B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:

A site visit by Corps personnel revealed that no wetland features exist on site and the parcel consists entirely of uplands, with the exception of an irrigation ditch running west to east through the property. The ditch was constructed in uplands and receives overflow from ornamental ponds to the west, but any flow in this feature terminates in agricultural fields on the other side of Quarry Mountain Road. This is verified by the above referenced delineation of the adjacent parcel.

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
