SUBJECT: National Tsunami Warning Center Routine Communications
Tests for the West Coast and Alaska Coast to Take Place on
January 14, 2021

The NWS National Tsunami Warning Center (NTWC) and coastal NWS
Weather Forecast Offices (WFO) will perform routine monthly
tsunami communication tests to ensure end-to-end readiness of
NWS dissemination software and hardware on Thursday, January 14,
2021, for Alaska and West Coast states.

The intended recipients of these communication tests include:
designated national focal points, state/territorial warning
points, coastal WFOs, U.S. Coast Guard, and critical military
dissemination points.

Each test message will be clearly identified as such, and will
be consistent with the product changes implemented by Service
Change Notice 18-94: Changes to Valid Time Event Codes (VTEC)
and Event Tracking Numbers (ETN) for Domestic Tsunami Test
Products Effective April 1, 2019.

https://www.weather.gov/media/notification/pdfs/scn18-94vtec_tsunami.pdf

VTEC codes for the test messages will start with the /T fixed
identifier (versus /O for operational messages). To provide
additional assurance that a test message is not inadvertently
distributed as an actual Warning/Advisory/Watch product, Event
Tracking Numbers (ETN) for the test messages will begin with
9 as the leading digit of the four character code.

The text products affected by routine monthly tsunami

communication testing are the national tsunami products issued under the following AWIPS Product Identifiers (PIL) and World Meteorological Organization (WMO) Identifiers (ID):

NTWC Product -----	AWIPS PIL -----	WMO ID -----
Segmented Tsunami W/W/A for West Coast/BC/Alaska	TSUWCA	WEPA41
