Subject: Spanish-Language Survey Now Available as NWS Solicits
Comments through August 21, 2020 on Proposed Major Changes to
the NWS Watch, Warning, and Advisory (WWA) System

espanol presione aqui):

https://www.weather.gov/media/notification/pdf2/pns20-56haz_simp_espanol_survey.pdf

As the core outcome of the Hazard Simplification (Haz Simp) project, the NWS is collecting comments through August 21, 2020, on the proposed discontinuation of all "Advisory," "Special Weather Statement," and "Short Term Forecast" products. In their place, the NWS proposes the use of generic, plain language statements to convey information for lower-level hazardous events that are not expected to reach the "Watch" or "Warning" levels. All current "Watch" and "Warning" products, used to highlight hazards that pose a threat to life and property, would remain unchanged.

The purpose of this proposal is to address extensive social science research, which indicated three main concerns:

The large number of existing WWA products can create confusion for NWS partners and the public.

The formats of WWA and other key messaging products are inconsistent.

WWA headlines can be misunderstood, leading to unintended

protective action or lack thereof.

Comments and feedback on these proposed changes may be directed to the NWS via an online survey form. Both English and Spanish versions of the survey are now available:

English Survey: <https://www.surveymonkey.com/r/publicchazsimp>

Spanish Survey: <https://www.surveymonkey.com/r/HazSimpSpanish>

Please send questions on this proposed change to hazsimp@noaa.gov by August 21, 2020.
