exclusion Determination
Depressional seasonal wetland 1	0.001	acre(s)	(b)(1) Non-adjacent wetland.	This wetland meets the definition of paragraph (c)(16); however, it does not abut, nor is it inundated by flooding from, an (a)(1), (2), or (3) water in a typical year, nor is it physically separated from an a)(1), (2), or (3) water by a natural or artificial barrier.
Depressional seasonal wetland 2	0.006	acre(s)	(b)(1) Non-adjacent wetland.	This wetland meets the definition of paragraph (c)(16); however, it does not abut, nor is it inundated by flooding from, an (a)(1), (2), or (3) water in a typical year, nor is it physically separated from an a)(1), (2), or (3) water by a natural or artificial barrier.
Depressional seasonal wetland 3	0.012	acre(s)	(b)(1) Non-adjacent wetland.	This wetland meets the definition of paragraph (c)(16); however, it does not abut, nor is it inundated by flooding from, an (a)(1), (2), or (3) water in a typical year, nor is it physically separated from an a)(1), (2), or (3) water by a natural or artificial barrier.
Depressional seasonal wetland 4	0.005	acre(s)	(b)(1) Non-adjacent wetland.	This wetland meets the definition of paragraph (c)(16); however, it does not abut, nor is it inundated by flooding from, an (a)(1), (2), or (3) water in a typical year, nor is it physically separated from an a)(1), (2), or (3) water by a natural or artificial barrier.

**III. SUPPORTING INFORMATION**

**A. Select/enter all resources** that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

Information submitted by, or on behalf of, the applicant/consultant: 8151 Industrial Avenue, Aquatic Resources Delineation Report, dated December 2019, prepared by Helix Environmental Planning

This information is sufficient for purposes of this AJD.

Rationale:

Data sheets prepared by the Corps:

Photographs: Aerial and Other: 1) Ground photos: Delineation report dated December 2019; 2) Aerial Imagery: GoogleEarth 7.3.3.7692. (Build Date: April 30, 2020). Roseville, California. Latitude 38.780207°N, Longitude -121.307634°W, eye alt 908 ft. Retrieved August 4, 2020, from <http://www.earth.google.com>.

Corps site visit(s) conducted on:

Previous Jurisdictional Determinations (AJDs or PJDs):

Antecedent Precipitation Tool: provide detailed discussion in Section III.B.

USDA NRCS Soil Survey:

<sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

- USFWS NWI maps:
- USGS topographic maps:

**Other data sources used to aid in this determination:**

Data Source (select)	Name and/or date and other relevant information
USGS Sources	N/A.
USDA Sources	N/A.
NOAA Sources	N/A.
USACE Sources	N/A.
State/Local/Tribal Sources	N/A.
Other Sources	N/A.

**B. Typical year assessment(s):** N/A

**C. Additional comments to support AJD:** The nearest potential (a)(1), (a)(2) or (a)(3) water is a concrete-lined drainage, south of the non-adjacent wetlands, and outside of the review area. The intervening area between the concrete-lined drainage and the non-adjacent wetlands is upland. Furthermore, due to their depressional topography, none of the non-adjacent wetlands have a hydrologic connection to the concrete-lined drainage.
