Subject: NWS to issue National Tsunami Warning Center Routine
Communications Tests for the East and Gulf Coast on May 12, 2020

The NWS National Tsunami Warning Center (NTWC) and coastal NWS
Weather Forecast Offices (WFOs) will perform routine monthly
tsunami communication tests to ensure end-to-end readiness of
NWS dissemination software and hardware on Tuesday, May 12,
2020, for East and Gulf Coast states.

The intended recipients of these communication tests include
designated national focal points, state/territorial warning
points, coastal WFOs, U.S. Coast Guard, and critical military
dissemination points.

Each test message will be clearly identified as such, and will
be consistent with the product changes implemented by Service
Change Notice (SCN)18-94: Changes to Valid Time Event Codes
(VTEC) and Event Tracking Numbers (ETN) for Domestic Tsunami
Test Products, Effective April 1, 2019:

https://www.weather.gov/media/notification/pdfs/scn18-94vtec_tsunami.pdf

VTEC codes for the test messages will start with the /T fixed
identifier versus /O for operational messages. To provide
additional assurance that a test message is not inadvertently
distributed as an actual Warning/Advisory/Watch product, Event
Tracking Numbers (ETN) for the test messages will begin with 9
as the leading digit of the four character code.

The text products affected by routine monthly tsunami
communication testing are the national tsunami products issued

under the following Advanced Weather Interactive Processing System (AWIPS) Product Identifiers (PILs) and World Meteorological Organization (WMO) Identifiers (IDs):

NTWC Product	AWIPS PIL	WMO ID
-----	-----	-----
Segmented Tsunami W/W/A for U.S. Atlantic Coast Gulf Coast, and Canada East Coast	TSUAT1	WEXX20
Public Tsunami W/W/A for U.S. Atlantic Coast Gulf Coast, and Canada East Coast	TSUATE	WEXX30
