 -NOAAPort
 Other NWS Partners and NWS Employees

From: Thomas Cuff
 Director, NWS Office of Observations

Subject: Deactivation of legacy GINI Global Multi-Satellite Geostationary
 Imagery Composite products from the NOAAPort/SBN effective
 December 10, 2020

Effective on or about Thursday, December 10, 2020, the Satellite Broadcast
Network (SBN) will cease disseminating legacy Global Multi-Satellite
Geostationary Imagery Composite products, which are in GOES Ingest
NOAAPort Interface (GINI) format. These products are as follows:

Imagery Composite to be deactivated	WMO Header
-----	-----
Visible	TICF01 KNES
Water Vapor	TICF03 KNES
Longwave Infrared	TICF04 KNES

Users of these legacy products should transition to the new netCDF Global
Multi-Satellite Geostationary Imagery Composite products, which have been
available via SBN (NOAAPORT_OPT Channel: Port 1204, PID 104) since
September 16, 2020:

Active Replacement Imagery Composite	WMO Header
-----	-----
Visible	TICF02 KNES
Water Vapor	TICF08 KNES
Longwave Infrared	TICF14 KNES

Details on the new Global Multi-Satellite Geostationary Imagery Composite
products may be found in Service Change Notice 20-67:
https://www.weather.gov/media/notification/pdf2/scn20-67goes_multi-sat.pdf

Critical weather or other factors may delay the deactivation of the
legacy products on the SBN.
