- **Complete Table 1 - Required**

NOTE: If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Section 10 navigable waters list, DO NOT USE THIS FORM TO MAKE THE DETERMINATION. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Section 10 RHA navigability determination.

ID-1, ID-2, ID-3, ID-4, ID-5, ID-6, ID-7, ID-8, ID-9, ID-10.	Irrigation ditches created in uplands. ID-1 through ID-10 fall under (b)(3)(ii) exclusion, as they are ditches with intermittent flow, are not excavated in, or relocating a tributary, or draining a wetland. The sole purpose of these ditches is to convey irrigation water to the agricultural fields during the growing season (summer and fall) and to convey storm water runoff away from the agricultural fields during the wet season. Flows are not relatively permanent and are controlled via a series of weirs. Within the Project Area the irrigation water comes from a concrete pipe diversion from the Putah Canal. Please see attachment, sheets 1 through 5.
P-1	The pond is a detention basin for stormwater for the City of Dixon. The detention basin receives stormwater from the newer developments to the north and will eventually service new developments adjacent to the basin. The basin is designed to be designed to retain a large amount of water. Based on the design of the basin, being constructed in uplands specifically to retain stormwater for current and future residential development, P-1 is exempt under section B(6).
