 Director, NCEP Central Operations

Subject: Modifying Application Programming Interface Response Headers on
February 7, 2022

On February 7, 2022, beginning at 1330 Coordinated Universal Time (UTC), the Application Programming Interface (api.weather.gov) was modified to eliminate the "Last-Modified" header in responses to requests from the following Uniform Resource Locators (URLs):

<https://api.weather.gov/gridpoints/<wfo>/<x,y>>
<https://api.weather.gov/gridpoints/<wfo>/<x,y>/forecast>
<https://api.weather.gov/gridpoints/<wfo>/<x,y>/forecast/hourly>

Where <wfo> is a valid Weather Forecast Office three letter string and <x,y> are x and y gridpoints. For example, for WFO Baltimore/Washington in Sterling, VA:

<https://api.weather.gov/gridpoints/LWX/82,75>
<https://api.weather.gov/gridpoints/LWX/82,75/forecast>
<https://api.weather.gov/gridpoints/LWX/82,75/forecast/hourly>

This header change is temporary and will be added back in a future release of the application.

For questions regarding the operating aspects, please contact:

Josh Huber
NCEP/NCO
College Park, MD
